KRYPTOK LENSES

What are Kryptok Lenses?

Kryptok lenses are an improved form of double vision glasses. By a cleverly constructed method, two kinds of glass are fused together. Thus, oiling and distant portions are so combined that there is absolutely no dividing line for the eye to take the tans.

These lenses are an immense improvement over the ordinary spectacles. They are made exclusively for those who have been fitted with glasses, and are of the same strength as those prescribed by the optometrist. They are an improvement over the ordinary spectacles in that they do not require the patient to remove them while standing over the glasses. When the patient is standing over the glasses, he can read clearly and distinctly.

DULL THROBBING OR VIOLENT HEADACHES

Don't suffer. Get a skilled physician at St. Joseph's Hospital to prescribe the right kind of medicine. You may have a Dr. James Steedman, 700 Market Square, Harrisburg, who will give you the proper medicine.

Are Your Corsets Perfectly Satisfactory?

REJECT THE FRAUDS

Unfortunately many custom and made-to-
order corsets are made to measure as custom made. We give you a sign guarantee that your custom made corset was de-
signed solely for you by one of our skilled designs. We agree to forfeit $1000 to any one proving the contrary.
