

Select School House Site.

The directors of the Hood River school have about decided on the location for the new school house on the hill. The lot selected is southeast of H. H. Bailey's residence. The only objection the board finds to the location, says Director Baker, is the fact that the ground is not large enough. The ground selected is only 140 x 150 feet in extent. Director Baker is of the opinion that the school house should have larger playgrounds. The district has only \$600 to expend in the purchase of a site or the directors would secure at least a half block.

The directors would appreciate it if some of the citizens on the hill who are directly interested in having the new building located there, would raise sufficient funds by popular subscription for the purchase of more ground. The district has plenty of land for a new building on the State street property, and the board may build there, so the directors intimate, if they cannot get land enough on the hill.

This location the directors have selected on the hill would be very handy for the people of the country, says Mr. Baker. Those who bring the children into school would let the primary youngsters out at the school on the hill, and continue on the same road to the school further into town. It is the district's intention to expend \$4,000 for the new school house. This amount will put up a four room house. Mr. Baker says he believes water can be secured on the hill by making arrangements with a nearby property owner who will put up a wind mill.

Will Experiment With Sugar Beets. W. H. Eccles, general manager of the various mills of the Oregon Lumber Co., and one time in charge of the beet sugar factory at LaGrande, tells the Glacier that he believes sugar beets would prove a profitable crop in Hood River. He believes that as much as \$50 or \$60 an acre can be realized from this crop in Hood River. Mr. Eccles says he will make an experiment with the beets in Hood River next year. He will send the beets to the factory at LaGrande and determine just what percentage of sugar may be obtained from beets raised here.

It requires warm weather and cool nights to produce good sugar beets, says Mr. Eccles, and he is of the opinion that the soil and climate in the valley here is all right for a profitable production of the beets. This place would be an ideal location for a beet sugar factory, said Mr. Eccles, as there is plenty of good water here and the railroad is handy for transportation.

Sugar beets are grown extensively in Utah, and the industry there is profitable. One of the Amalgamated Sugar Co. has several million dollars invested in factories at Ogden and Logan. Ten and twelve tons is regarded a good yield per acre, and the beets bring about \$14 a ton.

Governor Chamberlain's action in offering \$20,000 reward for the capture and conviction or evidence that will lead to the conviction of the murderers of J. C. Conn, who was killed on the range last March, and \$300 for the arrest of each one who participated in the slaughtering of the sheep on the range, will be commended by every law-abiding citizen of the state. The life and property of citizens in some sections of the country is coming to be held in too little regard by certain classes, and the full penalty of the law should be meted out to willful offenders, without regard to their condition or position in society. The corporation in private individual who will abet or permit such work by those under them or in their employ should be held equally amenable to the law. If such flagrant violations of the fundamental tenets of our state and national constitution are permitted to be thus respected and the perpetrators of such crimes allowed to go free, it will be but a short step to complete anarchy. Men who are guilty of such dastardly work are a menace to the country in which they live.

Safeguard the Children. Notwithstanding all that is done by boards of health and charitably inclined persons, the death rate among small children is very high during the hot weather of the summer months in the large cities. There is not probably one case of bowel complaint in a hundred, however, that could not be cured by the timely use of Chamberlain's Colic, Cholera and Diarrhoea Remedy. For sale by all druggists.

Chamberlain's Cholera Cure. This remedy is certain to be needed in almost every home before the summer is over. It can always be depended upon even in the most severe and

dangerous cases. It is especially valuable for summer disorders in children. It is pleasant to take and never fails to give prompt relief. Why not buy it now? It may save life. For sale by all druggists.

R. H. Webber, owner of nurseries at Tangent, Hood River and The Dalles, was in the valley all last week looking over the fruit situation in this section. He was free to admit that Rogue River led all Oregon in the size and perfect condition of its apple and pear orchards, but in strawberry growing through lack of cultivation and of poor varieties, Rogue River did not equal Hood River or even Willamette valley. Mr. Webber predicts a splendid future to the fruit interest of Rogue River valley.—Jacksonville Sentinel.

No Pity Shown. "For years fate was after me continuously," writes F. A. Gullege, Verbena, Ala. "I had a terrible case of Piles causing 24 tumors. When all failed Bucklen's Arnica Salve cured me." Equally good for burns and all aches and pains. Only 25c at Chas. N. Clarke's drugstore.

Unjust Discrimination. A Michigan farmer was arrested and adjudged crazy because he thought he was a presidential candidate. What rank injustice to arrest one and let the others go!—Baltimore, Ind., Herald.

Miss Weed, recently graduated from the Philomath college school of music, is visiting friends on Hood River heights.

WHY KINLOCH PASTE IS THE IDEAL HOUSE PAINT. The purpose of House Paint is to protect and beautify. "Household oil is the life of paint" because it is the binder, the essential that holds the pigment (the dry paint) to the surface, and until the oil loses this binding quality through its disintegration by atmospheric influences should the loosened dry particles of pigment cease off. The office of the pigment is decorative and also preservative in prolonging the life of the oil by protecting it from the elements. Absolute certainty of the purity of the linseed oil contained in the paint is essential to its durability. You have this absolute certainty of the quality of the oil in the paint put on your house when you buy Kinloch Paint, because you buy the oil separately and give your paint this absolute certainty of quality by mixing this oil gallon for gallon with the thick "Kinloch" paste in which, for your convenience and the certainty of proper proportions, all the pigments, tinning colors, "turps" and driers are ground together and sold you, ready for the admixture of the pure new oil by yourself. These facts alone make "Kinloch" the ideal paint; but besides this guarantee of durability through your personal knowledge of the purity of the oil, it is the fact that you buy your paint this absolutely certain durability by mixing this oil gallon for gallon with the thick "Kinloch" paste in which, for your convenience and the certainty of proper proportions, all the pigments, tinning colors, "turps" and driers are ground together and sold you, ready for the admixture of the pure new oil by yourself.
