

At present we have six girls and four boys who are enjoying our sleeping porches.

We hope next year to have a daily P. M. Class on Hygiene and Practical Nursing, previously, we have been able to take but a short period each day for instructions, but having the work well organized and hoping to have some of our pupils now in training back next year, we anticipate work equal to that of the larger Hospitals in the institutions of learning.

HOUSEKEEPING.

This subject cover too great an area to be considered in a few words. To the inexperienced it might imply the cooking of three meals a day, making of beds and sweeping floors. However these three branches are of vast importance. But to the experienced, the old adage which says "man works from sun to sun, but woman's" work is never done, "has its full realization and the pupil is also awakened to the fact more so under the old methods where poor equipments and poor accommodations are encountered. As has been the case with this year's work. Giving me the impression that good equipments and modern conveniences and money spent for the same by pupils and parents, cannot be strongly encouraged. That these three choice words Mother, Home, and Heaven, which seem so closely associated with the home may have there full realization, where if good housekeeping is practiced by loving hands and under favorable condition in the home. However we have covered a large number of subject in the department this year. Teaching the baking of bread and rolls, cookies, pies, doughnuts, muffins, biscuits and plain cake, cooking meat in several ways, also potatoes in various ways and preparing simple light diet for the sick, laundry work, cleaning in its different branches, sanitation, domestic and personal household needlework such as rugs, bed comforts, heming table linen, hem stitching, feather stitching, simple imbroidery and infants clothing

LAUNDRY.

Our Laundry is equipped with two steam washers, an extractor, a mangle, a dryer, an ironing stove, sufficient flat irons, ironing tables
