

Log Cabin Cake Frosting

Boil 2 cups of Towle's Log Cabin Syrup until it strings. Then pour the boiling syrup into the stiffly beaten whites of two eggs, and beat continually with a silver fork until the right thickness is spread between the layers and on top of the cake.

Don't miss these maple treats

Everybody loves the delicious maple flavor of Log Cabin Syrup. Serve it with the breakfast pancakes or biscuits, with the lunch dessert—use it to flavor the dinner pudding or cake.

TOWLE'S LOG CABIN CANE AND MAPLE SYRUP

Makes Home, "Sweet" Home, Indeed

It is a delightful blend of choice sugar cane and pure maple syrup. Improved in flavor and in "body." Sold at your grocer's in full measure log-cabin-shaped cans.

Horoscope

Wednesday, November 18, 1914. (Copyright, 1914, by the McClure Newspaper Syndicate.)

According to astrology this is a fairly lucky day, for Neptune and Venus rule favorably early in the morning with Uranus strongly benefic later in the day. Mars, however, is decidedly adverse.

The swan is supposed to be particularly good for romance and for the association of men and women. It is a rule fortunate for engagements and weddings.

Under this configuration the professions and business affairs in which women engage should prosper. There is a prediction of great success and extraordinary achievement in commercial life.

The planets foreshadow the growth of feminism to an undreamed of development within the next few years.

Uranus gives hope of a revival of spiritual ideals and a reaction from the reckless excesses encouraged by material achievement.

There is a sinister sign for Hungary and Slavonia. Next month may be the most serious in its developments.

Austria is subject to planetary government, which is of gravest import. The royal house is said to face ruin.

India, Greece, the Balkans and Mexico are still subject to influences read as presaging plots and violent deeds.

Notwithstanding conditions that are encouraging to thrift and economy there is a prognostication of unusual social gaieties for the winter and many weddings.

The seers declare that among the many celebrities who will seek haven in this country one will come with an errand of supreme import to the nation.

Fame to writers is foretold. The rise of a new poet again is predicted. The death of a woman connected with world movements for reform is foretold.

Persons whose birthdate it is are advised to beware of quarrels. They have the augury of a happy and prosperous year.

perous year. The young will have romances. Children born on this day may be restless, fond of company and generally fortunate. Boys should win success in business and girls should be favorites.

Don't miss "Marta of the Lowlands," Ogdan Theater tonight. A wonderful photoplay.

BOUQUETS FOR THE CORSAGE

Two kinds of corsage bouquets have found favor with women this season, one being very large and worn at the girdle, or very small and worn on the left shoulder. Instead of these bouquets being of flowers alone, as was once the case, they are now made frequently of fruit, such as grapes, and when made of gold or steel they are very showy. A rose placed at the center of the back of a high Medici collar is a novelty that is admired by some.

WORTH KNOWING. Sheer white materials may be made into charming, inexpensive gowns by stenciling before making up.

A good breakfast toast is made by dipping the slices of bread in a pint of milk to which a beaten egg and a pinch of salt are added, and frying.

Dried fruits are often made palatable by the addition of a fresh flavor. Orange juice improves strawberries, lemon improves prunes, ginger root with pears.

Charming little emeries are made with the help of an acorn cup. Cut a tiny bag to fit the cup, covering it with shiny brown silk and filling with emery powder, then insert in the cup and fasten with glue.

WOMEN HOLD TO SHIRT WAIST. Whatever the fashions may be, there are women who cannot discard the practical shirtwaist, and they plan to include at least two or three in their wardrobe for spring and fall.

This season waists are included to wear with the street suits, and one of the most important styles is that made of chiffon. Waists may be

made of either accordion plaited or plain chiffon, of crepe de chine, mesaline or any of the soft materials. There are seen elaborate waists of lace and net combined, then there are dark satin waists for general wear, many of these being worn with dainty, high lingerie collars.

ODD DESIGNS ON BROCADED SATIN

Designers of rich brocaded satins are making a search, from wall papers to historical novels, for figures to be used in the newest designs. One piece of material recently brought to America to be used for evening coats is a heavy piece of satin, with figures representing a scene from "Ben Hur," showing the driver in the chariot, executed in gold thread. Other designs have the human figure in varied poses. There seems to be nothing too unusual to be adapted to these designs in brocades.

PIES FOR THANKSGIVING

November is essentially the month for making mince and pumpkin pies. In fact mince meat should stand some weeks to gain savor for the Thanksgiving pies, so it is just as well to make your meat at once—enough to last all winter, if it is kept in a good, cool place to keep it.

Mince Meat—Simmer until tender two and one-half pounds of lean beef, or better still, passed through a meat grinder. Add to this four quarts of apples, pared, cored and chopped, one cup of chopped citron, four cups of brown sugar, two cups of New Orleans molasses, one cup of suet, chopped very fine or passed through a meat grinder, one nutmeg grated, one tablespoonful of salt, two tablespoonfuls of cinnamon, one-half tablespoonful of cloves, four cups of sweet cider, or if you use it, add one cup of Madeira wine and one-half cup of brandy. Pack this into an earthen vessel and keep in a cool, dry place. This is sufficient filling for twelve pies. For a large family double or triple the quantity can be made. As mince is your paste, add a little baking powder—half teaspoonful to every three cups of flour, as this will lighten the dough.

Pumpkin Pie—Canned pumpkin can now be had in a very good grade and it saves the city housewife the trouble of cooking a rather unwieldy vegetable. If you prefer to use the fresh pumpkin, however, select one of small size, rather firm at both ends, if you wish to secure the sweeter varieties. Wash, cut open, and remove the seeds and pithy shreds in the center. Cut into good-sized pieces, add enough water to keep it from sticking to the bottom of a porcelain-lined kettle and get it on the back of the stove to simmer. This will require about five or six hours with a slow fire. There should be very little water left when it is done. Remove the loose skin, and rub the pulp through a colander. Set away to cool. For every five cups of the pumpkin, allow one teaspoonful of salt, half a nutmeg grated, in making the paste, add a little baking powder—half teaspoonful to every three cups of flour, as this will lighten the dough.

PUDDING FOR THANKSGIVING. Scald one quart of milk and pour it over a cup and a half of cracker crumbs, add two tablespoonfuls of butter and let the mixture cool. Beat four eggs very light and add these to the pumpkin pulp, then add very slowly, four cups of sweet milk. Beat until smooth and turn into deep pie plates lined with lower crust of pastry. Bake three-quarters of an hour, or until firm in the center.

MAY BID ON CANAL

Provo, Nov. 15.—Twenty-three bids were submitted today at the office of the Strawberry valley reclamation service for constructing ten miles of the Strawberry highline canal from the power station, east of Spanish Fork, to a point beyond Payson. The canal will have a capacity for 24,000 acres, 16,000 of which have already been subscribed.

MARRIAGE LICENSES ISSUED. Provo, Nov. 16.—Marriage licenses have been issued to the following: Hyrum R. Gray and Charlotte Austin of Lehi; Gilbert Y. Johnson of Spanish Fork and Alta Larson of Mapleton; Wells Thomas Brockbank and Catherine LaRetta Evans of Spanish Fork; Warren Edgar Davis and Rachel Atkin, Spanish Fork; Winford H. Allen of Springville and Stella Harding of Mammoth; W. E. Bartlett of Springville and Maul E. Nielson of Spanish Fork.

WEBER ACADEMY OPENS COURSE OF LECTURES

The 1914-15 lecture course at the Weber academy was opened last night with a lecture by Chancellor George H. Bradford, one of the foremost Lyceum lecturers of the present day. The academy auditorium was well filled with interested listeners and in every way the opening evening was considered a most auspicious one.

Chancellor Bradford took as a theme for his remarks, "Education in Its Relation to the Brotherhood of Man." Present-day education and especially that of the United States formed the greater part of his discussion and throughout the talk he indicated that the United States, as the haven of refuge for people of all nations, would at some future date lead the world in forming a great federation. This federation, he said, will bring the leaders of all the nations together for the establishment of international laws, that will be enforced in the same way as the laws of this nation follow the national laws. The solution of this problem, he continued, will come through education, the training of the young men and women, and the boys and girls today, to become "100 per cent American" men and women, who can be developed to handle the great problems that now confront the world.

With respect to the possibilities in the American youth, Chancellor Bradford predicted that with proper educational advantages and environments, it would be easy to bring a president of the United States within 25 years, and also a governor for every state in the union.

Home training was also spoken upon by the noted educator with much seriousness. If this is developed, he said, along the lines of the individual needs of the child, it would do much to bring about the brotherhood of man in connection with home training, with this point in view, the speaker said that individual attention was also needed by the child in the schoolroom and if he could have his way, no teacher would have more than 15 pupils, instead of 40 or 50, as they do at the present time. Careful home training through the smaller classes, he declared, would be incomparably more important than the question as to whether or not such a step would increase taxation.

PRICE OF HORSES SOARS

Pocatello, Ida., Nov. 15.—Several cases of heavy horses raised through here yesterday on the way to Canada. They were purchased by a representative of the Canadian government from the western part of the state, most of them coming from Caldwell. An agent of the same country is buying in the Salmon river section and the price of good horses has advanced as a result.

Lime Starvation Causes Tuberculosis

The Medical Record (New York) of December 18 1909, contains an article on "The Treatment of Pulmonary Tuberculosis, Based on the Assumption That the Dietetic Cause of the Disease is Lime Starvation," by Dr. John F. Russell, who says: "The condition which is recognized as preceding the active development of tuberculosis in the adult may be considered as due to lime starvation. Among inorganic substances lime salts appear to be of special physiological importance, but if the salts are not in organic combination it is difficult to suppose that the cells can appropriate them for food."

Years of widespread use confirm us in the belief that the success of Eckman's Alternative in cases of pulmonary tuberculosis (consumption) and chronic throat and bronchial troubles is due in large measure to its content of lime, so combined with other ingredients as to be easily appropriated by the cells.

Doubtless, you had much to do with the results obtained in many cases of these affections, which appear to have yielded to Eckman's Alternative.

As it contains no opiates, narcotics or habit-forming drugs, it is safe to try. Your druggist will order it for you or you can send direct. Eckman Laboratory, Philadelphia.

ROUND MOUNTAIN TO WORK PLACERS

The Round Mountain Mining company, the properties of which are located at Round Mountain, Nev., is preparing for an aggressive campaign next year, with plans for hydraulic mining on a large scale, says the Tonopah Daily Bonanza. The company has acquired water rights that will place it in a position to operate placers for five months continuously, with the expectation of more than quadrupling the annual gold output of the district. In doing this it will spend \$50,000 in building a pipe line eight miles in length.

James R. Davis, president of the Round Mountain Mining company, is very optimistic over the outlook which he says is the best in the history of the company. Now that the clouds of litigation have been cleared from the firmament it is proposed to go ahead and demonstrate what the company is capable of doing in the way of earning dividends. The company has opened what promises to be one of the richest bodies of ore in Nye county and, if the ledge holds out, it will be another means of adding to the earnings of the company. This ledge was cut on the 800-foot level east of the shaft and, after the first three rounds of shots had been fired, the ore broke down on an average of from \$20 to \$40 a ton. When it is understood that the mill heads of the Round Mountain company have been running at \$8 and \$9 and that the company has

been paying regular dividends from these values by treating 5000 tons a month, it may readily be seen what is likely to come from the richest values on the 800 level. President Davis is not making predictions until he is satisfied that the vein will hold out, as he is aware of spreading reports on the strength of what appears in a few feet of development.

The main working shaft has been sunk from 700 to 950 feet. At the latter depth ore is showing in the shaft with values ranging from \$3 to \$9. The 800-foot west drift has been connected with the Sphinx and an electric hoist is being installed for the purpose of developing the Sphinx at greater depth. The company is favored with a very desirable ore, as there is no cyaniding, and values are all recovered on the plates.

For the pipe line to Jet canyon the company has let a contract for 10,000 feet of ditch five feet wide at the top, forty inches deep and four feet at the bottom. This is to receive the pipe leading to Jet canyon, eight and one-half miles away, making a total of 44,000 feet of ditch to be constructed. The contract for the pipe has not been placed, but it is estimated that the cost of this installation will be between \$125,000 and \$150,000.

SENATOR HEARS COMPLAINTS

Pocatello, Ida., Nov. 15.—D. W. Church, president of the Pocatello Users' association, called a meeting today in order that the owners of land north of the city on the Fort Hall tract under the government ditch might meet Senator James H. Brady and inform him of their grievances. The maintenance fee was discussed by a number of the patrons in detail and several other matters taken up before the senator, who will present the case before the secretary of the interior upon his return to Washington.

PRESS CLUB MEETS

Pocatello, Ida., Nov. 16.—The Idaho Press club is in session here today in the Commercial club rooms. Delegates from the leading papers over the state are in attendance.

One Cause of Bad Complexion—the Cure

"Look at a section of skin under the microscope and you will readily understand why cosmetics generally injure the complexion," says Dr. H. Robert Mackenzie. "The skin, smooth as it looks to the naked eye under the glass exhibits a network of tiny holes, mouths of myriads of tiny canals. To keep the skin healthy these holes must be unobstructed, the perspiration and natural oil can have free outlet. Should the glands be blocked up with irritating particles, a common result of using powders and creams, Nature retaliates by causing sallowness, pimples, freckles and blotches.

"As a substitute for all cosmetics I recommend ordinary mercurized wax. It not only does away with the accumulation of impurities, also absorbing the dehydrated particles of surface skin. This produces a natural, healthy complexion. One ounce of this wax, to be had at any drugstore, usually suffices to rejuvenate the poorest complexion. It is put on nightly like cold cream and washed off mornings."—Family Physician—Advertisement.

OFFICIAL REPORT ON SALT LAKE VOTE

Salt Lake, Nov. 17.—Official totals of the vote cast for legislative candidates in Salt Lake county, as shown by the canvass, were announced yesterday, having been delayed owing to a clerical error discovered in making the additions.

George H. Dern, fusion candidate for the state senate, led the legislative ticket with a total vote of 18,176. Frank Evans, also elected to the state senate on the fusion ticket, was next with 17,836. Fusion candidates for the lower house received the following total vote in the county:

Elizabeth A. Hayward, 17,352; Lilly C. Wolstenholme, 17,051; D. B. Shields, 17,777; W. B. Ennis, 17,414; J. Louis Brown, 17,603; Theodore T. Burton, 17,664; George F. Goodwin, 17,746; Emil S. Lund, 17,132; Thomas P. Page, 17,489; Farley P. Christensen, 17,373.

On the Republican legislative ticket, Elias S. Woodruff received the highest vote with a total of 16,616. Clarence G. Bamberger and Oscar W. Carlson, Republican candidates for the state senate, received, respectively, 16,040 and 15,961 votes. Other Republican candidates for the house received the following vote:

Annie Wells Cannon, 16,253; Maude S. Gorham, 16,537; David J. Cook, 16,382; O. R. Dibble, 16,258; David L. Greene, 16,314; Herman Hill, 16,371; Gibson A. Marr, 16,240; George F. Wasson, 16,494; Louis R. Watts, 16,238.

The Socialist candidates polled the following votes: For state senate—John W. Sowers, 2265; John N. Schick, 2171.

For house of representatives—Geo. Roth, 2285; J. C. Williams, 2234; Alce Reitz, 2157; A. M. Spanton, 2251; W. M. Wesley, 2125; E. King, 2205; C. A. Reynolds, 2152; Nels N. Nelson, 2170; J. H. Reeves, 2187; C. L. Gray, 2189.
