

The Dixie School

COOKEVILLE, TENN.

Preliminary and Organization Term

CENTRAL COLLEGE BUILDING
SOON TO BE OCCUPIED

MATRICULATION BEGINS JANUARY 5, 1912
CLASS-ROOM WORK BEGINS JANUARY 9, 1912

Location of Work

For a short while, and until the elegant three story brick, on the Dixie Campus can be occupied, the school will be conducted in comfortable, though improvised, quarters. A large and comfortable two story frame near the City School Building will be used as an office and recitation room for the Principal, and as a dormitory for young men, accommodating about twenty for permanent lodging.

Organization and Courses of Study

This folder is too limited to enter upon a discussion of the school organization and the courses of study further than to say that the basic ideas of the Dixie College organization will prevail:—namely, an Academy, a Junior College, and a Senior College. Students can get studies in almost any work of a college curriculum desired. Special work for teachers, including the State Reading Circle Course will be offered. And college credits will be granted for all the work which is efficiently done during this term. All students should see the faculty in the office at the Elrod Building and carefully work out a course of study and get whatever credits you are really entitled to have from work already done.

A Demonstration Farm

Capt. T. F. Peck, Commissioner of Agriculture of the State of Tennessee, recently met the Board of Directors of The Dixie School, the result of which meeting was an arrangement to begin the work of a Demonstration Station immediately after the opening of school in 1912. The Farm will be under the auspices of the Dixie School, and the work will be done by the students, those working their way in school. The Director and Instructor in Agriculture will be furnished by the Federal government. This fact alone will be worth the price to the farmers and the farmer's boys. The Dixie School administration feels that the movement

for better farming and intelligent home making will work a revolution in utilizing the resources and awakening industrial interests and increasing commercial values. Send us your boys at once, and let us begin the work now.

Expenses

Tuition for this, the opening term, will be only \$3.50 per month, payable in advance, by cash or good note. Board can be secured at rates from \$10.00 to \$12.50 per month, in splendid homes. The Dormitory above mentioned will accommodate about twenty young men. A member of the faculty will preside over the building constantly, which secures the best protection and saves expenses. Boys will take their meals out at private homes. If you have a son you would like to put in the care of the faculty both day and night, let us know at once.

Why Seek College Training?

It is known that the earning capacity of college bred men and women is about three hundred times greater than those who have no college education. People with college training have several hundred chances to one to rise to eminence and distinction. Friendships formed in college are, as a rule, the best and of the most helpful character in after life. Colleges are sources of mutual culture. The college is a means of self-discovery, enabling the student to know what his powers are and what course in life is best for him to pursue. Nothing in life can take the place of the student's daily contact with earnest and cultured instructors. A pure and wholesome college atmosphere filled with the college spirit appeals to the greatest there is in a youth, and the inertia drives him to nobler ambitions and purposes. Do you, my young friends, appreciate and desire the powers and privileges of a liberal education? There is a career of usefulness and success awaiting you. The only difficult part of "Going up" in life is in making up your mind to start.

The Dixie School enters the field of educational service, as an opportunity to the youth and a benefaction to the country. Give us a chance to help you in the upward struggle.
