Mexico plays hands-off in the Central American imbroglio. But maybe Mexico's turn has not come yet. Possibly there is an understanding that Uncle Sam is to establish order among those pesky little republics and then turn them over to Tio Manuel.

Assistant State Health Officer Eaves, who has been in Mexico investigating, reports that there is no yellow fever to speak of in that country. Ten years ago such a report would have been received with astonishment and incredulity. This shows what scientific sanitation can do.

### MEEKNESS.

The Beaumont Enterprise philosophizes thusly: "After all, the world has ever belonged to the few who have fought for it. The man who gives up the battle is the one who becomes a vassal." Yet Jesus said, "The meek shall inherit the earth." Which is the correct view?—Bryan Eagle.

There was no view expressed, merely a statement of fact. The meek may inherit the earth, but their day has not yet come. The teachings of Christ are not so closely followed by men that his declarations have been fulfilled. Not that this should not be, but that it is not. And yet a man may fight for position, for his share of this world's good things, without being unfair to his brother; some of them do.

But it is the strong in the battle of life who win, and if weakness be meekness then the meek are the losers.—Beaumont Enterprise.

Almost two millenniums have passed since Jesus established his religion, and if the battle is still to the strong only in lands professedly Christian there must be something wrong. The fault is not in the teaching of Jesus; he was infallible and his doctrine is perfect. But there is a wide difference between this doctrine and—

Let everyone fill this blank according to his own judgment and conscience.

The Houston Post seems to be doing all it can to inflate the boom of Hon. Tom Ball, who aspires to the leadership of the prohibitionists in the contest for the gubernatorial nomination. But the Pros will hardly consent to accept a candidate selected by the Post.

It has been asserted and denied and reasserted that Mr. Harriman will soon retire from the management of his railway interests, on account of failing health. He is only sixty-one years of age and has displayed remarkable vigor during his remarkable career, but there is a limit beyond which nature refuses to go.

Railroad Commissioner Colquitt is the first to announce his candidacy for governor. Nobody is surprised for it has been generally known that he has been a candidate ever since the campaign of 1906. Mr. Colquitt's positive strength seems to be less than it was three years ago, and there are apparently no adventitious circumstances that favor him.

Speaker Marshall seems to be well disposed toward the administration but it is plain that he is nobody's dog.

The Sentinel says: "Every time you drive a nail you help Nachesoches grow." Not if it happens to be your finger nail.

"The peach crop is ruined." "The peach crop is uninjured." At present it is impossible to say which is true or whether the truth lies between, but time will tell.

There are among the business men of Bryan men who went to school together, grew up together and have met almost every day since they attained manhood, and yet are not well acquainted. Strange as it may seem this is the truth.

Ernie Goldman's visit to Texas City attracted wide attention. She has lectured in Houston and Galveston, advertising candidly her laws and other scientific theories, etc.

The Payne tariff bill is greeted with wailing and gnashing of teeth in some quarters, but it is not likely that it will be materially modified. Those who were so foolish as to expect any favor for Southern products deserve no pity. The difference that it will make in the affairs of any who are not grafters or would be grafters is so infinitesimal that we will never feel it.

Those who think the fighters in the legislature exhausted themselves in the stormy regular session and expect peace and harmony to prevail during the special term are likely to be disappointed. A determined but probably unsuccessful effort will be made to defeat the guaranteeing of bond deposits and there is sure to be a good deal of wrangling over the location of the new agricultural experiment stations. Several other of the measures to be considered will offer good opportunities for scraps.

The city will have a Rubber Stamping Machine may have something to do with the city. It is better than any other that has ever been used. It will stamp out all the bills and all the orders of the city. It is also used in the army when stamps come with the use of a stamp machine. Since having the machine, I have found it to be a very good thing.
