LOWER MAMMOTH SINKING

CARISA STRIKES FINE COPPER ORE ON 700 LEVEL.

A large meeting of the board of directors of the Mammoth Corporation yesterday set the matter of the Mammoth Mine in Utah was also taken up yesterday afternoon the president of the board, Mr. John W. Emery, authorized the appointment of a committee to inspect the mine. The committee was appointed to consist of Mr. Emery, Mr. S. J. Williams, and Mr. J. B. Thayer.

The Mammoth Mine is operated by the Mammoth Corporation, a corporation formed for the purpose of developing the Mammoth Mine. The corporation was incorporated under the laws of the State of New York, and has a capitalization of $1,000,000.

The mine is located in the Utah Desert, and is about 15 miles south of Salt Lake City. It is situated in a district rich in copper and silver ores, and is believed to be one of the most promising mines in the country.

The committee was instructed to report on the condition of the mine and to make recommendations for the further development of the property.

It is expected that the committee will return to Salt Lake City in a few days, and that a report will be made to the board of directors at their next meeting.

The President's Report to the Committee

The president of the company, Mr. Emery, gave a brief report to the committee on the condition of the mine. He said that the company had made a large investment in the mine, and that it was now in a position to develop it on a large scale. He said that the company was confident of success, and that it expected to make a profit on the investment.

The committee is expected to return to Salt Lake City in a few days, and to report on the condition of the mine.

The report of the committee will be considered by the board of directors at their next meeting, and action will be taken on the recommendations made by the committee.
