Charcoal for Sick Cattle.

A correspondent in the Country Gentleman says that nearly all animals becomes sick from improper eating. In nine cases out of ten, the digestion is wrong. Charcoal is the most efficient, and rapid corrective. It will cure in a majority of cases, if properly administered. An example of its use—the hired man came in with the intelligence that one of the finest cows was very sick, and a kind neighbor proposed the usual drugs and poisons. The owner being ill, and unable to examine the cow, concluded that the trouble came from some over-eating and ordered a teacup of pulverized charcoal given in water. It was mixed, placed in a junk bottle, the head held upwards, and the water with its charcoal poured downwards. In five minutes an improvement was visible, and in a few hours the animal was in the pasture eating grass. Another instance of equal success occurred with a young heifer which became badly bloated by eating green apples after a hard wind. The bloat was so severe that the sides were almost as hard as a barrel. The old remedy, saleratus, was tried for purpose of correcting the acidity. But the attempt to put it down always caused coughing, and it did little good. Half a teacupful of fresh powdered charcoal was next given. In six hours all appearance of bloat had gone, and the heifer was well.

Action of Potash on Fruit Trees.

Dr. George B. Wood, in a communication to the American Philosophical Society, in Philadelphia, presented the result of certain experiments made by him upon the effects of salts of potassa when applied to grain and fruit producing soils. In his view, the depreciation of the productiveness of apple, peach and quince orchards is due to the exhaustion of potash from the soil. Several of such orchards, formerly very valuable, but which with a few years, ceased to bear much fruit, on being treated with an application of wood ashes to the roots of the trees, became completely revived, producing full crops the following year. A still more startling effect was seen in the second year, under a renewal of the application. He cited several other instances where the same results followed; in one case where an apple orchard planted on an old orchard's site, which had never bore fruit, was made to produce a good crop by the application of ashes.

Prepare io Plant Irish Potatoes.

During the present month of February potatoes should be planted for an early crop. The proper time for preparing the ground is in this month. Break up the ground at least a foot in depth with the plow or spade. This exposure of the soil to the frosts of this month will destroy the grub worms that are often destructive to this crop in the Spring. In February open furrows with the plow or spade at least ten inches deep, into which put three of manure, which may be fresh from the stables or cow pen, if no other be on hand. Put two or three inches of soil on top of the manure, when the trenches will be ready for the tubers. Fill up the trenches and make a low ridge on the top of the potatoes, which will give seven or eight inches of soil to protect them from freezing. If the Early Rose be the variety planted, they will ripen from the first of May to the middle of June, when they may be immediately planted for a second crop.

The Model Farmer.

Governor Hoffman in closing his agricultural address at Watkins, New York, gave his views of the model farmer:

We hear much of model farming and model farmers. He is a man that is cheerful, hospitable and kind to his neighbor, and to all men. He is kind to the dumb brutes and seeks to promote their welfare; he cherishes the little birds that devour the insects infesting his field, garden and trees. He keeps his farm in a good state of improvement so that it will yield an abundant increase, he sees that his farm buildings are in good repair and present a good appearance and that his place of abode generally shows neatness, thrift and contentment. He is religious, exercising a devout and reverent feeling towards God as the author, and bestower of all blessings. He is kind, indulgent to his workmen, laboring to promote their happiness and secure their co-operation. He is faithful to his engagements, and honesty, without grudging, to every man his due. Cherishing his practices, he is happy in himself and beloved by all who are capable of appreciating greatness or moral worth.

Spreadind Manure.

An exchange says: We think it a wrong practice, when hauling out manure in the fall or winter, to place it in heaps. It is better to spread it at once. In the first place labor is saved. But most important of all is the fact that much of the manure is wasted when placed in heaps. If spread at once, it is more equally divided than it can afterwards. We once hauled out manure on a field, leaving it in heaps until the hauling was completed. During this time some showers fell. The land was sown to oats next spring, and on the spot where the heap had been the grain lodged and was spoiled. The following crop was wheat, and on those spots the wheat rusted and yielded nothing, while the growth of straw was remarkable. We have never since repeated the practice.

Jackson and the Bravo.

It was while he was Judge that he arrested the notorious desperado, Bean, whom nobody else could arrest. Many of Bean's decendants are still living, and the place where old Hickory's eyes brought him down 's still pointed out.

As the story runs, Bean went away and left his family for two years. When he returned, his wife celebrated the event by presenting him with a new born babe. This was a new departure in domestic economy, and Bean did not accept the situation with very good grace. He demanded an explanation, and in the absence of a satisfactory one, he sharpened his knife and deliberately cut off both ears of the poor little baby, playfully remarking, as he did so, that he wanted to distinguish it from his own. Some thought this was an innocent proceeding a practicle joke on the baby, in fact, while others considered it an outrage, and should be punished. The Grand Jury took that view of the case and indicted Bean; Bean, as usual, brushed up his horse pistols, and said that they might indict, but they couldn't arrest him. The Sheriff tried it and was vanquished. Court came on, the criminal dockot was called, and the clerk reported Bean "not taken."

"What's the matter?" asked Judge Jackson of the Sheriff.

"Nothing's the matter, only I can't arrest him," replied the official.

"Then, by the Eternal! summon the county to help you, and bring him in here," thundered the Judge.

The Sheriff gathered up some citizens, and advanced on Bean. The latter backed himself up against a house to prevent a rear attack, drew his pistols and told them to come on. He was a centre shot, and to have advanced would have been certain death to some. No one cared to sacrifice his life in giving the others a chance to make a start. The Sheriff reported to Jackson that Bean could not be taken without a sacrifice of lives.

"By the Eternal! summon the Court!" thundered the irate Judge, and "the Court" was summoned.

Jackson refused arms, and advanced emty-handed and bearheaded upon Bean. His friends tried to restrain him, as he valued his life, but he heeded to them not. He kept his cold eyes fixedly upon the desperado, walked right up to him, jerked the pistol away, took him by the collar and marched him off to jail.

Answer to a Challenge.

The eccentric H. H. Breckinridge, one of the Judges of the Supreme Court of Pennsylvania, when a young man, was challenged to fight a duel by an English officer, whom he answered as follows:

"I have two objections to the duel matter—the one is lest I should hurt you, and the other lest you should hurt me. I do not see what good it would be to put a ball through your body. I could make no use of you when dead for any ordinary purpose, as I would a rabbit or a turkey. I am no canibal to feed on the flesh of men. Why, then, shoot down a human creature, of whom I could make no use? A buffalo would make better meat; for, though your flesh might be young and tender, yet it wants the firmness and consisteney which take and retain salt. At any rate it would not do for a long sea voyage.

'You might make a good barbacue, it is true, being of the nature of a raccoon or oppossum; but people are not in the habit of barbecuing anything that is human now. As to your hide, it is not worth taking off, being a little better than a two year-old calf.

"So much for you. As for myself, I do not like to stand in the way of anything that is hurtful. I am under the impression that you might hurt me This being the case, I think it the most advisable to stay at a distance. If you meant to try your pistols, take a tree or a barn door, about my dimensions. If you hit that, send me word, and I will acknowledge that, if I had been in the same place, you might have hit me."

The Crows.

Henry Ward Beecher says of crows: "Aside from the special questions of profit and loss, we have a warm side toward the crow, he is so much like one of ourselves. He is lazy, and that is human; he takes advantage of those weaker than himself, and that is manlike; he is sly, and hides for to-morrow what he can't eat to-day, showing a real human providence; he learns tricks much faster than he does useful things, showing a true boy-nature; he likes his own color best, and love to hear his voice, which are eminent traits of humanity: he will never work when he can get another to work for him, a genuine human trait; he eats whatever he can get his claws upon, and is less mischievous with a belly full than when hungry, and that is like man; he s at war with all living things except his own kind, and with them he has nothing to do. No wonder, then, that men despise crows, they are too much like men. Take off his wings, and put him in breeches, crows would make fair average men. Give men wings and reduce their smartness a little, and many of them would be good enough to be crows."

An Irishman, in writing a letter to his sweetheart, asking whether she would accept of his love or not, writes thus: "If you don't love me, send back the letter without breaking the seal."

The Mammoth Cave Outdone.

The Kansas City *Times* says several gentlemen recently explored a cave lately discovered in Southeastern Missouri. The entrance is through a volcanic fissure, seven feet wide by twenty feet in length, which at the distance of a hundred yards terminates in a room named by the explorers "The Bat Room," from the thousands of bats that swarmed within its dark and hidden recesses; they flew about in swarms, making a terrible noise in the arched roof above. This room has three sides, each with an aperture opening into smaller caverns or side rooms. Its dimensions are fifty by one hundred and thirty feet, the ceiling being about twenty feet from the floor. From this room a hall, four hundred yards in length, leads to a still larger room in the shape of a horse-shoe, which the explorers say nature must certainly have intended for a church, since the roof is arched in purely Gothic style, with dome and columns, and, to finish off and make it complete, a pulpit near the centre.

The walls of this magnificent cavern are one hundred feet high, but one of the most remarkable features about it is a fountain of pure water, four feet in diameter. Northward of this is a room sixty feet wide, and almost filled with glittering stalactites, which hang in curiously formed pendants from the roof. To the South of this is another room which should be named the "bottomless pit," since it apparently has neither bottom, sides, nor roof. The darkness within this place is appalling. Turning to the East the party walked a distance of about a quarter of a mile, when they came to a flight of natural steps, forty or fifty in number, terminating in a wide platform, the entrance to a mammoth hall, supported by Corinthian pillars of various thickness and endless in number, all white as snow and glistening as though studded with millions of diamonds. This hall is estimated to be two hundred feet in width, and communicates with a number of passages leading off in various directions, none of which have yet been explored.

Proceeding on their way the explorers found a river of running water, issuing no one knows whence, and going, no one knows where. It is about fifty feet wide and three feet deep. The party followed its course down stream to the falls, where the water goes roaring over a precipice into the darkness below.

Explorations on a lake showed that the noise was made by a huge waterfall, where the water falls a distance of fifty feet. The lake is circular in shape, and has no vissible outlet for water. There were eight or ten dark passages found upon the banks of the lake, leading in all directions, but the guide accompanying the exploring party lost his courage and refused to go further. The party were then about eight or ten miles from their starting point. They were in the cave forty-three hours.

Bad Habits.

Understand clearly the reason, and all the reasons, why the habit is injurious. Study the subject until there is no lingering doubt in your mind. Avoid the places, the persons, the thoughts that lead to temptation. Frequent the places, associate with the persons, indulge the thoughts that lead away from temptation. Keey busy. Idleness is the strength of bad habits. Do not give up the struggle when you have broken your resolution once, twice, ten times a thousand times. That only shows how much need there is for you to strive. When you have broken resoltions, just think the matter over, and endeavor to understand why it was you failed, so that you may be upon your guard against a recurrence of the same circumstances. Do not think it a little or an easy thing that you have undertaken. It is folly to expect to break off a habit in a day, which may have been gathering strength in you for years.

True Politeness.

A poor Arab going through the desert, met with a sparkling spring. Accustumed to brackish water, a draught from this sweet well in the wilderness seemed to his simple mind, a present to offer to the caliph. So he filled his leathern bottle, and, after a weary tramp, laid his humble gift at his sovereign's feet. The monarch, with the magnanimity that may put many a Christian to the blush, called for a cup, and filling it, drank freely; and, with a smile, thanked the Arab and presented him with a reward: The courtiers pressed eagerly around for a draught of the wonderful water, which was regarded as worthy such a princely acknowledgment. To their surprise the caliph forbade them to touch a drop. Then, after the simple-hearted giver left the royal presence, with a new spring of joy welling up in his heart, the monarch thus explained the motive for his prohibition.

"During this last journey, the water in this leathern bottle had become impure and distasteful; but it was an offering of love, and, as much, I accepted it with pleasure. I feared, however, that if I allowed another to taste it, he would not conceal his disgust. Therefore it was that I forbade you to partake, lest the heart of the poor man should be wounded."

To be always repining and complaining is unworthy of a man; but he who is endued with virtue and satisfied with his lot is truly rich and really good.

Ten Columns in a Nut-Shell.

A New England merchant, doing a large business, requiring several clerks, a short time since missed several articles of value from his store. He determined to watch the habits of these young men, to discover, if possible, which one, if either of them, was untrustworthy. There was one of them who appeared particularly active and faithful; his dress was inferior to that of the other clerks, and he was evidently not particularly popular among them. The merchant learned that this young man remained for half an hour or more after the others left, with the door of the store locked. This awakened his suspicions, and he arranged a plan to conceal himself in the store, so that he might discover what occurred when the clerk supposed himself to be unobserved. Having sent the young man on an errand just before the hour of closing, he entered his place of concealment. The door was locked as usual, at the proper time. The clerk at once begal to sweep and put the establishment in order. While waiting for the dust to settle, he was seen to go behind the counter, and taking something from beneath it, place it in the breast of his coat. The merchant was now alive to discover what had been taken, and what was to be done with it. The young man went to the window, and sat in silence a few moments, apparently examining the package which he had taken from his breast. The merchant was not long left in doubt. His clerk soon fell upon his knees. He saw that it was the Bible he had been reading. And now he offered aloud a simple and touching prayer for himself, his mother and sister, his employer, and particularly for a brother clerk, who, he feared, was yielding to temptation. After he had finished dusting he left the store, unconscious of having had a human eye upon him.

It is easy to believe that the merchant was deeply affected by what he had seen and heard. The clerk's salary was increased several hundred dollars a year, and he was given the position made vacant by the discharge of another, whose criminal acts had been discovered.

Letters of Recommendation.

A gentleman advertised for a boy to assist him in his office, and nearly fifty applicants presented themselves to him. Out of the whole number he in a short time selected one and dismissed the rest.

"I should like to know," said a friend, "on what ground you selected that boy, who had not a single recommendation."

"You are mistaken," said the gentleman; "he had a great many. He wiped his feet when he came in, and closed the door after him, showing that he was careful; he gave up his seat instantly to that lame old man, showing he was kind and thoughtful: he took off his cap when he came in, and answered my questions promptly and respectfully, showing he was polite; he picked up the book which I had purposely laid upon the floor, and replaced it on the table, while all the rest stepped over it or shoved it aside; and he waited quietly for his turn, instead of pushing and crowding, showing that he was orderly. When I talked with him. I noticed that his clothes were carefully brushed, his hair in nice order, and his teeth brushed; and when he wrote his name, I noticed that his finger nails were clean, instead of being tipped with jet, like that handsome little fellow's in the blue jacket. Don't you call those things letters of recommendation? I do, and I would give more for what I can tell about a boy by using my eyes ten minutes, than all the fine letters he can bring me."

How Wagner Got His Nymph.

Wagner, the great German Composer, has great influence with the King. The following incident is given to prove it:

The new opera of "Rheingold" was performed for the first time in Munich on the 27th of August, 1869. As in the case of the "Master Singers" the King donated an extraordinary amount to defray the expense of preparation. Wagner conceived the idea that his Rhine should not be personated by rolling, painted vanvass, but that a veritable stream of water must flow across the stage. Then came a dubious thought; as the scene requires a nymph to swim from one rocky shore to the other by the light of a setting sun, who was to do it. The part was to be taken by Fraulein Millinger, and Wagner hit upon the brilliant idea of causing the King to order the lady to take swimming lessons.

Sore Eyes.

The following receipt for the cure of inflamed eyes is given: "Take a potatoe, and after quartering it, grate the heart as fine as possible, and place the gratings between pieces of cambric muslin. Place the poultice over the eyes inflamed, and keep it there fifteen minutes. Continue the operation three successive nights and a perfect cure ensues." It is worth trying by those afflicted with sore eyes.

Quite recently a coroner's jury in Connecticut where deliberating over the body of a man whose predelection for strong drink had brought him to a quiescent state, and they had just concluded to bring in a verdict of "delirium tremens," when the supposed defunct rose to a semi-recumbent posture and playfully exclaimed, "Here's one of yer jury as votes 'No.'"

The light of friendship is like the light of phosphorus; most plainly seen when all around is dark.

Radway's Ready Relief

Cures the worst pains

IN FROM ONE TO TWENTY MINUTES

Not One Hour after reading this advertisement need any one suffer with pain.

RADWAY'S READY RELIEF is a cure for every pain.

It was the first and is

THE ONLY PAIN REMEDY

that instantly stops the most excruciating pains, allays Inflammations, and cures congestions whether of the Lungs, Stomach, Bowels, or other glands or organs, by one application.

In from ONE to TWENTY minutes.

no matter how violent or excruciating the pain the Rheumatic, Bed-ridden, Infirm, Crippled, Nervous, Neuralgic, or prostrated with disease may suffer,

RADWAY'S READY RELIEF

Will afford instant ease.

Inflammation of the kidneys, Inflammation of the Bladder.
Inflammation of the Bowels. Congestion of the Lungs.
Sore Throat, Difficult Breathing. Palpitation of the Heart.
Hysterics, Croup, Diptheria. Catarrh, Influenza.
Headache, Toothache. Neuralgia, Rheumatism.
Cold Chills, Ague Chills.

The application of the Ready Relief to the part or parts where the pain or difficulty exists will afford ease and comfort.

Twenty drops in half a tumbler of water will in a few moments cure Cramps, Spasms, Sour Stomach, Heartburn, Sick Headache, Diarrhea, Dysentery, Colic, wind in the bowels, and all internal pains.

Travelers should always carry a bottle of Radway's Ready Relief with them. A few drops in water will prevent sickness or pains from change of water. It is better than French Brandy or Bitters as a stimulant.

FEVER AND AGUE.

Fever and Ague cured for 50 cents. There is not a remedial agent in this world that will cure Fever and Ague, and all other Malarious, Bilious, Scarlet, Typhoid, Yellow, and other fevers, (aided by Radway's Pills) so quick as Radway's Ready Relief. Fifty cents per bottle.

Health! Beauty!!

Strong and pure rich blood—increase of flesh and weight—Clear skin and beautiful complexion secured to all.

DR. RADWAY'S Sarsaparillian Resolvent has made the most astonishing cures. So quick, so rapid are the changes the body undergoes, under the influence of this truly wonderful medicine, that every day an increase in flesh and weight is seen and felt.

THE GREAT BLOOD PURIFIER. Every drop of the Sarsaparillian Resolvent communicates through the blood, sweat, Urine, and other fluids and juices of the system the vigor of life, for it repairs the wastes of the body with new and sound material. Scrofula, Syphilis, Consumption, Glandular Diseases, Ulcers in the throat and mouth, Tumors, Nodes in the glands and other parts of the system, Sore Eyes, Strumerous discharges from the ears and the worst forms of Skin diseases, Eruptions, Fever Sores, Scald Head, Ring Worm, Salt Rheum, Erysipelas, Acne, Black spots, Worms in the Flesh, Tumors, Cancers in the Womb, and all weakening and painful discharges, Night Sweats, Loss of Sperm, and all wastes of the life principle, are within the curative range of this wonder of modern chemistry, and a few days' use will prove to any person using it for either of these forms of disease, its potent power to cure them.

If the patient, daily becoming reduced by the wastes and decomposition that is continually progressing, succeeds in arresting these wastes, and repairs the same with new material made from healthy blood—and this the Sarsaparillian will and does secure—a cure is certain; for when once this remedy commences its work of purification, and succeeds in diminishing the least wastes, its repairs will be rapid, and every day the patient will feel himself growing better and stronger, the food digesting better, appetite increasing and flesh and weight increasing.

Not only does the Sarsaparillian Resolvent excel all known remedial agents in the cure of Chronic, Scrofulous, Constitutional and Skin diseases, but it is the only positive cure for Kidney and Bladder complaints, Urinary and Womb diseases, Gravel, Diabetes, Dropsy, Stoppage of Water, Incontinence of Urine, Bright's Disease, Albuminuria, and in all cases where there are brick-dust deposits or the water is thick, cloudy, mixed with substances like the white of an egg, or threads like white silk, or there is a morbid, dark, bilious appearance, and white bone-dust deposits, and when there is a pricking, burning sensation when passing water, and pain in the small of the back and along the loins.

Dr. Radway's Perfect Purgative Pills Perfectly tasteless, elegantly coated with sweet gum, purge, regulate, purify, cleanse and strengthen. Radway's Pills, for the cure of all disorders of the Stomach, Liver, Bowels, Kidneys, Bladder, Nervous Diseases, Headache, Constipation, Costiveness, Indigestion, Dyspepsia, Biliousness, Bilious Fevers, Inflammation of the Bowels, Piles, and all derangements of the Internal Viscera. Warranted to effect a positive cure. Purely Vegetable, containing no mercury, minerals or deleterious drugs.

Constipation, Inward Piles, Fullness of the Blood in the Head, Acidity of the Stomach, Nausea, Heartburn, Disgust of Food, Fullness or Weight in the Stomach, Sour Eructations, Sinking or Fluttering at the Pit of the Stomach.

A few doses of Radway's Pills will free the system from all the above named disorders Price, 25 cents per Box. Sold by Druggists.

Read "False and True." Send one letter stamp to Radway & Co., No. 87 Maiden Lane, New York. Information worth thousands will be sent you. jy6'71-1y

IT LEADS TO HAPPINESS

A Boon to the Whole Race of Woman!

DR. J. BRADFIELD'S

Female Regulator!

IT WILL bring on the menses; relieve all pain at the monthly "Period;" cure Rheumatism and Neuralgia of Back and Uterus; Leucorrhœa or "Whites," and partial Prolapsus Uteri; check excessive flow, and correct all irregularities peculiar to ladies.

It will remove all irritation of Kidneys and Bladder; relieve Costiveness; purify the blood; give tone and strength to the whole system; clear the skin, imparting a rosy hue to the cheek and cheerfulness to the mind.

It is as sure a cure in all the above diseases as Quinine is in Chills and Fever.

Ladies can cure themselves of all the above diseases without revealing their complaints to any one, which is always mortifying to their pride and modesty.

It is recommended by the best physicians and the clergy.

LAGRANGE, GA., March 23, 1870.

Bradfield & Co., Atlanta, Ga.—Dear Sirs:—I take pleasure in stating that I have used for the last twenty years the medicine you are now putting up, known as Dr. J. Bradfield's Female Regulator, and consider it the best combination ever gotten together for the diseases for which it is recommended. I have been familiar with the prescription both as a practicioner of medicine and in domestic practice, and can honestly say that I consider it a boon to suffering females, and can but hope that every lady in our land, who may be suffering in any way peculiar to their sex, may be able to procure a bottle, that their sufferings may not only be relieved, but that they may be restored to health and strength.

With my kindest regards, very respectfully,
W. B. FERRELL, M. D.

NEAR MARIETTA, GA. March 21, 1870

Messrs. Wm. Root & Son.—Dear Sirs:—Some months ago I bought a bottle of Bradfield's Female Regulator from you, and have used it in my family with the utmost satisfaction, and have recommended it to three other families, and they have found it just what it is recommended. The females who have used your REGULATOR are in perfect health, and are able to attend to their household duties, and we cordially recommend it to the public. Yours respectfully,
Rev. H. B. JOHNSON.

We could add a thousand other certificates; but we consider the above amply sufficient proof of its virtue. All we ask is a trial.

For full particulars, history of diseases and certificates of its wonderful cures, the reader is referred to the wrapper around the bottle.
