Avessano Is Ancient Town. Avessano, the town from which the greatest number of casualties have been reported as a result of the earthquake, lies in the province of Aquila, in the Abruzzi department, 62 miles from Rome. It is an ancient town and had a population of some 10,000. One of the well preserved buildings there was the towered castle built by Gentile Virginia Orsini in 1190.

Italy's Terrible Earthquakes. Italy in past years has had numerous visitations from earthquakes in which thousands of persons were killed and from which millions of dollars of property damage has resulted.

It fell to the lot of Italy to suffer the greatest disaster in its history, which probably was an earthquake that the world ever saw. This was in December, 1908, when in Sicily and Calabria 75,000 persons were killed and 1,000,000 made homeless. In this disturbance Messina, Santa Teresa, Scilla and Pore in Sicily, and Reggio, San Giovanni Lupatoto, Poggioreale, Palmi, Pellaro and Cannitello, in Calabria, were destroyed.

Other Great Disasters. Up to the time of the catastrophe the earthquake at Calabria was felt in Rome about 2 o'clock this morning. In several quarters of the city the people fled from their homes.
