CITY PAYS FOR USE OF LAND IN CANYON

Last evening M. E. Wilcox communicated to the board of city commissioners that the city could use a part of his premises on Wheeler creek for a diverting dam and other purposes connected with the water works system. If the city would furnish him fifty water connections for his resort, Mr. Wilcox said that the fifty connections would require the use of about ten gallons of water a minute. The matter was referred to the superintendent of water works, Mayor A. G. Fell.

City Attorney Valentine Gideon reported that he had arrived at a settlement with W. G. Wilson for the use of certain ground for right of way for the city pipe line in Cold Water canyon and across the canyon to make connections with the Utah Light & Railway company's conduit, for the sum of \$1450 and he asked that the amount be appropriated. It was so ordered. The agreement provides that Mr. Wilson shall have the use of a 3-4 inch water tap at the saw mill.

At the suggestion of Mayor Fell, the water works department loaned to the general fund, \$27,468.53, which was to have been used on the South Fork reservoir project. The mayor, in a written communication, stated that there is some litigation in the matter and that inasmuch as the waterworks fund has a surplus, the general fund should be aided in that amount. The transfer of funds was ordered.

CIGAR MAKERS ENTERTAIN AT BALL

Over five hundred persons attended the most successful dancing party yet given by the Cigarmakers local union No. 367. The affair was their ninth annual St. Patrick's day ball and was a real celebration. The guests were received near the entrance by committeemen and presented with handsome souvenir programs. As an additional favor, the ladies were presented with two miniature cigars—harmless and dainty mementoes—which were held together by strings of white and green baby ribbon.

The dance numbers, 28 in all, were printed on a background of green enclosed in a cover of white and the program of selected music was rendered in fine style by Salter's enlarged orchestra. OXYGEN HELMETS FOR SUBMARINES

Washington, Mar. 18.—The navy department has ordered a small number of oxygen helmets to be supplied to the submarines and to all the battleships which use crude oil as fuel. In the case of the submarines, it is believed the helmets may be efficacious when poisonous gases are accidentally generated within the hulls, as happened to one of the submarines two years ago with disaster results. The great oil tanks in the battleships have been found to contain deadly oil fumes, after they have been emptied of their contents and it is intended that the helmets shall serve as protection to the mechanics who are obliged to enter these tanks and compartments. Their use also is contemplated in the rescue of firemen of boiler tenders overcome by bursting steam pipes.
