## 27 Die as Steamer Is Washed Up On Shore

Twenty-seven persons are reported to have died in spite of being so close to shore. ## Fort Peck Dam a Unit in Proposed 'Midwest TVA'

Possibilities of another great river drainage basin development like that of the Tennessee Valley are opening up as the great Fort Peck Dam in Montana begins to take form. The picture above shows a dredge about to be launched, and another at work on the \$50,000,000 earth dam at Fort Peck, Mont., which will hold back the headwaters of the Missouri and create a lake with a shore-line of 2500 miles. This water, it is expected, can be released in such quantities as to make the Missouri navigable all the way down from Yankton or at least Sioux City. This, in turn, would open up for water transport the vast farming and stock-raising regions of the midwest. The drainage area of the Missouri system is roughly shown by the light area, all a potential beneficiary if a Missouri Valley Authority similar to the TVA should be established.
