WINTER and Monthly Courses.

FINANCE AND MINING.

The Local Market Continues Easy.

ORE AND BULLION RECEIPTS.

Bannock Offered—Mr. McCornick's Views—Bank Receipts—The Daily—Other Mines

The week has been somewhat "off" in the way of transactions, mining shares and other securities having been quite stagnant. Bannock has been hawked about considerably brokers offering it at \$5.50, without takers; everyone seems inclined to await the coming of the next bar, and to note with what frequency they can be turned out in the future.

Mr. W. S. McCornick, of McCornick & Co., bankers, was asked yesterday how this fall's trade compared with previous seasons. His reply was that it kept abreast of other years, and was possibly somewhat in advance of them. "Business now in this city," he said, "is upon what may be called a steady and firm basis. There are no failures, and the greater part of the merchants are doing a safe and satisfactory trade. The advance in silver, too, contributes to give a better feeling to everybody."

"How is money?" "Money is in good demand, and there is plenty of it to be had on the right sort of security at very low rates. The money market may be termed easy." Mr. McCornick said the wool interests of the Territory were yearly increasing the volume of trade. This year had been one particularly prosperous, as the producers generally received the benefit of the sharp advance in the eastern markets. Wool money, too, all remains in the Territory; little or none of it goes where the bulk of our mining dividends go—to New York or San Francisco.

The D. & R. G. to earnings (gross) for the second week in October were \$152,682; for the same week in 1885 they were \$141,496, a gain of 8 per cent.; most of the other roads in the country show a like increase.

Domestic Wheat and Flour Markets.

The wheat market has been fairly well sustained during the week, and there are but few indications of an early approach of the long hoped-for advance. The receipts of wheat at primary markets have fallen away very materially, notably at Minneapolis, of course on account of the strike of the switchmen there. Then, too, the visible supply was given out to have increased but 1,000,000 bushels last week, when, as currently reported, a heavier increase was looked for. And, furthermore, one or two prominent speculators at the west have bought heavily at times, which has gone far to sustain the mar-

ket. Yet, withal, wheat on the whole has been dull. The statistics, as far as new supplies and stocks are concerned, are indeed bullish, but the trade appears to demand something more than statistics to effect a start upward. On Friday wheat was much more active and decidedly stronger. The advance on spot was about 3/4 to 1 1/2c, and options 1 1/4 to 1 3/4c. There was a much freer export business yesterday, largely for Great Britain, though part for the continent. Cables were more favorable and stimulating, and the west was more bullish. Speculation was active, even excited, and there was extensive covering by the shorts.—Bradstreet's.

Ore and Bullion.

The ore and bullion receipts at the various banks in this city for the week ending Saturday, October 30, 1886, amounted to \$137,163.90 against \$94,567.00 for the week previous. They were reported as follows:

By McCornick & Co.:
Hannover bullion..... \$23,942.43
Queen of the Hills ore..... 3,300.00
One Bannock bar..... 1,100.00
Lead and silver ores..... 29,100.00
Total..... \$48,442.43

By Wells, Fargo & Co.:
Base bullion..... \$14,900.00
Fine bars..... 33,157.81
Ores..... 29,269.81
Total..... \$77,027.62

By T. R. Jones & Co.:
Lead and silver ores..... \$1,693.85
Total shipments for week..... \$130,163.90

The Ore Market.

Ore receipts at the smelters are commencing to lighten, most mines having shipped their output, and the market this week is a little dull in consequence. The shutting down of the MacKay and Revolution about ten days ago, has made one competitor less, but the prospect of a starting up of the old Flagstaff may form one additional bidder. Mr. Lyons, who will run the smelter, is connected with the parties who purchased the Yosemite No. 2 in Bingham. The Brooklyn output continues to go to the Selby works in California.

The Apex
This long-silent property sent down a car load of good ore one week ago yesterday. There was not much of it, but the three lots went west from 47 to 62 in lead, and from 50 to 68 ounces silver.

Sampson.
The Sampson is still shipping. One fifty-ton lot was sold during the week, going from 35 to 40 ounces, and 20 to 25 per cent. in lead. Another fifty-ton lot, but of a better grade, is expected down this week.

The Daly.

The Daly is not much heard of on the streets, but the output of silver bars continues steadily, and that dividend days are not far off is evidenced by the price of the stock, which sells at \$16 and \$17 on the streets, \$20 being par value. There are 150,000 shares in the company, which makes the capitalization \$3,000,000.

The company is earning money steadily, and is fast wiping out the debt incurred for putting the mine in shape and acquiring the Marsac Mill.

The New York Engineering and Mining Journal says it has been officially informed that the production for September amounted to \$20,601.72, all silver.

The last quotation in New York was 19c.

Dividend No. 125, of 50 cents a share, was paid yesterday by Lonsbury & Co., New York.

The Lead Trouble.

The Journal says: The troubles with the lead market are first that consumption is much less than it was a year ago. The Corroders at their meeting last week, compared notes, and we are told estimated that the amount of lead used in their business this year will be from 10,000 to 12,000 tons less than in 1885, and to a less degree other manufacturers have lessened their consumption. On the other hand, our imports have been quite large and our production greater than in 1885. The effect is seen in stocks quite inconveniently large, and including the stocks in manufacturers' hands, sufficient to account for the present condition of the market.

It is impossible to say how much lower lead may go, nor how much manipulation may have to do with its decline, but the statistical position of the metal is such that no important advance can be looked for until there is an improvement.

THIS IS NO FISH STORY.

WAR ON HIGH PRICES HAS COMMENCED! Receiving my Fish fresh every day direct from the fisheries, I can and do sell cheaper than any dealer in town. Delivered at your doors fresh every morning. Trout, White Fish, Salmon.
