

WOMAN SLAIN BECAUSE SHE KNEW LEADER

United States Government Asks Mexico to Take Action in Case

WASHINGTON, July 3.—Mrs. Thomas Choney, the Mexican born wife of an American employed by an American company operating in the Tampico region, was killed by Mexican bandits June 29, when she recognized their leader, according to the report to the state department from Consul Shaw at Tampico. As Mrs. Choney is an American citizen by marriage, the department made immediate representations to the Mexican government recommending that the murderer be apprehended and punished.

OWNERS AND MINERS STILL FAIL TO AGREE

(Continued From Page One)

pany with Secretaries Hoover and Davis. Prior to the meeting it was evident that the operators intended to force some sort of a conclusion today without yielding to their refusal to meet the union for the purpose of making up a national or semi-national wage scale. From the views of John L. Lewis, president of the United Mine Workers it was evident that the miners considered it necessary to prolong the strike rather than agree to negotiate for district wage scales.

READY TO OPEN MINES

At a lengthy meeting by themselves the bituminous operators representatives prepared a resolution incorporating their views and though its details were held confidential, it was understood that if the joint conference broke up today the operators determined to open a large number of union mines in former union territory on a non-union basis on Wednesday. The principal purpose of the opening was a 1900 ton daily capacity mine of the Pittsburg Coal company in Pennsylvania.

OTHER MINES SELECTED

Various other mines in strategic points throughout the central coal field were also understood to be selected for immediate operation. The old wage scale calls for a base wage of \$7.50 per day underground while the mines that will open are expected to offer to miners the 1917 scale, which has a base of about \$5 a day underground. Both the union officials and operators seem to be fully informed of each other's determination and the only doubt remaining concerned the government's proposal.

WILL ENFORCE LAW ON ANTI-PICKETING

TOPEKA, Kans., July 3.—Immediately following reports of picketing of the Santa Fe shops here this morning, the judges of the industrial court went into conference with Adjutant Charles I. Martin. The adjutant general's department has been made an intelligence bureau on the strike situation. It was announced by Governor Allen, and prompt measures will be taken to arrest violators of the anti-picketing provision of the industrial

TWO FORMS OF WAVES FOR RADIO DESCRIBED

By PAUL F. GODLEY

America's Foremost Radio Authority. Modern radio practice calls for use of an undamped wave both for telephony and telegraphy. The use of a damped wave for radio telephony, although tried for many years, proved unsuccessful. But it wasn't until a short time ago that a wave was developed a method of economically producing an undamped wave.

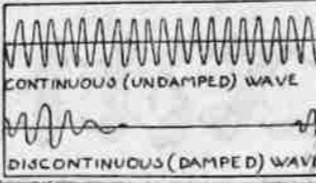

Diagram of Damped and Undamped Waves.

The fundamental difference between the two types of waves is readily grasped by glancing at the diagram. Damped waves are those produced by the intermittent introduction of energy into the circuit. The electrical system is "shocked" into oscillations and the "shocking" agent is immediately withdrawn, allowing the system to oscillate until the energy has been completely used up through radiation or resistance losses.

EYES FOCUSED ON 400,000

(Continued From Page One)

hand tentatively fixed 90 per cent as the maximum number of strikers among the 1,000 men of the Michigan Central, 1,000 shopmen who walked out Saturday were given until July 16 to return to work under the road's threat to close the shops permanently and have all work done in the east.

MAY CLOSE SHOPS

At Jackson, Mich., shops of the Michigan Central, 1,000 shopmen who walked out Saturday were given until July 16 to return to work under the road's threat to close the shops permanently and have all work done in the east.

Officials of the mechanical department of the Missouri, Kansas and Texas railway at Parsons, Kans., went into the roundhouse and took the places of the strikers. In some rail centers plans were made to open the shops immediately to reopen the big shops. Union and railroad officials agreed to settle the wage controversy by a system agreement which was expected to result from a conference in St. Louis today.

Little change was reported in the strike situation in the St. Louis district where officials and clerks took the places of strikers to do necessary repair work.

SERVICE IMPAIRED

Among the first reports of impairment of train service came one from Corbin, N. Y., which was that lack of motive equipment forestalled movement of 2,400 cars of coal in the yards. At Omaha union leaders claimed that more than 97 per cent of shopmen employed by the Union Pacific had joined the strike while company officials said that about 75 per cent of their shopmen had walked out. Union claims at other Nebraska points and at Sioux City, Iowa, were similar as to the number of men joining the strike.

GRAND CHARGE AGAINST NEGRO

BIRMINGHAM, Ala., July 3.—Ray E. Hayes, negro waiter on Louisville & Nashville Train No. 3, en route from Nashville to Birmingham, is in jail here on the charge of having attempted to assault a prominent young Montgomery, Ala., woman who was a passenger on the train.

SCHOOL BOY HUNCH MAKES LAD WIZARD OF WIRELESS

By NEA Service

NEW YORK, July 3.—A 24-year-old boy is the Henry Ford of radio. Less than a year ago Joseph D. R. Freed started the business with half a desk for an office and no money. But he had a good idea.

Today he is president of one of the largest radio corporations in the country, manufacturing a popular priced set.

POPULAR RADIO

"So I set to work and designed an instrument that could be sold at a price and yet be fundamentally sound in its construction."

"I took that set and sold it to clothing and department stores when there were telegraphic code messages flying through the air."

"But with the development of broadcasting last fall came the popularization that I expected."

And with it came success. For Freed kept up his experimenting. He took a special course in radio engineering at the College of the City of New York.

Today he is president of one of the largest radio corporations in the country, manufacturing a popular priced set.

How did he do it? By working out a hunch that he got as a school boy.

"While still a kid," he says, "I read about wireless, became interested and built a crude set. It is still working. Because it is mechanically sound."

There was no broadcasting in those days. But I was convinced that radio would become popular for reception was so easy and the possibilities so great."

With the advent of the vacuum tube and a small, cheap device which he has developed.

Freed's company was kept working over time trying to keep up with the demand for its sets.

"We had to devise special production methods," he says. "It was like turning out Ford automobiles."

The young radio wizard is now working on the construction of a popular priced combination vacuum tube and crystal detector set, a loud speaker without a horn, and a special type of radio frequency amplifier that will give radio reception a greater range.

Joseph D. R. Freed holding a regular size vacuum tube and a small, cheap device which he has developed.

THEATRES

Mary Pickford Pleases in Production Now at the Alhambra

You will laugh uproariously, and you will cry when you see Mary Pickford in "Little Lord Fauntleroy" at the Alhambra. And you will say that it is one of the greatest, if not the greatest, of photoplays ever shown—certainly the greatest cinema Mary Pickford has ever made.

In transcribing Frances Hodgson Burnett's famous story to the silver screen, Miss Pickford has established herself as the "Queen of the Screen" for the essence of the book version has been retained and the charm of Little Mary's interpretations pleases beyond measure.

In the lexicon of praise there are no words comprehensive enough to set forth the glory of this wonder play. Never in her career of superb work has Mary Pickford done anything so aptly.

Proaching her artistry in this production. The closest she ever came to it was in that masterpiece, "Stella Maris," in which, as in "Fauntleroy," she played a dual role.

Miss Pickford's presentation of the two characters, Dearest, the mother, and Cedric Errol who later becomes Lord Fauntleroy sets a new mark for things cinematic. Unquestionably this picture pushes the film industry ahead many leagues in fact, a new goal has been set for all other producers to strive for.

The story of "Little Lord Fauntleroy" is too well known to be repeated here. Suffice it to say that the Pickford adaptation adheres very closely to the Burnett plot, with the result that none who has read the book will take offense at the play. What is more, Mary Pickford is a decidedly boyish "Lord Fauntleroy," curls and all. One actual forgets she is a girl. She proves herself a consummate artist by her splendid interpretation of this role.

And her work as Dearest, a superb feminine role, when compared with the boy part, represents the greatest contrast ever pictured for the screen.

Lagoon to Have Thriller Flights for Fourth Celebration

It is a far cry from the first crude airplane flights achieved by the Wright brothers about fourteen years ago, to the thrilling aerial circus, with its death-defying stunts performed thousands of feet in the air and at breakneck speed, which will be shown at Lagoon tomorrow afternoon and evening.

Lieut. Pangborn, one of America's most fearless pilots, will show what it looks like to see a plane flying with its wheels pointing skyward, and its pilot's head pointing earthward. He will be strapped in, of course, and cannot fly in this position very long on account of the rush of blood to his head.

Diavolo, the master dare-devil of the air, will have the spectators spellbound with his "aero-batics" on different parts of the speeding plane. Among the stunts he does is standing on his head on the outer edge of a wing tip.

After dark tomorrow night there will be seen what is perhaps the most awe-inspiring sight ever witnessed in this part of the country, when Lieut. Pangborn will fly with a load of fireworks on his ship. One actual achieves a certain altitude he presses a button which sets off the fireworks. The streaks of fire are traced in the heavens, trailing the speeding plane, and after the performance Pangborn is left to effect a safe landing as best he can.—Advertisement.

FROM INFANCY TO LIFE'S SUNSET TANLAC BRINGS HEALTH AND HAPPINESS

Nature's Blessings Are Open to All, and It Seems Inexcusable for Anyone to Remain a Miserable Weakling When This Great Medicine Is Restoring Vim, Vigor and Abundant Vital Energy to Hundreds All Around Them Every Day.

TANLAC Vegetable Pills are an essential and vitally important part of the Tanlac treatment.

The foundation of health is laid during the early years of life.

From the tiny toddler with foot hesitantly placed upon the bottom-most step, to the venerable grandfather at the top of Life's stairway, Tanlac is praised by all for the vim, vigor and abundant vital energy with which it blesses each step.

The earlier in life that one begins the use of Tanlac, the better equipped will that person be to cope with the vicissitudes of this existence. By preparing the digestive system of the younger Tanlac smooths the path and insures health and strength through all the years ahead. We cannot forget that the foundation for good health in our advanced years is laid during the early years of life.

How sad it is to see men and women by the thousands going through life with less than half of the vigorous health, strength and capacity for the enjoyment that is their birthright. And how much sadder it is to know that all their sufferings and lack of happiness are due to their own failure to take advantage

of the blessing that Nature offers to all. When one looks upon a weak, worn out, faded, debilitated man or woman and reflects that all this may be readily and satisfactorily changed merely by the use of Tanlac if only that poor mortal knew it, one feels like spreading the message of hope and joy that Tanlac brings in the sharpest and clearest handwriting that none may overlook!

Are YOU as strong and healthy as you should be? Have you that abundant vital energy that enables you to laugh at disease and to overcome the ever-present obstacles in the path of your happiness? Does your food give up to you its rich stores of vitality, or does it pass through your digestive system without supplying you with much beyond the poisons formed through its decomposition?

Take this under your serious consideration and answer these questions for yourself. Then if the answers are unsatisfactory, so to any drug-gist and purchase a bottle of Tanlac and you, too, may become strong and healthy with the energy and vitality to accomplish your desires just as so many thousands of others have publicly testified were the results they obtained from taking Tanlac.

Tanlac is sold by all good druggists.

SENATOR M'CUMBER DISCUSSES DEFEAT

WASHINGTON, July 3.—Senator McCumber, Republican, North Dakota, in a letter made public by him today

described his defeat for re-nomination in the North Dakota primary to "the bi-partisan combination which had been made against me on the one side and the non-partisan organization, which, so loyally supported my opponent."

ADVERTISE FOR MEN. SAN FRANCISCO, Calif., July 1.—The Southern Pacific, Western Pacific and Santa Fe railroads advertised today for men to take the place of their striking shopmen. The Southern Pacific also advertised for men to guard duty.

MEN WANTED

FOR SERVICE AS RAILROAD MACHINISTS, BOILERMAKERS, BLACKSMITHS, ELECTRICIANS, SHEET METAL WORKERS, PIPEFITTERS, COPPERSMITHS, TINNERS, CAR INSPECTORS, CAR REPAIRERS, HELPERS—ALL CLASSES.

Under strike conditions best explained by Chairan Ben W. Hooper, of the United States Railroad Labor Board, in his statement of July 31, reading as follows:

"In the past a man who took up the work of another who was on strike against wages and working conditions was termed a scab or a strikebreaker—terms to which much approbrium was attached. In the present situation created by the strike of shopcraft workers—men who assume the work of the strikers cannot be justly reproached with such epithets. This is not a customary strike in which the employer tries to impose upon the employe unjust wages and unreasonable working rules. In this case the conflict is not between the employer and the oppressed employe. The people of this country, through an act of Congress, signed by President Wilson, established a tribunal to decide such disputes over wages and working conditions, which are submitted to it in a proper manner. It is the decision by this tribunal against which the shop crafts are striking. Regardless of any question of the right of the men to strike, the men who take the strikers' places are merely accepting the wages and working conditions prescribed by a government tribunal and are performing a public service. They are not accepting the wages and working conditions which an employer is trying to impose. For this reason public sentiment and full governmental power will protect the men who remain in their positions and new men who may come in."

Adequate provisions have been made for the full protection of all new employes, the same as old employes who have remained loyally at work. Applicants should apply at the offices of the Superintendent at Ogden or of the Assistant Superintendent at Sparks.

J. H. DYER, General Manager, Southern Pacific Company. R. E. KELLY, Representative Executive Dept., S. P. Co., 750 S. P. Bldg.
