Royal Baking Powder

is indispensable to the preparation of the finest cake, hot-breads, rolls and muffins.

ROYAL Has No Substitute

No other baking powder equals it in effectiveness, purity and wholesomeness.

ROOSEVELT IS NOT IN FAVOR

Chicago, March 3.—A Daily News cable from London says Theodore Roosevelt's acts in South America were roundly criticized today by John T. Lenfestey of Chicago, who reached here from Rio de Janeiro after a tour of the principal cities of the South American countries. Mr. Lenfestey's tour was in the interest of closer trade relations between the continents on the western hemisphere. He represents the Chicago Association of Commerce and is the president of the Lenfestey Flour company. "Ungenerous, not to say grasping, describes some of Roosevelt's acts in South America, if reports current there may be believed," said Mr. Lenfestey. Mr. Lenfestey carried letters from Secretary of State Bryan, Wilbur John Carr, Harry A. Wheeler and others, and thus gained admission to the best informed circles in South America. Mr. Lenfestey said: "My mission brought to my attention a number of things prejudicial to the spread of American influence and business in the republics of South America. Mr. Roosevelt left an unfortunate impression wherever he went. Reports adverse to him reached me from reliable sources in Santiago, Buenos Aires, Montevideo and Rio de Janeiro. "His conduct in Rio de Janeiro was the subject of native comment of a particularly adverse character. He arrived there October 21, accompanied by Mrs. Roosevelt, a niece and his son, Kermit, and was received by the president's cabinet, governor and diplomatic corps. He was conducted to the palace of the governor, which was placed at his disposal. The visitors stayed a week and were the recipients of regal hospital-

ity, banquets at government and civic honors, numerous automobile drives and private courtesies from many nobles. Colonel Roosevelt was allowed to entertain whom he pleased at the palace. "Speaks to Select Company. "On his third or fourth night in Rio de Janeiro Roosevelt spoke thirty minutes on the relation between the United States and the South American republics before the Rio de Janeiro Historical and Geographical society, which had invited him to South America and made him an honorary member, the highest honor it could confer. The audience was composed of ambassadors, generals, leading politicians and members of society, possibly 100 in all. "On the night of October 26 Mr. Roosevelt left for Sao Paulo on a special train provided by the government on the Central Brazil railroad. He visited points of interest on the line, looked over the capital and the state of Sao Paulo and continued on his journey to Buenos Aires at the expense of the Brazilian government. "After all this the historical and geographical societies received from Mr. Roosevelt a bill of \$2000 for his brief lecture. Already \$40,000 or \$50,000 had been spent on the visitors in entertainment. The Brazilians politely paid the bill, but they could not conceal their amazement. "When the American residents of Rio de Janeiro learned the facts their humiliation was inexpressible. The story was published in the Journal de Comercio. I personally asked the Count Candido Mendes d'Almeida, owner of the Journal de Comercio, if the story was true and he answered 'yes.' "It was told that Mr. Roosevelt, while everywhere accepting public and private hospitality on an extravagant scale, charged for all of his speeches. He also harped on the Monroe doctrine and Pan-American solidarity in a way that struck South Americans as offensive. These stories about Mr. Roosevelt I do not repeat out of any ill feeling for him, but to emphasize the fact that such treatment postpones indefinitely that rapprochement with South America which we all want and which some of us are trying hard to obtain."

FRUIT FROM UTAH WIDELY DISTRIBUTED

Salt Lake, March 4.—This state furnished thirty-two states and 108 large cities with a large supply of fruit last year, according to the annual report of the Utah Fruitgrowers' association which was presented to the stockholders at their annual meeting held yesterday in the Commercial club. In the report of General Manager W. H. Garvin the statement was made that during 1913 the association had shipped fruit in carload lots to almost every state in the union and to 108 big cities. Mr. Garvin reported that there was a ready market for Utah fruit at prices as large, and in some cases larger, than fruit from other states. No other state in the union, Mr. Garvin said, had as wide a distribution of its fruit as did Utah. Mr. Garvin said the world was beginning to appreciate the high quality of Utah fruit and to demand it. The market for the 1914 Utah fruit, he said, would be much better than in 1913 because of the recognition of the superior grade of the Utah fruit. He recommended that the growers exercise a greater care in the packing of fruit and in its preparation for the market. "GREAT WEST IS TO BE GIVEN A CHANCE" Denver, Colo., March 3.—A movement for a united west was started in Denver today. Its slogan, "Give the west the same chance the east has already had in developing its resources," is directed at the department of the interior and the lawmakers at Washington. Colorado and Utah speaking through their governors at a luncheon given by the directors of the Chamber of Commerce in honor of the two executives at noon today, announced their intention to "erase imaginary state lines" and present a united front in demanding that their common interests be considered first in the development of their natural resources. Every other public lands state in the west will be asked to join in

UNIFORM METHODS TO FIGHT HOG CHOLERA

Chicago, Ill., March 3.—Uniform methods for fighting hog cholera were adopted today at a meeting here, attended by A. D. Melvin, chief of the bureau of animal industry, and officials from twenty-six states. It was the opinion of authoritative speakers that the disease was increasing. The heaviest toll from hog cholera was in 1887, when the death rate was 120 per 1000, and in 1897, when the rate was 130 per 1000. The death rate in 1913 was 100 per 1000. President Raymond A. Pearson of the Iowa State Agricultural college, said: "I fear we are passing through another period of increase of the disease. Our effort now must be to control the disease. Eventually we must endeavor to eradicate it, but this will be years hence. "Our success depends largely upon our ability to educate farmers to combat the disease and on co-operation between federal and state officials." Resolutions were adopted declaring that farmers can safely administer cholera serum without virus, but advised the testing of all serum by state colleges or government laboratories. Simultaneous treatment with virus and serum should be given only by those who have had special training. Competent veterinarians should be posted in all infected districts. It was asserted the closest possible co-operation between federal and state authorities was necessary and where differences of opinion arose the state should bow to the government. A report of the meeting will be widely distributed among farmers.

GOLDFIELD CON.'S GOOD SHOWING

In total production of ore and realization, the report of General Manager Albert Burch of the earnings and operations of the Goldfield Consolidated Mines company during January, just issued, shows a noteworthy improvement over the achievements of the company in the preceding month of December, says the Goldfield Tribune. During January the total production of the company's mines amounted to 30,198 tons of ore, which yielded a net realization of \$164,914.37, as against 25,804 tons of a net realization of \$153,353.33 in December. In January the ore was mined and treated at a total cost per ton of \$5.35, as against \$6.64 in December. Mining costs were reduced from \$4.45 per ton in December to \$3.77 in January, with an increase of 7 cents a ton in milling costs. Development work accomplished during January totaled 2,666 feet at a cost of \$4.91 per foot. According to Manager Burch's report, the Mohawk occupied the regular position among the mines of the company during January. On an intermediate level, midway between the third and fourth levels, at a point about 200 feet southeast of the shaft, 482-X drift passed through a narrow section of the old 407 stope and revealed a good width of milling ore on the hanging wall side of the old stope. On the new No. 1 level, No. 60 drift to the northeast from the old Skeets-Ish lease workings revealed \$17 ore, yielding fifty-eight tons during January. In the Clermont, on the 750 level, about 600 feet southwest of the shaft, a new sill, known as 401-A-X, was started and produced forty-six tons of \$13 ore from the hanging wall side of old 401 stop. This ore body gives promise of producing a considerable tonnage of low-grade mill ore. Operations were continued on \$15-B raise during the month on a narrow streak of copper ore that yielded 263 tons of ore carrying values of \$35 a ton. The various mines of the company are yielding their normal output and Manager Burch says that the stopes at the end of last month were looking better than at any time in the past three months.

OLD ROASTER STACK IS BLASTED DOWN

McGill, Nev., March 3.—Much interest was evinced Sunday by the McGill people when the engineers of the Steptoe Valley Smelting and Mining company blasted down the old stack of the roasters, which was built six years ago and had not been in use for the past year on account of its precarious condition, the top having crumbled off until at the time of its destruction it was only 191 feet high. It was estimated that the mass weighed 9000 tons and great care was necessary in felling the stack on account of a large fuel oil reservoir and another stack in the vicinity. Fourteen holes were drilled in the south side of the base of the stack and 500 pounds of 40 per cent dynamite used. Floyd Middagh, son of the chief electrician, threw the switch that connected the charge with an electric current of 110 volts and the stack fell to the south exactly as calculated, no bricks being thrown farther than eighty feet from the base. The work was in charge of J. D. Watson and Charley Anderson of the smelter department.

Five leading cooking authorities all recommend Cottolene

Marion Harland
Mrs. Sarah Tyson Rorer
Mrs. Helen Armstrong
Mrs. Mary J. Lincoln
and Lida Ames Willis

have written a wonderful new book of recipes and cooking hints called "HOME HELPS." The chapters on "How to Measure," "Tables of Comparative Measures," "Time Table for Cooking," etc., are alone well worth having. We will send it to you FREE.

Cottolene

The recipes are practical for every-day use, and illustrate the use of and value of Cottolene.

Cottolene goes much farther than any other cooking fat or shortening. Saves money because it is economical; always insures digestible food.

TRENTON SETS FORTH CLAIMS TO THE FACTORY

By Y. Benson, chairman of the committee appointed by the business men of Trenton to present the claims of that town for recognition as the ideal location for the proposed plant of the Utah Cereal Food company, has submitted his committee's report. It is addressed to D. F. Collett, chairman of the location committee of the company, and it sets forth Trenton's inducements in part as follows: "In the event of Trenton being chosen as the home for your plant we will present to you free a clear title to five acres of land for factory purposes. If it is your desire to have citizens of Trenton subscribe for stock in the plant, we feel assured that a substantial subscription can be had. In case more land is required, we will furnish the same to a reasonable amount. The land proposed for your plant is ideally situated with reference to transportation facilities and the commercial center of the town. "We believe Trenton to be the logical home of the plant you propose establishing for the following reasons: "Trenton is the center of a grain district, yielding upward of 1,200,000 bushels of wheat and large quantities of oats annually. "The larger part of the wheat raised is the hard kernel variety, used extensively in the manufacture of predigested cereal foods. Oats of a superior quality are also raised in quantity. "Being on the main line of the Oregon Short Line railway, transportation facilities are the very best. "Trenton is already equipped with elevator capacity to take care of the grain which would be required for such a plant. "Trenton is a growing town and can furnish necessary labor at the lowest price in seasons when it would be most needed. "While much of the land in Trenton is under a first-class irrigation system, thereby taking care of cereal crops requiring irrigation, the town is surrounded by a vast dry-farming country that can never be otherwise. On this land the grains are raised in most needed in cereal food productions. "There are six electric power plants in Cache valley, and the distributing line of the Utah Power & Light company from Idaho runs through Trenton, from which cheap power can be procured. "It is suggested that in connection with a food plant, hog and beef fattening is a side industry. In this connection Trenton is the heart of a large alfalfa district, yielding as high as four crops in a season. This, with the husks from the cereal plant, can be used to advantage in the stock industry. "Trenton is the shipping center of a large territory. Being on the main line of the railroad, freight rates are naturally lower than on the branch line in the eastern part of the valley."

FEW DELINQUENTS ON INCOME TAXES

W. C. Whaley, United States internal revenue collector, is of the opinion that very few delinquents will be found this year among persons and corporations coming within the limits of the income tax law. He says that the heavy penalties in the event of failure to make returns were given such wide publicity that nearly everyone heeded the warnings. Now that the final date for making returns of the tax has passed the duties of the office are busy checking up the returns in preparation for collection. The collectors were given by the department of Washington until Wednesday to make a complete report. The final date for payment of the tax is June 30, after which delinquents are subject to additional tax as penalties.

CEREAL COMPANY ELECTS OFFICERS

The directors of the Utah Cereal Company held a meeting in Salt Lake City and elected an executive committee, with J. S. Carver of Ogden, as chairman. The other members of the committee are D. F. Collett, E. Y. Thistle, L. J. Haddock and J. H. Hendrickson. This committee will arrange all plans for the purchase of a factory site, the building of the factory and the putting of the plant in operation. Salt Lake, Ogden, Logan and Provo have already been visited by a committee to investigate a number of proposed sites and a communication from the people of Trenton was received at the meeting yesterday through a delegation of five citizens of that town. The proposal of Fred J. Kiesel for a site in Ogden was reported to have been discussed and looked upon with favor.

CASE HEARD INTERMITTENTLY

Provo, March 3.—The case of J. E. Smiley against the Utah Lake Land, Water & Power company and B. M. Whitney is again being heard before Judge A. B. Morgan. It will take the rest of the week and will probably not be finished by that time. The suit involves questions of alleged false representations relative to the irrigation water supply for the land at Elberta purchased by the plaintiff from the defendant. On account of the great volume of testimony, when the court and attorneys can find time from other regular business. This is the third or fourth installment of the hearing. Attorney Bismark Swnder and Judge R. C. Orr are representing the plaintiff and Captain E. A. Wedgwood the defendants.

REPORT ON FEES

Provo, March 3.—The following fees have been reported to the board of county commissioners as collected by county officers for February: Clerk, \$454.66; treasurer, \$32.50. County Treasurer Royal T. Hulsh has reported the following amounts on and March 1 in the funds in his charge: County school fund, \$18,996.84; county superintendent's contingent fund, \$1292.68; state school fund, 167.76.

INTERURBAN ROAD TO AMERICAN FORK

Lehi, March 3.—The 25th of March is the day set for commencing the regular schedule on the Interurban railroad between Salt Lake City and Utah county. On Friday, March 13, there will be a big celebration in Lehi, under the auspices of the Lehi Commercial club, to mark the coming of the Interurban into Utah county. Mr. Armstrong, vice president and assistant manager of the new road, held a meeting last evening with the board of governors of the Lehi Commercial club and helped to make the preliminary arrangements for the big celebration. It is proposed to make of it a two-county affair. The Salt Lake county contingent will consist of 200 of the leading citizens of Salt Lake City and officials of the commercial clubs of Hunter, Taylorsville, Bennion, West Jordan and Riverton. Invitations will be issued to Governor Spry and staff, Mayor Park and the city commission of Salt Lake City, President Jensen, Secretary Farrell and leading members of the Salt Lake City Commercial club, directors of the Transportation club, A. J. Orem, W. C. Orem, Messrs. Armstrong and Moore, and other officials of the Salt Lake & Utah Railroad company; representatives of the Salt Lake City dailies, and many other leading citizens of the state. All will be asked to bring their wives. The Interurban cars will leave Salt Lake City about 6 o'clock in the evening and will be met at Lehi by the Lehi Silver band. There will be a big meeting in the tabernacle, which is but a block from the Interurban railway, at 7:30 where addresses interspersed with musical numbers will be made by prominent visitors, railroad officials and local dignitaries. After the big tabernacle meeting there will be a grand ball in the Smuin dancing academy, at which it is expected Governor and Mrs. Spry will lead the grand march. The road is now completed as far as American Fork, which will be used as the terminal till the rails are laid and the road ballasted to Provo. Two gravel trains are being run over the road almost every hour. As soon as the stretch between Salt Lake City and American Fork has been put in operation, the big track-laying machine will commence

Valuable Item for Men

Health and strength hitherto rich red blood through the arteries and veins and life's greatest ambitions may be realized as before, if the following special treatment is followed by those men, and women, too, who are of all afflictions, nervous exhaustion, accompanied with such symptoms as extreme nervousness, insomnia, cold extremities, melancholia, headache, constipation and dyspepsia, kidney trouble, dreadful dreams of fearful disquiet, timidity in venturing into a general inability to act naturally at all times, no other people do. Lack of poise and equilibrium in men is a constant source of embarrassment even when the public does not suspect it. For the benefit of those who want a restoration to full, bounding health and all the happiness accompanying it, the following home treatment is given. It contains no opiates or habit-forming drugs whatever. Mix it at home and no one will be the wiser as to your affliction. The treatment is simple, thorough and correct. Leading druggists supply the main ingredients, except at all times as other people do. Bottles, ready to mix. Get three ounces syrup, sarsaparilla compound, mix with one ounce compound fluid balsam, and stand overnight. Add one ounce compound essence cardol, and one ounce tincture cadomene compound (not cadomene). Shake well and take a teaspoonful after each meal and one at bedtime. The ingredients are used for various prescriptions.

A GOOD BANK ACCOUNT

does not necessarily consist of a large amount of money. Regular deposits, daily for commercial accounts and weekly or monthly for individuals, with careful attention to the balance in account and an avoidance of overdrafts, is what makes the Banker smile—and your credit good.
