

RELIGIOUS LIBERALS

International Congress of Free Christianity and Religious Progress Is Well Attended.

(Herald Special.)
Berlin, Aug. 6.—The International Congress of Free Christianity and Religious Progress, attended by prominent ministers and distinguished liberal religious workers from all over the world, opened its fifth biennial session in Berlin today, and for a week will continue to hold its meetings.

This congress, which had its origin in Boston about ten years ago as a result of a movement started by the International Council of Unitarian and other liberal religious thinkers and workers, meets for the first time in Germany, its previous sessions having been in London, Amsterdam, Geneva and Boston.

The announced purpose of the gathering is "to open communication with those in all lands who are striving to unite pure religion and perfect liberty, and to increase fellowship and co-operation among them."

Numbered among the speakers who will take part in the present session are men of distinction from the United States, Canada, England, France, Ireland, Japan, India, Switzerland, Denmark and other countries. More than a score of religious bodies are represented, among them Unitarians, Universalists, Baptists, Reform Jews, Christians, Presbyterians, Friends, Congregationalists, Episcopalians and German Evangelicals.

AN OLD SAYING.

Showing How Cause and Effect Are Never Far Removed.

It is an old saying "Where there's honey there's bees"—not less true is one which science has coined more recently, "Where there's dandruff there's germs"—and to push the inference still further we may truly say "Where there's dandruff cured Newbro's Herpicide has been at work."

The reason of Herpicide's isolation as a genuine cure for dandruff lies in the fact that it attacks and destroys the root of the whole trouble—a parasitic germ which feeds upon the material which nourishes the hair follicle.

Other so-called remedies are not directed at this true cause of the disease.

Accept no substitute, there is none. Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich.

AUTOMATIC TRAIN BRAKE

Invented By San Antonio Man May Take Place of Air Brake Used on Railroad Rolling Stock.

San Antonio, Texas, Aug. 5.—If the theories and model demonstrations of a new brake invented by J. D. Williams of this city prove anything, the air brake as used on railroad rolling stock will soon be a thing of the past. Mr. Williams has a brake which will utilize the momentum of the train as the agent to bring it to a stop. By means of levers connected with the drawheads, the brake will be applied automatically as soon as the engineer reduces the speed of the train by cutting off steam or braking the engine itself. The principle applied is very simple, and consists of the momentum of the car acting against an object offering resistance. As the engine loses in speed the drawhead of the first car is pressed against the drawhead of the engine and causes that of the car to recoil against the springs. The brake levers are connected with the beam of the drawhead and as the latter is pushed back the brake is set in proportion to the force of impact of the initial shock. The same condition is immediately transmitted to all other cars in the train and remains in existence until the train stops altogether or the engine relieves the tension on the drawheads by starting up again. One difficulty yet to be overcome by the inventor is that it would be impossible to back up without setting every brake to a degree where not a wheel would move. Mr. Williams is sanguine, however, as to

will continue through the coming week. The meet is international in character, the entries including many of the foremost aviators of Great Britain and the continental countries. The list of prizes offered aggregates forty thousand dollars.
