Letter to W. M. Styles.

Waxahachie, Texas.
 Dear Sir: Suppose you are growing an acre or two of cabbage; where'll you get your seed? The price of Long Island seed is \$2 lb; the Germans send over tons of "cabbage-seed" 50c lb.
 Most gardeners buy the German seed; of course, you know they wouldn't pay \$2 for cabbage-seeds, when they could get it for 50c. And that's how people do about everything.

Careful people buy smallest package of each, count out 100 seed of each, and grow them a week in a hot-house; then count their plants. They've got 100 Long Island plants and 10 German.

How, do you think, the Long Island cabbage-seed-growers account for that? They'll tell you the German seed is mostly turnip, which looks like cabbage, but isn't.
 Why didn't the turnip seed grow? The Germans had killed it, baked it. What did they bake it for? Dead seeds tell no tales.

There's a whole business in killed seeds. A dealer can get all the dead

seed he wants that look like cabbage and something else; he can mix'em with actual seeds, a pound to an ounce, and sell you your seeds at whatever price you like to pay and whatever profit he likes to take.

The same with paint; you can paint with whitewash or paint, poor paint or good; you can pay your painters \$3 a day for brushing it on. But whitewash is whitewash, poor paint is poor paint, and good is good.

You'd better buy good, and pick out your good by the number of gallons it takes to cover a job; least gallons, best paint; least gallons, least cost by \$5 a gallon; least gallons, most wear.

Better buy Long Island seed, but try it first. Yours truly
 F. W. DEVOE & CO.
