LEHIGH CEMENT Makes Your Farm Expense-Proof

"Dad, I'm Going to Stay—"

"I decided last night to stay on the farm. I've given up that city notion. Here is a sure future—good land, healthy stock and *lasting, money-saving, fireproof CONCRETE* buildings. I've got one suggestion, Dad. Let's lay a concrete driveway from the buggy barn to the house. It'll save lots of work and expensive repairing. Let's use the same cement you selected for the buildings—Lehigh Cement."

Thousands of farmers, in every section of the country, have awakened to the economical value of concrete in farm building construction. They recognize the fact that an "expense-proof" farm, with its apparent future of independence and wealth, far offsets the attractions of city life to the younger generation. Be sure to select Lehigh Cement. Uniform qualities of strength, fineness and color—country-wide distribution made possible by 12 great mills—are reasons which make Lehigh the choice of careful builders, all over, who seek the best results in concrete work. Tear down these wooden structures that need constant repair that are in daily peril of fire. Replace them with Lehigh Cement Concrete buildings.

The ordinances require all cars to be lighted at night, and it would be well for those who have cars to be a little more thoughtful when they go out.
