**ABOUT DRUGS**

There are two classes of druggists and two kinds of drugs that are sold to the public.

1. The druggist who is altogether on the "make" and who sells cheap and stale drugs at full prices.
2. The druggist who is on the "square" and who sells only pure and guaranteed drugs at no increase in price.

This drug store is on the "square" in its every sale and its every act. There are no cheap drugs in our stock, and no stale ones, and we never substitute.

When you bring a physician's prescription to this store you get exactly what that physician intends you to have—no more and no less.
