

and such others simple utensils as are necessary to keep a laundry clean and sanitary and to do all kinds of simple laundry work.

During the past year four details of girls have been instructed in laundry work; making about seventy girls in all. The girls are taught how much water should be in washer, how clothes should be placed in washer, how much soap is necessary taking into account the kind of clothes being washed, how to place clothing in extractor, how to starch clothing, how to hang them on line or in dryer, how to mangle all flat work, how to sprinkle clothing as the ironing of clothing, also all minor details connected with the general washing and preparing of clothing for use. The girls who have been instructed in the Laundry the past year have shown a very good response to their instructor, thus equipping them to keep clothing sanitary when they return to their homes. The following girls are entitled to a place on the roll of honor for their work the past year:

Angeline Kills above, Lena Iron Tail, Fanny Helps, Susie White Coyote, Alice Running Walker, Nancy Yellow Wolf, Mary High Eagle, Dalia Yellow Wolf, Lucy White Bear, Mattie Bad Wound, and Lizzie Red Owl.

SEWING.

It is our aim in the sewing room, to teach girls, each subject in its turn, so thoroughly, that when she leaves here she can do these things not only for herself in her own home, but for others, if necessary. Of course this naturally must take time. For surely the girls are negligent about doing things as well as they can. It is not that they cannot do good darning, good mending and good sewing, but it is because they will not do it unless made to. However, this is not to be applied in all cases as we have girls who darn, mend and sew beautifully and are quite capable of doing these things alone. So we have the satisfaction of knowing, that the training the girls get in the sewing room is of wonderful help to them, because they do not forget it, and can do it if they will.

ENGINEERING.

The student on entering the engineering department is first put at such important work as wheeling coal, cleaning out ashes wip-
