# Elgin Six \$1165

## "Car of the Hour"

## A Champion Performer

The most recent championship performance of the Elgin Six was the establishing of a new record of 67½ hours between Chicago and Miami, Florida, over some of the roughest, steepest mountain roads and through the heaviest sand and mud in the country.

The Elgin improved, velvet-action clutch enables the Elgin Six to be started on high gear, under ordinary conditions, eliminating almost entirely the necessity of gear shifting and removing the last barrier to the safe and easy driving of a motor car by women.

The Elgin improved cantilever rear spring suspension, found only in Elgin cars, has set a new standard of motoring ease and comfort at high speed.

You can safely drive an Elgin Six in comfort at 35 to 50 miles an hour over roads so rough that the average car is limited to half that speed.

That this big, roomy, impressive quality car has been designed to sell at less than \$1,500 is the most notable achievement of the year in motordom.

**\$1,500 Quality at \$1,165**

I cordially extend an invitation to inspect the newest model of Elgin Six.

**An American Letter.**

As proof of the kind of spirit which talented American young men are putting into the war, one needs only to read a letter from Lieutenant Howard V. O'Brien, written from the front, and addressed to a member of a western Vigilance Committee of the American Defense Society. Reading it increases our conviction that there is stuff in America which can "hold the line against any advance, and we print it because we believe it will increase the patriotism of our readers. Mr. O'Brien, who has already won some distinction in the field of letters, says:

"I leave this week, 'going East' with a destination I know merely to be France. What I shall do there has not been imparted to me, but I rather fancy advanced work at one of the artillery schools of fire. None knows so well as we, how much there is to be learned in this game, and there are months of hard work ahead of us before we are fit to fight.

"I hate leaving those who pay such an infinitely greater price than I; and I hate leaving my work. But if I come thru, the regard of my children will be the deeper and if I do not—well, for them it will be 'turn down an empty glass, and a fragrant memory—perhaps, after all, a better legacy than an everlasting explanation of 'why daddy didn't.'"

"If I come back it will be to write better books. If I don't—well, there are too many books written anyway. So it's all to the good either way.

"Hooray, for free speech and anti-war, but while we're 'over there' it's up to you good fellows to keep the home fires burning, and the damned pacifist mouths closed! I'm a pacifist myself, but I don't want the Germans to know it until they are on their knees!

"Again, dear doctor, my thanks for your kindness. It helps, believe me, to know that there are people behind who care."

**Too Much.**

"I'm satisfied from the evidence that you were intoxicated."

"Your Honor, any motorist might knock down a telephone pole on a dark night."

"I grant you that, but you mowed down six of 'em."
