## PRISONERS RUSHED OUT OF JAIL THIS MORNING

A wholesale jail delivery, with county deputies aiding the prisoners to leave their cells, was registered this morning at the court house when a balky water heater in the county jail bath room started pouring thick volumes of "poison gas" into the cells and corridors. The fumes were so thick and stifling that the jailer and several deputies had to open several of the cells and allow the prisoners confined to get out and go to positions where the smoke was not so thick. Many of the prisoners for a time thought the place was afire.

"The problem of music in the home is solved when the singing of the greatest artists is made possible by an instrument that does not betray itself in the very presence of the artist."

### Globe-Democrat

"None in the audience was able to distinguish when Miss Case ceased singing, except by observing that her lips did not move. The union between the tones of her voice and the reproduction on the instrument was so remarkable that trained ears could not detect the slightest difference."

### Post-Dispatch

"The test convinced many skeptics of the triumph of Mr. Edison's genius in re-creating the human voice in all its naturalness."

## Let Us Prove It to You

WE WANT you to hear this wonderful new instrument, which the New York Globe calls "the phonograph with a soul." After you have heard it, we are sure you will not be satisfied with a talking machine. Let us prove through your own ears that the New Edison does literally Re-Creat all forms of music.

NOTICE: Please do not ask us to sell you Edison Re-Creations if you intend to attempt to play them on any other instrument than the New Edison. No other instrument can bring out the true musical quality of Edison Re-Creations. ## COUNTING FUEL COST? THAT REALLY COUNTS

### THE RENOWN UNIVERSAL

After thinking over every phase of stove construction, you come to that certainty that you desire one that will give entire satisfaction, will save labor and save fuel—for that means money saved. We are willing to have the stoves that we handle stand comparison on these points. Make us prove our assertions that give the greatest amount of heat for the least amount of fuel, that they are money savers and labor savers, that they hold the fire better than other heaters, that they burn any fuel with perfect combustion and are especially adapted for soft coal and even for soft coal slack.
