

AN ALLEGED DYNAMITER

Mrs. Isabella Martin Placed on Trial For the Second Time at Oakland, Cal., This Week.

Oakland, Cal., Oct. 20.—Mrs. Isabella J. Martin, the alleged dynamiter, who has been a source of more trouble and worry to the local authorities during the past two years than any other prisoner with whom they have to deal, is again prominently in the public eye, her case having come up this week for its second trial. The woman was convicted in December, 1908, of having instigated her minor son, "Baby John" Martin, to blow up the home of Superior Judge Ogden. She had had litigation in his court, and imagined that she had not been fairly treated.

At her first trial the contention of the prosecution was that the boy's act was in fact her own, as he was acting in fear of his life when he blew up Judge Ogden's home. The convicting testimony was that Mrs. Martin kept the youth "Baby John" terrorized with threat of death to the point of compelling him to do her bidding in setting off the bomb. But the appellate court ruled that the danger of threatened death was not sufficiently imminent to free him from being an accomplice and without corroboration the testimony of an accomplice is not sufficient to convict. The supreme court, to which the district attorney took the case, refused to disturb the finding of the appellate court and the case was therefore assigned for retrial.

During the period of nearly two years that Mrs. Martin has been confined in jail she has caused much trouble for the jail authorities by her eccentric conduct. She has written many letters to persons of prominence complaining that she has been mistreated and that her health and life have been endangered by confinement in a poorly ventilated cell and by lack of proper nourishment. When brought into court last July to have the date fixed for her second trial the woman attempted suicide by cutting her wrists with a piece of broken glass.

The jail attendants insist that Mrs. Martin is shamming and continuing to play a part. They admit that she may be insane, but insist that her mind is clear enough to realize what she is doing, and to distinguish between right and wrong. As a result of her erratic conduct and her insistence upon conducting her own defense the attorneys who defended her at her first trial and who successfully carried the case to the higher courts have reluctantly withdrawn from the case.

LENGTH of service is what really determines the value of a suit or overcoat. It is our contention that garments tailored by the best Craftmen and made from the highest grade of imported fabrics will certainly outwear and ultimately prove more economical than those which cost less at the outset.
