F. A. Clarke Is Seriously Hurt

Attempted To Hold Frightened Team By Bits and is Run Over.

F. A. Clarke was badly injured, Tuesday evening at the head of Wallowa lake, when his team took fright and he attempted to hold them by the bits. After being taken to his home here Dr. Ault was called and dressed the wounds of the injured man.

Mr. Clarke had driven to the lake after a camping outfit his family and friends had used there in a brief outing. While thus engaged some one discharged a small calibre rifle which frightened the horses. Mr. Clarke at the time was standing on the ground, and grabbed the frightened animals by the bits, seeking to hold them. In the melee which followed Mr. Clarke was thrown and the team passed over him.

He was taken to the lower end of the lake in a launch, and from there to Joseph and home in a vehicle, when Dr. Ault was summoned. The doctor found many bad bruises and cuts about the head, some of which required stitching, but so far as known now no internal injuries were discovered. The doctor thinks the patient probably has escaped any serious internal injuries.

Mr. Clarke is confined to his bed, but it is earnestly hoped that he will be about shortly. His many personal acquaintances and friends hope for his speedy recovery, and are deeply sympathetic for him that so serious an injury should befall him.

WILL MEET JOSEPH MEN IN NATIONAL GAME

The business men of Enterprise will play the business men of Joseph, in Enterprise, a game of ball next Tuesday afternoon. Both sides are confident of winning, but then both sides will find it impossible for each to win one game. Anyway, we're going to bet a large juicy chocolate drop that the Enterprise businessmen clean up their friendly adversaries, and come out at the finish fresh and gleeful as well as victorious. But then, of course, Editor Shurt is going to say the same thing about his aggregation in Joseph—and there you are.

COURT UPHOLDS MEDICAL BOARD

EXAMINERS' REFUSAL TO GRANT LICENSE TO DR. A. F. NEMIRO IS SUSTAINED.

(From Portland Journal.)

Action of the state board of medical examiners in refusing to grant a license to Dr. A. F. Nemiro to practice medicine in the state of Oregon was sustained by Judge Cleland in the circuit court this morning, in a decision dismissing the appeal of Nemiro, who asked for a writ of mandamus against the board.

Judge Cleland said the state board of examiners is clothed by law with the power and discretion of marking examination papers of applicants, and unless there is clear proof of abuse of discretion and arbitrary use of power the rejected applicant cannot complain. The whole question is one of fact, said the court, as to whether or not the examination papers were incorrectly marked to the prejudice of Nemiro.

"The evidence wholly fails to convince the court that the board committed error," said Judge Cleland, "and the appeal should be dismissed."

The rules of the board require that applicants shall sustain an average grade of 75 per cent before a license can be issued. Nemiro received an average of 68.6 per cent. A score of the most prominent physicians and experts of Oregon were called during the trial, opinion being about equally divided in favor of Nemiro and against him. The trial occupied several days, the questions asked of Nemiro and his answers being reviewed at length by the experts.

The above is of satisfaction to Dr. F. E. Moore, who is one of the examiners on the Medical Board, and graded part of Dr. Nemiro's papers.

SOCIALISM BREATHES.

Someone has remarked that the masters are ready to do anything except to get off of the backs of the workers. It seems that thinkers are ready to do anything except to come to the point.

You can hardly find a man these days who will not say that he believes in many things that the Socialist advocates. But so many stop short of the one essential thing—that is, the overthrow of exploitation. Socialists are coming more and more to recognize the truth of the Socialist philosophy—but philosophy is not enough. We must come to the point of stopping the robbery. Words are good as means of conveying ideas, but words will not fill an empty belly. Unless we come to action, unless Socialism is transformed from the realm of philosophy into an actuality, into a living, breathing condition, it is nothing.

Scientists are beginning to recognize the tremendous evolutionary force which is bearing us to Socialism. But if we depend on forces alone and not on ourselves we shall be centuries in reaching what might be obtained in a few years.

We must learn that men are masters of things. We must recognize that we can have Socialism whenever we want it. We must understand that the people will want Socialism so soon as it is presented to them with all its native and actual attractions.

Let us shoot at the mark. Let us put all the force which lies in thought, which lies in that unnamable thing called Life, into this movement, and we shall become

masters of the situation instead of being mastered by it.

Private ownership of great industries has proven a failure in nearly every instance. How many thousands of them have gone into the hands of receivers appointed by the courts—public officials? Some of them have gone there a dozen times before they could stand alone. If the judges could take a property out of the "skilled" hands of the captains of industry, and set it on its feet and hand it back to the wreckers, how much better even they would have been to have controlled it from the first to the last. Receiverships have been asked and given when the big capitalists desired to squeeze out the holdings of the smaller ones. If the nation had collectively owned and controlled, this could not have been done, for there would not have been any individual stockholders to be squeezed out. Private ownership of industries has proved a failure. Collective ownership never proved a failure anywhere, except for the corrupting of private ownership in robbing it or bribing the public officials to misuse it as an excuse to get it into their hands and so rob the people. The only reason that any one wants to own an industry is to rob his fellows, by making them pay more for the products than the products are worth. Do you get that? Would you want to own an industry if you could not make a profit out of it? And wouldn't that profit be taken from those who made its products? Doing away with private ownership of industries will do away with robbery and extortion. Do you wish to be extorted from? Get wise, man.
