

LOCAL.

W. C. Hill was in Whitwell Tuesday. Jerry Fulmer went to Whitwell Tuesday. Sherman Smith, of Victoria, was here Sunday. Dock Burnett went to Jasper Saturday evening. J. D. Lewis, of Caroline Chapel, was here Monday. Born to Mr. and Mrs. Jerry Fulmer last week, a girl. Donald Pryor went to South Pittsburg Sunday afternoon. Millard Layne of Whitwell, was on the train going to Bridgeport Tuesday. Miss Davidson, of Whitwell, visited Mrs. John Condra from Saturday until Tuesday. Marie, the little daughter of Mr. and Mrs. S. R. Mosier is very ill with typhoid fever. Mrs. Roy Smith and little daughter returned Monday evening from a visit to relatives at Victoria. Miss Clara Lawson, of Birmingham, Ala., is the guest of Mrs. Will Harris, arriving Monday evening. Mr. F. C. Patrick, of Whitwell, and Miss Clara Hutson, of Victoria, were visitors at the Blowing Spring Sunday. Thos. McCormack, of Buchner, Ills., has been visiting relatives in the valley. They left on their return to Illinois yesterday. Mrs. Tilman Walker of Dunlap, was the guest of Mrs. John Condra over Sunday, attending the meeting being conducted by Rev. Moody. Miss Eliza Martin went to Battle Creek, Sunday to attend the Baptist foot-washing. She was accompanied by Bud Jackson, of Whitwell. Rev. W. D. Dew and Prof. J. R. Hackworth, of Jasper, were here to invade the fish of Little Sequachee River to come their way Saturday. Mr. and Mrs. Chas. Randle and little son, of Whitwell, and Miss Ruth Cannon, of Victoria, were here Sunday visiting Mrs. Mary Randle and family. Eugene Smith, of Dunlap, is convalescing from the fever, so we understand. "Gene" has lots of friends down this way who regret to hear of his illness. The series of meetings in the tent near school house, conducted by Rev. Moody, a preacher of the Church of Disciples, still continues with good attendance, and some interesting sermons are being preached. Mr. and Mrs. H. M. Minnis, Mr. and Mrs. Hester, Mr. and Mrs. Cameron, and others from South Pittsburg, formed a jolly party that came up from South Pittsburg Sunday and spent the day at the Blowing Spring. It is reported here that work on the Durham Coal & Iron Co.'s railroad up Little Sequachee Cove will commence soon after August 1st. This is not official, but merely a report, and we do not vouch for its accuracy. It is to be hoped, however, that this long-delayed work will start then. Quite a number of Whitwell gentlemen, among them J. H. Northcutt, C. A. Rigby and S. L. Rogers, stopped at the Blowing Spring Monday, returning from Jasper where they had been to purchase horses, a carload of them having been brought in. They invested in seventeen out of twenty-seven on the grounds, which was buying horse stock some.

Saved Girl's Life
"I want to tell you what wonderful benefit I have received from the use of Thedford's Black-Draught," writes Mrs. Sylvania Woods, of Clifton Mills, Ky.
"It certainly has no equal for la grippe, bad colds, liver and stomach troubles. I firmly believe Black-Draught saved my little girl's life. When she had the measles, they went in on her, but one good dose of Thedford's Black-Draught made them break out, and she has had no more trouble. I shall never be without
THEDFORD'S BLACK-DRAUGHT
in my home." For constipation, indigestion, headache, dizziness, malaria, chills and fever, biliousness, and all similar ailments, Thedford's Black-Draught has proved itself a safe, reliable, gentle and valuable remedy.
If you suffer from any of these complaints, try Black-Draught. It is a medicine of known merit. Seventy-five years of splendid success proves its value. Good for young and old. For sale everywhere. Price 25 cents.

Caroline Chapel.

Special to the News.
Well, kind editors, as "Old Joe" is still among the living, and matters of importance are happening most every day and he feels very anxious on some matters that are going the rounds, he thought he would pencil a few thoughts from his way of looking at some things. The one thing that seems the most paramount on his mind at this crisis is pertaining to our public schools. We certainly are or should all be very much interested in matters of education, for the time has come when a boy or girl is turned out in this cold world to battle for their own selves without an education, that they are so heavily shackled with ignorance, that they are almost a perfect failure, and are as a rule no use or benefit to this country, only to become "slaves" to those that have been more favorably blessed with the great opportunities and privileges that have been given them, or in other words, that they have grasped, while they had the opportunities. We have no excuse now to grow up in ignorance as the big-hearted men of our great state have looked over the great fields stocked with the poor of our land, and considered their poverty and their meager opportunities to acquire the knowledge that they were entitled to, or deserved. They lay great and successful plans to bring us up out of this quagmire of ignorance, and place us on more successful and higher planes, and now after all this, do we grasp the privilege and opportunities as we should? I say "Nay, verily." I say it is a burning shame to see the great masses of the people of this country (especially the people of Marion county) so little concerned and so careless about such an important matter as the education of our children. Almost every Legislature of our great state enacts laws for the purpose of bettering our state and county in the way of education. They legislate more money to be used for the education of the poor, and how unappreciative we are for their great love and sympathy for us.

It will be only a very short time until our country schools open up, the first Monday in August, and we do hope that all parents and patrons of our schools will properly assert themselves and discharge their whole duties as parents and patrons and make our schools a grand success. Parents, do you know that the failures that we suffer every year, you are principally responsible for? If you don't do your duty in the way of encouraging your children at home you need not expect them to succeed. It leaves the teachers powerless. You lay a solid, firm foundation, and then the teachers will have something steadfast to build upon. Notice children who succeed and you will find children that have had the proper training at home. First, start your children right and then it will be but little trouble to keep it right, and bring the child up in the way it should go.

On the other hand, see a child that is unruly, disobedient and contrary in school, and follow that child home, and you will soon find the cause. Parents, for your children's sake and that they may prove an honor to you in your old days, and more that they may be able to call you blessed, train them right. Do not lay bad examples for your children to follow and then curse and abuse the teachers when they have to reprimand them in school for the very things you have inculcated and distilled into their very lives and into their little innocent hearts or minds. Oh, what a great mistake we do sometimes make and then throw the blame on some one else. Oh, what a sad mistake. Well, I guess I have said enough on

Letter From "Cold Wave"
Well, the old lady set a hen on guinea eggs and they hatched, and the old hen sued the old lady for damage. One is white, two spotted and the others all sorts of colors. She set another hen and went out to feed and water the hen on the nest, and the hen pecked her. The old lady flew mad and beat the old hen with a piece of stove wood, and mashed all the little chick's bills perfectly flat. When they start off to the branch they holler, "Quack, quack," so the old lady is in a bad fix.
We are suffering for rain. We have had none since it quit.
We have salt meat soap to soak our potatoes in. We have beans as long as you can wander in Kentucky.
K. D. C. I have only one chicken left from the Silver Winged Wyandotte setting of eggs you sent me and I raised him a pet. The rest died, but come up, we have plenty of Plymouth Rocks to fry.
What has become of W. D. C., the bachelor trapper and turkey killer. I don't ever hear from him or John Curtis, the Whitwell coal digger.
Cold Wave.

OVERTURNED BUGGY RETURNING FROM CHURCH
While W. C. Moore and daughter, of Caroline Chapel, were returning from the meeting here Tuesday night their buggy was overturned by running into a one bank. The horse, however, did not run away, and Mr. Moore and daughter escaped with several bruises and scratches. It was a close call from a serious accident.

GREATEST OF ALL

Land Show at Conservation Exposition Will Set a New Mark

WHAT A BUSINESS MAN SAID

Nothing Like Display in This Department of Big National Exposition Ever Has Been Attempted in the Country Before—Lessons for Farmers.
E. D. Stratton, land and industrial agent of the Cincinnati, New Orleans & Texas Pacific and the Alabama Great Southern railroads, paid his first visit a few days ago to the grounds upon which the big National Conservation Exposition will be held in Knoxville from September 1 to November 1 of the present year. He went to Knoxville with a party of other railroad men. After his visit to the grounds, after he saw what had been done and what was being done in preparation for the exposition, he expressed himself in this wise:
"To say that I was most favorably impressed would be to put it mildly. I had no idea that such a site for an exposition could be found anywhere in this country. I had no idea of the extent and character of the buildings already up, and I was delighted to see such good progress being made in the erection of the big new buildings."
"Will your roads be represented by a land exhibit?" he was asked.
"They will," he replied, positively. "They could not afford to be unrepresented."
This was a hard-headed man of business speaking. He had seen. That was enough for him. His decision was made.

Greatest of All Land Shows.
At this early date this statement can be made positively and without fear of contradiction:
THE LAND SHOW AT THE NATIONAL CONSERVATION EXPOSITION IS GOING TO BE, NOT ONLY THE GREATEST LAND SHOW EVER SEEN IN THE SOUTH, BUT THE GREATEST LAND SHOW EVER SEEN ANYWHERE IN THE UNITED STATES.
Land primarily is the basis of all wealth. Much has been learned about land in recent years, many lessons of incalculable benefit to the tillers of the soil have been taught. Many lessons remain to be learned; there is still much in the land and in the methods of its best cultivation still to be taught. Land shows are, comparatively speaking, a new institution. They have done much to educate the people.
The conservation of the soil of the United States is one of the greatest projects undertaken in this twentieth century of progress.
And the Land Show at the National Conservation is going to exemplify the most advanced thought along these lines.
Building is All Ready.
The new Land Building on the beautiful exposition grounds of the National Conservation Exposition is completed. It stands on a terrace; it is beautiful in design, beautiful in execution. In the rear of the building is an auditorium that will seat 3,000 persons. The building is spacious and was constructed especially for the Land Show and all that goes with it. On the lower floor of the big white building the land companies and the land departments of the various railroads will have their displays. On the upper floors will be the educational exhibits, and these will include the exhibits of the different experiment stations of the United States Department of Agriculture in the Southern states.
Mr. Farmer, here are a few of the things that are going to interest you when you pay your visit to the National Conservation Exposition and the Land Show in the Fall:
You are going to be shown in a most striking and convincing manner how best to maintain and increase the production of your land.
Lessons of the Show.
You are going to get ideas on how to improve the grade and yields of plant and animal products.
You are going to see the soil of the Southern country, and so arranged to teach you many valuable lessons.
You will see exhibits that have to do with the impoverishment of the soil.
You are going to see the best and most modern methods of crop rotation illustrated.
You are going to see actual demonstrations of the way in which you can plant and raise little known products and thus increase the earning capacity of your lands.
You are going to see—
What is the use of going farther? The sentiment that the Land Show at the National Conservation Exposition will be the biggest and best ever held still stands.
The railroads are preparing to make very extensive exhibits—the most extensive they ever have made at a Southern show.
