**GLAVIS WORKED FOR WEED CONCERN**

SACRAMENTO, Cal., Jan. 2.—That Louis B. Glavis, who has resigned as secretary of the State Conservation and Water Commission, close on the heels of an investigation of the Kingsbury charges by Governor Johnson, admitted that he had been in the employ of the Weed Lumber company, for which he secured preferential lien land listings at Washington, D. C., while there on state business, is the statement made here today by Surveyor General W. S. Kingsbury.

Kingsbury, who was present at the hearing in the governor's private office, where Glavis was given a chance to present his defense, was loath to discuss matters taken up in that connection, but finally declared that the public had a right to know more than has heretofore been divulged.

Glavis freely stated that while he was secretary of the conservation commission he had been employed by the Weed Lumber company, a California concern, to secure the listings they wanted at Washington.

**BURNS TO QUIT GAME FOR GOOD**

SAN FRANCISCO, Jan. 2.—Hammered into submission and his fighting spirit gone, Frankie Burns, whose manager threw up the sponge after seventeen rounds of battle conceding victory to Harlem Tommy Murphy, is today determined to quit the fighting game for good.

The finish came as a great surprise to the adherents of the Oakland boy, who backed him into 2 to 1 favoritism.

During the opening rounds it looked like the odds were justified. Burns put Murphy down in the second round and kept the lead until about the tenth round. From this on Murphy, with bulldog tenacity, wore down his younger opponent and won on his merits.

**SMITH'S VETO LOWERS GRANTS PASS LEVY**

GRANTS PASS, Jan. 2.—The necessary three-fourths vote could not be obtained to pass the vetoed tax levy ordinance over the head of the mayor at the special session of the council Tuesday night, the measure therefore meeting defeat. This ordinance provided for a levy of twelve mills upon the assessed valuation of the city property, and the mayor in his veto message said that a smaller levy would produce funds enough for the proper conduct of the municipality and to meet all contingent expense. He advocated a levy of not to exceed eight mills, and thought that 7 1/2 mills would produce revenue enough.

The levy last year had been ten mills, and the finance committee, in making up the budget, had included for this year certain expenses that could not properly come against the city at this time, and to meet this had made the levy twelve mills.

An attempt was made to pass the ordinance over the veto, this requiring a three-fourths vote of the council, or six supporting it. Five only were recorded for it and it therefore failed.

When the case was called before Police Judge Weller, a representative of the district attorney declared Widney was still too ill to appear and the case was set over a week.

At the hospital it was said that Widney was steadily improving and would be able to leave for Los Angeles within a week.

democracy. The Texan bitterly denounced newspapers for referring to the senate as the "millionaire's" saying:

"If any of them think I am a millionaire, let them get up a syndicate and buy all I have. I will give them a chance to speculate. I will sell all I have for less than \$500,000. These writers ask how senators made millions which they never had."

During the progress of Bailey's speech the corridors of the senate were crowded with hundreds of persons who hoped to hear some part of the address. Every seat on the floor was occupied, the walls of the senate chamber being lined with members of the house, including the entire delegation from Texas, and "Uncle Joe" Cannon, Nicholas Longworth and Seneca E. Payne.

**EAGLE POINT-BANDON SURVEY COMPLETED**

Engineer Val Jean, who has been in charge of the survey of the Coos Bay-Eagle Point railroad, has completed the running of the line to Eagle Point, where it connects with the Pacific & Eastern.

The engineers have been engaged on this work since early last spring, and now have the survey complete from tide water at Bandon to Eagle Point. From Grants Pass up the river surveys were made on each side of the stream, and it will depend where the least serious engineering difficulties are found upon which side the road will ultimately be run. It is understood that a remarkably even grade is found along the entire route, the heaviest being a one and four-tenths climb, which is very mild indeed.

A great deal of money has been expended in the making of this survey and it has been complete in every particular. As soon as the data is ready to be turned over by the engineers, Mr. Lee the San Francisco attorney who is in charge of the matter, expects to go to New York, where definite announcements can probably be made of the plans of the promoters of the new road.
