

SEALY

This Mattress is made of long staple cotton, and is non-tufted which makes it absolutely sanitary, no place for bugs and dirt or germs of any kind to collect. Guaranteed for 20 years against becoming lumpy or uneven.

FRED S. ASHLEY

Mattresses

Some of the so-called cotton mattresses are made of linters, which is not cotton at all, but scraping from the cotton seed and not to be compared with the long staple pure white cotton used in the SEALY.

The Home Furnisher

BOISE BUYER CONTRACTS FOR WALLOWA LUMBER

W. R. Kivette, a lumber buyer of Boise, Ida., contracted for over a million feet of lumber here and at Joseph this week. He bought 690,000 feet of W. F. Rankin of this city, and the Carpenter mill will be taken to the Rankin timber north of this city early next week, work to begin at once on getting out the lumber.

Mr. Kivette also contracted for a large amount from Mitchell & Tyler, east of Joseph.

Splendid Success Of Opening Night

Ethel Tucker's Fine Acting Impresses Large Audience—Strong Specialties Given.

The Ethel Tucker stock company opened its summer season in this city, Thursday night, playing La Belle Marie to a good sized and representative audience. The company made an instant and big hit by their evident intent to present a finished performance in every respect, every member giving his or her best without stint.

Miss Tucker completed the impression made upon her Enterprise audiences last winter, that she is the best actress ever seen on the local stage. She was especially fine in her subdued but effective acting in the death scene in the first act, and in her feeling recital of her life's story to Earl Leighton. Miss Marjorie Mandeville played the part of Grace Leighton with spirit and understanding. She also pleased the audience greatly with her Dutch song and dance between acts, and little Will Brandon, Jr., captivated all by his

(Continued on page six.)

NEW CREAM STATION.
The Enterprise Creamery company has established a receiving station for cream at Lostine. The building just north of the barber shop has been rented for the station and for the present cream will be received there Wednesday and Saturday forenoons. Later, if the business justifies, a building will be erected and more time put in there by representatives of the company.

MINERS COME TO COMMENCE WORK

MEN FROM COEUR D'ALENE DISTRICT ARRIVE AT LOSTINE THIS WEEK.

Lostine, July 23.—J. H. Jackson of Wallace, contractor for the \$5000 tunnel on the Contact Mining & Milling company's claims up the South Fork, 17 miles south of here, arrived Monday, accompanied by Mrs. Jackson and their son Edgar. The latter will also work at the mines. Others who came with the Jacksons from the Coeur d'Alene country, are Gust Carlson, J. C. Campbell and J. W. Jickling, all experienced miners. Mr. Carlson is accompanied by his family.

These men are the foremen on the work and other workmen will come here later. Their families will reside here in town.

Reports confirming the great extent of the veins are made by every one who sees them. Two mining men and investors were here last week to inspect the claims before investing, and they became as enthusiastic as all others, and say there is enough ore in sight to load 100 cars a day for years.

The miners say the news is already spreading in the Coeur d'Alene district and a bunch of prospectors will be down soon. Already other claims have been staked and the canyon for many miles up will be thoroughly prospected within a few months.

The veins of the Contact company's property are exposed on the side of the canyon for hundreds of feet, and Mr. Hunter, the man who put up \$20,000 for development work, says the extent and richness of the deposit was never equaled in the Coeur d'Alene. In addition to buying a one-third interest, Mr. Hunter gave each of the five locaters a bonus of \$1000.

Outside mining men say it will prove one of the big copper mines of the country from the start, and means a population of 3000 or more for Lostine in a very short time.

Another group of local men have made a rich strike in the high mountains

southeast of Enterprise. They are W. W. Willett and son, Crof Womack, Irvin Whitmore and others. Their claims assay very rich in gold and silver.

\$15 FOR TIMOTHY.

The first car of new hay was shipped today by S. E. Miller, consigned to the United States reclamation service at Hermiston, Oregon. The hay was No. 1 timothy and brought at \$15 per ton on car at Union.—La Grande Observer.

Double Train To Wallowa County

La Grande Star Gives Rumors of Improved Service On This Branch.

"One of the most encouraging rumors afloat in railroad circles recently is that there is to be a double train service started soon to Wallowa county," says Tuesday's La Grande Star. "According to the new schedule, if it materializes, one train is to leave in the morning and return that evening, while the other leaves in the afternoon and returns in the morning."

"It is reported that the new schedule will provide for a Sunday train, thus accommodating the large number of people who desire to take Sunday excursions into the Wallowa, one of the most beautiful valleys to be found in the United States. Many are eager to have the pleasant trip up the Minam, and up the Wallowa river, but on the present schedule two days are required for the trip."

"The increase in traffic from the prosperous Wallowa makes this extra train service very desirable now. The outcoming of people is very large, and is rapidly growing larger, and the business relations that they have with Union county are extensive. Thus from every point all quarters the report of the new service is hailed with delight."

CONTRACT 2500 TONS.

The hay buyers contracted for 2500 tons of hay at Lostine and vicinity last week at prices ranging from \$6.50 in the field, and up. There is a bumper crop of hay in the Middle Valley this year.

LOTS OF WORK IN RECORDER'S OFFICE

FIFTY-TWO INSTRUMENTS FILED IN ONE DAY—MANY U. S. PATENTS.

There may be the usual summer dullness in other business at the court house but there is no slowness apparent in the recording department of County Clerk Boatman's office. On Monday, July 19, 52 instruments were filed for record, 31 of them being U. S. patents. Here are the real estate deeds recorded since last publication:

Clyde Harsin to Fred A Harsin (Q. C.) 1/2 ne, se nw 33-1n-47. \$160.
U. S. to Martin Lassus (Dup.) rw 32-3n-42.

Henry Ibberson to John G. Bergs (Q. C.) w 1/2 e 1/2 35-3n-45. \$1.

A. L. Berry to C. C. Boswell (B for L) Ew. n 1/2 sw, nw s, sw ne 34-1n-44. \$1000.

Annie Allen to J. F. Ham (Q. C.) n 1/2 sw 15-1n-43. \$1

United States to John Zell (T. C. C.) n 1/2 nw sw nw, nw sw 26-1n-44.

Edgar Marvin, sheriff, to G. I. Ratcliff, sheriff's dead, ne sw 29-2n-41. \$337.

Isabel Wheat to E. B. Boyd, lots 1 and 2, blk 11, Gardner's add Enterprise. \$1.

E. B. Wheat to E. B. Boyd, lots 3 and 4 blk 11, Gardner's add Enterprise. \$1.

R. F. Stubbfield to James E. Scoblefield, trce of 5 1/2 acres in Gardner's add Enterprise. \$1000.

Pioneers Go To Reunion At Imbler

Settlers Who Came To Wallowa In Seventies Attend Annual Event.

W. W. White of this city, and Mr. and Mrs. A. Wade of Alder Slope were passengers for Union county, Wednesday, going to attend the Pioneer meeting at Imbler.

Mr. White was among the earliest settlers of Wallowa county, coming in here in 1872, the same year he reached Union county. The Tulleys, Masterson, and a few others were the only settlers ahead of him. He has resided here ever since and seen and helped the county grow from an Indian wilderness paradise to civilization, cultivation and prosperity. His part of the work has been no small share and he has shared in the splendid prosperity, too.

Mr. and Mrs. Wade will visit in Island City with relatives. Aaron Wade came to Union county in 1872 and Mrs. Wade in 1876 and both moved into this valley the following year and in the 32 years since then have worked and earned a comfortable competence, owning one of the finest farms and most beautiful homes on Alder Slope, besides much other property.

Mr. Wade and Mr. White both say the seasons have changed wonderfully since the early days, there being less frost in the late spring and early fall, more rain during the growing season and less snow in the winter. This is due, they say, to the cultivation of the ground, plowed ground absorbing so much more of the sun's heat rays.

Both old timers say while there were hardships to be endured, yet on the whole the early settlers had a good time and enjoyed life probably more than the residents here during these strenuous modern days.

CROPS AND CATTLE LOOK FINE ON THE CHESNIM

Deputy Assessor Thos. Rich, back from the Chesnimus country, praises the splendid crops up there and is especially enthusiastic over the fine gardens along the streams. He says Calvin Smith on Joseph creek has as good a garden with as wide variety of vegetables, as anyone can raise anywhere.

Mr. Rich says the cattle seem to be at least 30 days ahead of last year at this time, and are as fat and sleek as prime beaves ready for market.

IMMENSE YIELD OF SUGAR BEETS

EXPERIMENT IN THIS COUNTY IS BIG SUCCESS SAYS MANAGER BRAMWELL.

F. S. Bramwell, manager of the La Grande Sugar factory, came in Thursday and in company with T. W. Workman, who had personal charge of the culture of the 100 acres of experimental fields on the Slope and on Prairie Creek, made an examination of the fields. What he found was beyond his highest hopes, and he says the experiment is already a big success, present prospects being for the largest tonnage per acre in the history of the La Grande factory. We can grow enough beets in this valley to supply several factories.

Following are Mr. Bramwell's exact words in answer to an inquiry by a representative of this paper:

"Mr. Bramwell, How do your beets look and what are the prospects?"

"Your question requires a better answer than good or bad. For years ever since I first saw this beautiful valley, I have always said in my opinion it is an excellent place for beet culture. When the owners of the La Grande factory talked of moving away I always claimed that if the railroad would tap Wallowa county that our troubles would be ended. I was candid and honest in that statement. When I was here last winter I said in public that I believed a large tonnage could be grown in almost any of the land here today I have made a very careful examination of the several fields in which we are making a test of beet culture. I find that my former statement is more than proven true. I find no flies, worms or blight of any kind tormenting the beets. I find the tap root from 10 to 15 inches in length, with a smooth, clear skin, with no fibrous roots whatever. All these points indicate great tonnage which unless something unforeseen happens will surely come. The only way I would change my former statement is that I really did not appreciate the splendid condition that I find obtains today."

"At this time I go on record in telling you that the test we are making is far in excess of my fondest anticipations. I am convinced that sufficient beets can be grown here to supply two or three sugar factories and sooner or later we will see the sugar beet culture operated here in large proportion.

"About November 1, I will give you a detailed statement of what has been done so you will then know better what I speak."

New Doctor At Lostine.
Dr. J. I. Russell of Salem has located at Lostine. He is a graduate of the medical department of Willamette University.

T. P. Coeman left for Tacoma Friday on a business trip.

Mid-Summer Merchandise

We would like to show you our line of
