EGYPT.

And Still They Surrender.

Alexandria, 18.—Abraham Tewfik Pasha reports that Arabi Pasha was in the habit of parading natives through the streets of Cairo with torn and bloody clothing, and firing the mob and inciting the populace with the cry of "See how the English treat us."

The Khedive intends, on his return to Cairo, to celebrate the restoration of order by a series of fetes.

The regiment which left Aboukir last night to join Abdullah Pasha at Damietta, was Arabi Pasha's own, and numbered 500 men.

While at Kafr El Dwar, Arabi Pasha and his wife lived with his father, mother, brother and sister. Arabi, at the end, drank only what they prepared, as he believed the English had spies in his camp who wished to poison him.

A troop of Indian cavalry will leave Cairo, to-day, for the purpose of escorting the Khedive from Alexandria to Cairo on Thursday. The ministry of the interior will be transferred to Cairo to-morrow.

Abdullah Pasha, commander at Damietta, requested that an officer be sent to inform him of recent events. This is considered as foreshadowing the surrender of Damietta.

From 10 on Monday morning until late in the afternoon bodies of infantry, cavalry and artillery continued to pour in from Aboukir and surrender their arms. Many more are to come. The ironclads Minotaur, Sultan, Inconstant and Achilles, and the gunboats Falcon and Condor sailed eastward, this morning, and are now anchored off Aboukir forts. These will be occupied by sailors and marines. Altogether 23,000, from various parts, have made submission at Kafr El Dwar. The telegraph censorship has been abolished.

Cairo, 19.—A large body of Egyptian infantry, with four batteries, supposed from Salihijh Calihyah, appeared at Fakah and surrendered to a battalion of Highlanders.

Abdullah Pasha has surrendered. London, 19.—The Archbishop of York has issued an invitation to the clergy to observe next Sunday as a day of thanksgiving, and publishes a special service for the occasion.

Cairo, 19.—Mahmoud Pasha Sami was arrested disguised as a priest. Constantinople, 17.—The Porte denies that Akab sheikh Oballah has tendered submission.

The "Asia" Disaster.

Collingwood, Ont., 19.—The steamer Northern Belle, dispatched from Parry Sound, to the scene of the disaster to the steamer Asia, returned to-day, bringing the bodies of Capt. Savage, McDonald, first mate; Jno. Little, Sault Ste Marie; J. McAlpin, Gorebay; an unknown man supposed to be a lumberman. An interview with the rescued man Tinkiss, elicits little in addition of the reports already published. At the time of the accident the steamer was about twenty miles from land. A heavy sea struck the vessel and sent her over on her side. The boats were cut free and as the vessel went down shoved off. The upper decks floated after the hull sank. One after another the occupants of the boats were either washed overboard by the heavy sea or died from exhaustion, until only five were left in the metallic boat, which contained the two survivors, Tinkiss and Miss Morrison, their companions dying one after another. They reached shore at daylight.

Combing and delaine selections are firm; 42@46 for fine delaine, 66@59 for fine and No. 1. Combing—coarse combing is inquired for at 32@43, as to quality. California wools quiet; sales at 25@30 for spring; pulled wool is in fair demand at 42@48 for choice, super 20 @40 for common and good. The stock of choice super is quite reduced; foreign wool is quiet, and no sales of any importance.

Brewers' Convention.

Rock Island, 19.—Reassembling at 2 p. m., the committee on nomination reported: President, A. E. Lecht, Chicago; vice-presidents, John Feldkamp, Judge Bross, Frank Reel; recording secretary, Peter Harmsborough; corresponding secretary, August Timm; treasurer, L. Ballenberg; attorney, Harris Rubens. The report was adopted. The committee on resolutions presented the following, which was adopted:

Whereas, The danger arising from prohibition movements is steadily increasing in this state; and
Whereas, A thorough organization of all business men directly interested in the liquor traffic is now more than ever a matter of imperative necessity; and
Whereas, The ensuing election of members of the legislature will to a great extent, determine the issue of prohibition against personal liberty in our state; be it

Resolved, That we consider the maintenance of further development of our present state association as one of the most effective means of protecting ourselves in our rights as business men, taxpayers and citizens; and that the board of trustees spare no efforts at once to secure the co-operation of all the various branches of the liquor interest in this state; and be it further

Resolved, That we will use our best endeavors to defeat, at the next election, any candidate for any office who cannot be fully relied upon as being uncompromisingly opposed to all attempts at sumptuary or prohibitory legislation, and be it further

Resolved, That we are decidedly in favor of abolishing all abuses incident to the liquor traffic by a proper system licensing and regulating the business in such a manner as to fully protect our interest, and at the same time elevate the trade to a higher standard.

Resolved, That the manly and outspoken declaration against prohibition and the prohibitory amendment, to our state constitution, as adopted by the last democratic state convention at Springfield, is deserving of the highest praise on the part of this convention.

Adjourned till to-morrow morning.

The Comet.

Washington, 19.—The new comet was watched at the naval observatory this afternoon. It was found in right ascension, 11 hours, 19 minutes, 32 seconds declination, 12 minutes north. The comet is easily seen with the naked eye, and exhibited a short tail with a bright head of considerable extent. In the telescope the nucleus showed a large comet with plenty of loose material extending about it. On both sides were bright arcs of light, presenting the appearance of a bird with outstretched wings. The comet was seen at Nice, France, about noon on Sept. 18th. It is almost certain the comet is now passing perihelion. The comet at 3 to-day, was nine degrees west of the sun, and will probably have increased this distance by sunrise on the 20th, to twelve or thirteen degrees. It will, therefore, rise somewhat before sundown, owing to the fact that it is also further south than the sun. It cannot be readily seen before sunrise. In a few days, however, with its present rate and direction of motion, it should become a brilliant object in the morning sky. On the whole, this may be regarded as one of the most extraordinary comets of modern times. The only one which resembles it in its special features of interest, is the great comet of 1843 which, like this one, was visible to the naked eye in full sunlight. Barnard's comet was also observed at the naval observatory this morning at 4. Its right ascension 7 hours, 27 minutes, and declination 12 degrees, 11 minutes north. It presented the usual appearance of a telescopic comet with slight central.
