

# The Machines That Have Broken Every Typewriter Record

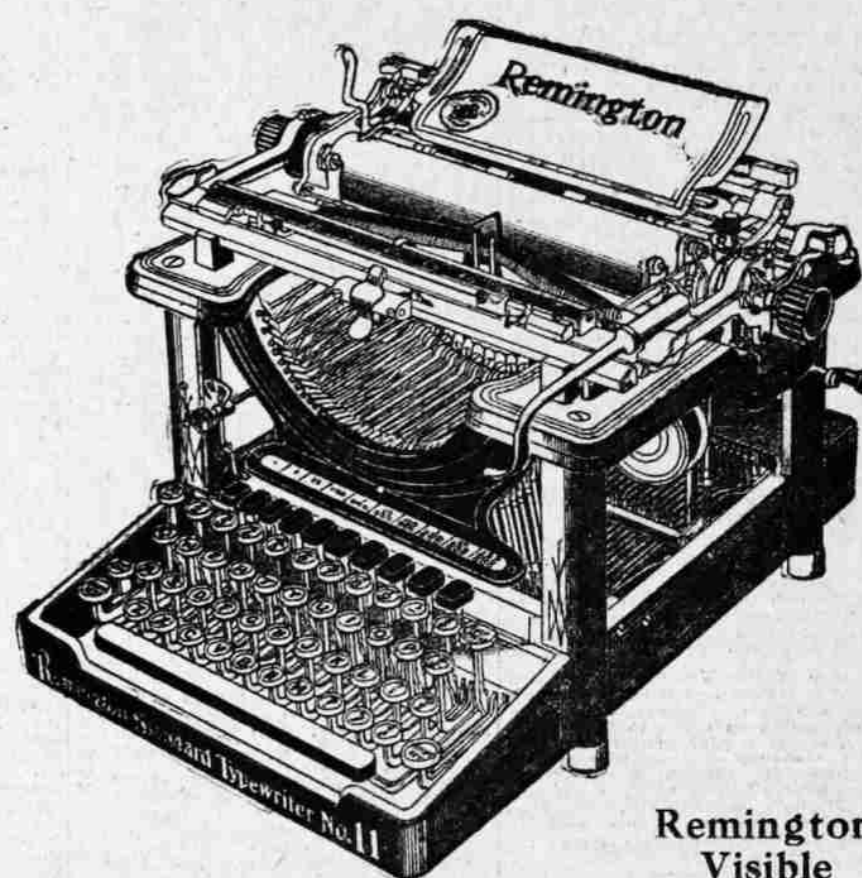

All that is great in Remington history, all that is supreme in typewriter history, all that makes for the best service in a writing machine, all the strength and durability of former Remington models---and more, new and remarkable improvements hitherto unknown to the user, are contained in the

# Remington Typewriter Visible Models 10 and 11

Remington Visible Model 10

The sales of these visible Remington models in the few years since they appeared on the market have been as unparalleled as their quality—**surpassing by an immense total all previous records in typewriter history.** Every month brings fresh Remington triumphs; every month adds thousands of satisfied Remington users; every month confirms the enduring supremacy of the

Remington Visible Model 11

## Recognized Leader Among Typewriters

### Special Features of the Visible Remington Models

**New Escapement**—The greatest single advance which has ever been made in the mechanics of the typewriter. This new escapement insures a speed and lightness of action which are absolutely incomparable. It is also remarkable for its simplicity and the ease of all adjustments.

**Variable Line Spacer**—Vastly improved by a new locking attachment.

**New Carriage Release System**—Complete and perfect. Two release levers, convenient to either hand.

**New Column Selector (Model 10)**—An absolutely new feature on a writing machine—one which is unsurpassed as a time and labor saver. The unique merit of the column selector is that the carriage can be brought instantly to any of several starting points. In other words, it skips columns at will.

**New Back Spacer Key**—A grand feature. Saves time and labor a hundred times a day.

**New Key Levers**—Of improved shape and design. A factor in the splendid key action.

**New Built-In Decimal Tabulator (Model 11)**—Another new and notable advance in typewriter mechanics. The decimal tabulator on Model 11 is not an attachment but is built into the machine, forming an integral part of its mechanism.

**New Marginal Stops**—Of improved design and conveniently located in front of the operator.

**Automatic Ribbon Movement**—Unrivalled for reliability and efficiency. Built throughout on Remington principles, including the gravity principle of automatic reverse.

**New Set Key for Built-In Decimal Tabulator (Model 11)**—Does away with all loose stops. The operation of this key sets the tabulator instantly, for any kind of form or tabular work.

**Type Bars**—Drop forged bars of proved Remington strength. Bars hung in double row. Broad pivot bearings. The type bar construction is a famous and exclusive Remington feature now incorporated for the first time in a front stroke machine.

**New Carriage Governor**—Removes all jar or strain on the carriage in connection with the operation both of the Column Selector and the Built-In Tabulator.

**New Paper Guides**—Of unparalleled simplicity and efficiency. They adjust themselves automatically to any thickness of paper.

**New Carriage**—Moves on "V" shaped roller bearings and is unrivalled for ease and lightness of action.

**New Paper Feed**—The very acme of perfect control. Paper of any shape or any size, from that of a postage stamp to the full capacity of the cylinder, may be fed from any angle, with perfect accuracy, and any part of the paper, from the top to the bottom edge, may be written upon with equal ease.

**New Two-Color Dial or Indicator**—A most attractive and popular feature. The mechanism connected with this dial also provides a transverse ribbon movement.

## THE REMINGTON Adding and Subtracting Typewriter

(WAHL ADDING MECHANISM.)

The capstone of all typewriter achievement is the visible Model 11 Remington, with Wahl Adding and Subtracting Mechanism. This combined machine adds while it writes, or subtracts while it writes, or does any kind of writing alone. The change from one to another is instantaneous, and entirely at the will of the operator.

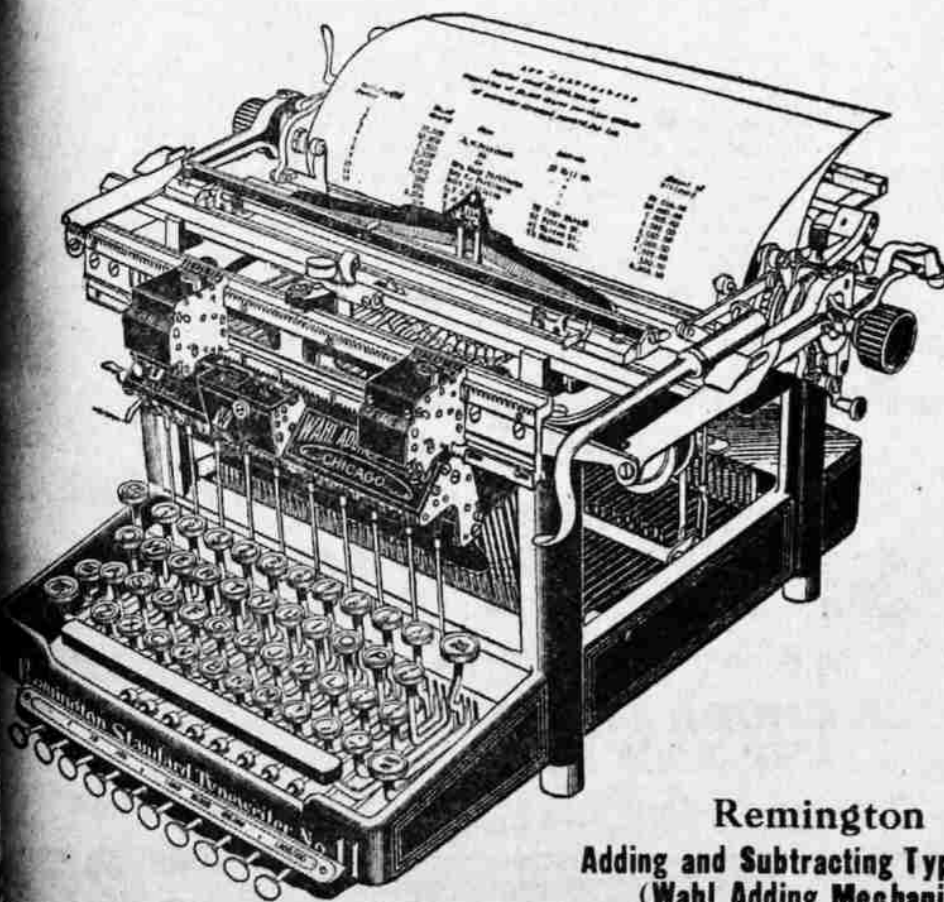

The Remington Adding and Subtracting Typewriter serves the combined fields of the writing machine and the adding machine, which fields include every phase of billing, accounting, financial and statistical work. Wherever there is writing and adding to be done on the same page, there is urgent need for this machine.

Plain type is inadequate to tell you all about this wonderful new appliance. You cannot possibly appreciate its unfailing accuracy, its labor- and time-saving capacity, its simplicity of operation and all its other manifold advantages until you see them demonstrated. A Remington salesman will be glad to demonstrate the Adding and Subtracting Typewriter on your request.
