Work on the long hoped for electric road through town was commenced early yesterday morning. In addition to the force of day laborers a night gang will be put on to push the work as rapidly as possible. The officials expect, if everything goes well, to have the road completed within two weeks. By noon the road was torn up as far as Pine street. The horse cars are permitted to run as far on each trip as the road remains unexcavated and will continue in this way until the new road is completed as far as Broad street. The trolley wire will be extended from the West End and the electric cars will be run to that point. The cobble stones taken from between the old rails are being piled along the west side of the street for the present. The space between the rails is being filled with dirt and will remain so for the present in order to allow it to become settled. The company will then pave with vitrified brick. When the borough is ready to pave the street the traction company will then pave the two feet on each side of the road as per their agreement with the borough.

I would like to testify that CUTIGURA is a reliable medicine to see my boy now; his complexion is as clear and smooth as can be. This is an unqualified testimonial, every child in this family.
