### FEDERAL EXPERT DESCRIBES ARMY WORM AND WORK

MOST PRACTICABLE METHOD OF STOPPING THEM IS BY TRENCHES.

#### FOUR OR FIVE GENERATIONS YEAR

Small Worm About one and One Half Inches Long—Hatched Most Frequently in Barley Fields, Spreads When Food Supply Gets Short.

There has been so much devastation and destruction wrought of late in this county by the dreaded army worm that it has become a serious menace in the hot, dry spell that has existed for the past month. The following article by a government expert, Prof. George G. Massey of the United States department of agriculture, is a timely one, which may be of assistance to the farmers of this county in their fight against the dreaded pest.

Directly and indirectly reports in increasing numbers have been reaching this laboratory for the past few

days of a severe outbreak of the army worm throughout all this section of the state and perhaps of wider extent. Apparently the worms are just beginning to move from the barley fields, where they have been growing, to neighboring wheat and corn fields, and the damage is likely to be serious unless prompt measures are taken to stop the advance of the worms into fields which are not yet infested.

"Army worms are present in greater or less numbers every year, but it is only when they are abundant enough to exhaust the food supply in the fields in which they started and are forced to seek new pastures that they ordinarily attract attention or do serious injury. The eggs from which the worms come are laid in the fall by a common yellowish-brown moth, often seen around lights in the evening. The little worms coming from these eggs live over winter in the fields, feeding slowly during the warm days. As soon as spring comes they feed ravenously, choosing grasses and grains in preference to all else. Full growth is reached about the latter part of May or the first of June, and they are then about an inch and a half long. At this point they cease feeding and enter the ground, forming a little earthen cell just below the surface and change to a pupa, a motionless brown object. From this in about two weeks comes the adult moth. Within a few days the moths lay eggs which hatch into another generation of worms. In this state there are probably four or five generations of this insect each season. Ordinarily not more than one of the generations is of much interest to the farmer, for their natural enemies and parasites so quickly attack them that their numbers are reduced before the army can develop the second time.

"After the army is once on the move there are few things that can be done to stop its progress. The most practicable of these, probably, is the construction of a trench with a perpendicular or overhanging side toward the field to which they are traveling. The plow should be run twice in the same furrow. The lost dirt shoveled out of the bottom and if necessary the straight side made more perpendicular or overhanging with a spade. The worms will crawl into the furrow, and, being unable to climb the steep side, will fall back to the bottom and crawl along it. They can be killed by dragging a log in the furrow or by spreading straw along and burning it. Perhaps the best way is

### YOU NEED SAFE INSURANCE

HENDLEY, COCHRAN & THOMAS

to dig post holes in the bottom of the furrow as often as necessary and when these are full of the worms pour a little coal oil over them. If this method is followed carefully and the trench kept in good order, the cost will be very much less than the value of the crop which will be destroyed in a very short time if they are allowed to move unhindered. Poisoning is seldom practicable.

"More permanent methods of control of the army worm and other insect pests which should be followed on every farm are fall plowing, clean cultivation and especially the destruction of the weed, grass and bushes along the lanes and fence rows during the fall and early winter. Perhaps nine out of every ten insects which cause the farmer trouble spend the winter in such places which the farmer himself has very kindly supplied for their use."

### NEGRO MAN SHOTS WOMAN BY MISTAKE

GEO. HINES THOUGHT 17 YEAR OLD GIRL WAS HIS WIFE—ACCIDENT NOT FATAL.

George Hines shot Ernestine Webster, a seventeen year old girl, near the ice factory Saturday night. Hines had had a quarrel with his wife and was waiting at home for her to come back. Seeing the Webster girl coming he mistook her for his wife and fired at her several times. One of the shots took effect in her shoulder. It was not fatal.

### STRONG ADVOCATE SERUM TREATMENT

One of the most enthusiastic advocates of the serum treatment for hog cholera in Maury county is J. B. Farmer, of Wilkes Place, Culleoka. Mr. Farmer recently discovered a sick hog in his big drove and he immediately had seventy treated with the serum with the result that he has not lost a hog and says that not one of them has been off feed for a single meal.

### OFFICIAL RESULT AT MT. PLEASANT

ELECTION RETURNS ARE CANNVASSED BY THE COUNTY COMMISSIONERS.

Official returns of the recent municipal election at Mt. Pleasant were canvassed by the commissioners of election today, Messrs. Kannon and Brooks being present. The result did not differ from the unofficial report heretofore published. Certificates of election of William J. Howard, R. M. Bullock and Edmund Ligon were duly signed by the commissioners and transmitted to Recorder C. C. Ross, of Mt. Pleasant.

The following was the official vote: First ward, W. J. Howard, 208; Mumford Smith, 116; at large, R. M. Bullock, 216; Edmund Ligon, 211; J. E. Anderson, 122; Joseph W. Howard, 114.

### CULLEOKA BEATS MOORESVILLE

TRIMS MARSHALL COUNTY BOYS BY 2 TO 1 SCORE SATURDAY AFTERNOON.

In a hotly contested game the Culleoka team beats the Mooresville nine Saturday afternoon by a score of 2 to 1. The feature of the game was the pitching of Cross, of Culleoka, who struck out twenty men and allowed only three hits off of his delivery.

Culleoka got six hits, one of which was a two bagger by Flem Thomas, which scored one of the Culleoka runs.

The game was played at Mooresville. There was a large crowd in attendance, and much interest and enthusiasm was displayed.

Wake up your liver. A lazy liver brings on the worst of diseases. Take LIV-VER-LAX now. — STEPHENSON BROS. (Adv't.)

### DEAD HENS AND BAD EGGS ARE INJURING FISHING GROUNDS

CLAIMED THAT THEY ARE BEING THROWN INTO RIVER BELOW THE CITY.

#### HAVE CAUSED VERY FOUL ODOR

Penalty for the Offenders Ranges as High as Six Months on the County Road and No Limit to the Fine. Grand Jury May Take Action.

Complaint has been made recently that the river below the city is polluted with all manner of dead fowls, rotten eggs and other nauseous things that are making it exceedingly unpleasant to those who fish upon the classic Duck.

The Izaak Walton are putting up a strenuous kick against this open defiance of the law, as it is a misdemeanor in this state to throw such refuse and garbage into any running stream. They state that the river is covered with old hens and bad eggs that are floating down the stream. They give a pretty strong odor, that takes away some of the pleasure of angling.

The penalty for those who are found guilty of violating this statute is variable, ranging as high as six months in the work house and any fine in the judgment and discretion of the jury. It would go hard with some of the guilty ones if they are summoned before the grand jury. The latter is in session at present, and it is not improbable that the members thereof will look into this public nuisance.

It is a great pity that some, whether wittingly or unwittingly, are destroying the only fishing grounds that are close to the city, on which the majority of the lovers of the piscatorial tribe may angle.

Is your liver inactive? LIV-VER-LAX will wake it up.—STEPHENSON BROS. (Adv't.)

### ROBERT E. THOMAS HEADS ASSOCIATION

RESOLUTION TO TEACHERS AND PROF. GRAHAM FOR THEIR WORK IN INSTITUTE.

Just before adjournment at noon Saturday, the teachers in the county institute organized a school improvement association. Robert E. Thomas was chosen president, Mr. Overton, vice president, and Miss Meroney, secretary and treasurer.

Resolutions of thanks to the instructors who had taught in the institute and to Mr. Graham, the county superintendent, were passed unanimously.

Always Lead to Better Health. Serious sicknesses start in disorders of the stomach, liver and kidneys. The best corrective and preventive is Dr. King's New Life Pills. They Purify the Blood—Prevent Constipation, keep Liver, Kidneys and Bowels in healthy condition. Give you better health by ridding the system of fermenting and gassy foods. Effective and mild. 25c. at your Druggist.

Buglen's Arnica Salve for All Hurts. (Adv't.)

### BANKERS HONOR NASHVILLE MAN

P. D. HOUSTON, OF THIS CITY, IS ELECTED PRESIDENT OF TENNESSEE ASSOCIATION.

CHATTANOOGA, Tenn., May 30.—The Tennessee Bankers' Association in its closing session here today, elected the following officers: President, P. D. Houston, Nashville; vice president, East Tennessee, W. N. McGill, of Madisonville; vice president, Middle Tennessee, S. S. McConnell, Lewisburg; vice president, West Tennessee, R. L. Goolsby, of Greenfield; chairman of the executive council, S. T. Jones, of Sweetwater.

Members of the executive council to serve three years, C. A. Lyerly, of Chattanooga; J. T. Brandon, of Dover, and A. R. Dodson, of Humboldt; treasurer, W. H. Featherstone, of Decherd.

### FIRST FREIGHT SENT THROUGH CANAL

NEW YORK, May 29.—The steamer Colon, which arrived today from Cristobal, brought the first freight that came through the Panama canal.

The cargo consisted of 21,000 sacks of sugar, and was towed through the canal on barges. It is the first cargo to pay through freight.

### FIRE DESTROYS AN ENTIRE FIELD OF SPLENDID WHEAT

FLAMES SWEEP THROUGH FIFTEEN ACRES OF THE THOS. J. CAYCE FARM.

#### YOUNG CLOVER IS KILLED ALSO

Required Vigorous Efforts to Check the Conflagration Even After the Grain and Stalks Had Been Consumed—Was on Fine Land.

Some idea of the extreme dryness of the country will be gained when it is stated that on Friday afternoon fire completely destroyed a fifteen acre field of fine wheat on the farm of Thomas J. Cayce, in the Zion section. The fire went through the field just like a forest fire in the West.

The wheat grain is still in the field but it is ruined. The stalks near the ground were all burned and the clover that was sown this spring was absolutely destroyed.

Wheat begins to mature at the ground. The stalk first begins to get ripe and ripens upward until the grain is reached which is the last part of the plant to mature. The stalks near the ground made excellent fuel for the flames.

For a time it took Jubious for the house, barn and other improvements on the place, but vigorous action checked the flames when they spread through the wheat. It is estimated that the field of wheat would probably have made an average of thirty bushels to the acre, as it was on extra good land. The railroad company, of course, will have to pay the damages done by the fire.

#### Don't Lose Sleep Coughing at Night.

Take Foley's Honey and Tar Compound. The very first dose surprises you. It glides down your throat and spreads a healing, soothing coating over the inflamed tickling surface. That's immediate relief. It loosens up the tightness in your chest, stops stuffy wheezy breathing, eases distressing, racking, tearing coughs, soothes the irritated, inflamed bronchial tubes and air passages. Children love it. It is mildly laxative—as a cough medicine should be, and does not upset or distress the most sensitive stomach. Refuse any substitute. Contains no opiates.—WOLDRIDGE CO. (Adv't.)

### CRITICISM IS NOT JUSTIFIED

ONLY NINE TRANSIENT VAGRANTS ARRESTED IN THREE MONTHS SAYS SHERIFF.

According to Sheriff Godwin there have been just nine transient loafers or vagrants from other places sent to the county work house since March 1. He stated that the criticism of the officers for "wholesale" arrest of vagrants was not justified and that an examination of the records would prove this to be the case. In the case referred to in Friday's Herald Sheriff Godwin said that the young man was arrested on the complaint of a farmer living near Columbia who telephoned that two boys were lying around his place and that when arrested one of the party had a pistol on his person. The sheriff stated emphatically that his deputies were not responsible for any alleged "wholesale" sending of men to jail for being poor.
