Another Valuable Inven-
tion.

CATE'S BACK-SUCTION PREVENTOR FOR
OIL WELLS, patented August 15, 1871, which en-
 tirely prevents the ingress of air in oil wells, while
 the tubing is being drawn. It is a well known fact
 to oil operators, that upon wells where Gas Pumps
 are used it is necessary to preserve as nearly a per-
 fect vacuum as possible, and that no air should be
 let into the well, at any time, when it can possibly
 be avoided; consequently, whenever the tubing is
 drawn from a well it is the cause of great injury to
 it, as the stuffing box, being then necessarily open-
 ed, the air immediately rushes back between the
 tubing and casing, into the well going into the oil
 rock and gas veins, and consequently causing the
 oil and gas to rush back to a great distance. So
 much so, that it almost always takes several days
 after pumping is resumed for a well to be brought
 back to its former condition, and oftentimes it takes
 several weeks; and quite frequently wells have been
 almost completely ruined by the air being thus let
 in while drawing tubing.

The BACK-SUCTION PREVENTOR is attached
 to the stuffing box and works in such a way that it
 completely shuts up the space between the stuffing
 box and tubing so effectually that not a particle of
 air can get through at any time while the tubing is
 being drawn and replaced. It supplies a want long
 felt, and is, without question, one of the most val-
 uable inventions of the day, to those engaged in the
 oil business. No well should be without it, as it of-
 ten times saves ten times its cost by once using.
 It is manufactured at the **FOUNDRY AND**
MACHINE SHOP OF ANDREWS & CO., TIDI-
QUETE, PA., and for sale by Hardware Dealers.
 Tidouete, Pa., March 28, 1872.—Law Sin.

FOR SALE
CHEAP.
