What I Know About Hardware and Trusts.

Given an article of manufacture in common use such as sugar, rope and gunpowder, given a progressive and energetic race like the Anglo Saxons, improvements in manufacture and distribution will cause the output to increase much faster than any possible demand can absorb. At this point the law of evolution comes in. In the struggle for existence, first, profits are sacrificed, finally goods are sold lower than actual cost of labor and raw material. Of course the strongest and fittest concerns survive, they change tactics. Instead of trying to destroy each other, they form an alliance and combine to bring their business to a profitable basis. This is the origin of the modern trust. If you want to get the benefit of the latest inventions, improvements and labor saving devices, if you want to get the benefit of close buying and cut carload rates of freight, if you want your goods shipped and delivered promptly, then buy your hardware at
