SAFE FARMING
Fight the Fly Pest

ONE of those fly diseases which has hitherto been a matter of the greatest importance in the life of every farmer is the horsefly. It has been estimated that there are more than 2,000,000 horseflies in the United States alone, and that they do more damage to the health of horses than any other insect. The horsefly is a voracious feeder, and its bite is very painful. The best way to get rid of horseflies is by the use of fly papers and fly traps. These are both very effective, and should be used in every farm.

The Fly Carries Disease and Death into Our Homes

There is no doubt that the fly is one of the most dangerous pests that can enter our homes. It is a carrier of disease, and can spread many diseases, such as typhoid fever, diphtheria, and tuberculosis. The best way to prevent the entry of flies into our homes is by the use of fly screens and fly curtains. These are both very effective, and should be used in every home.
