CUTTING AFFRAY

Andy Wilson, of East Stone Gap, was severely cut with a knife about the head and neck last Wednesday afternoon by Kelly Stidham at the latter's home near Motter's store in Clark's Fork. Wilson was brought to the office of Dr. Plummer & Baker at this place and his wounds were treated and it was feared for a while he could not recover, the wounds being of such a serious nature. One slash of the knife cut a deep gash around the back of Wilson's neck and almost reached the jugular vein, while another was found on his head and a deep stab in the back.

It is reported here that the trouble arose over a quarrel that Stidham had with Wilson's brother several days previous, and that Wilson went to the home of Stidham to settle the affair. They came to blows in the house and resulted as above stated.

A delightful party was given at the home of Mrs. Vic Hill Saturday night, February 21, in honor of little Miss Pearl Hill's eighth birthday. When the honoree entered the room, all the members of the party clapped their hands eight times, and then the merry games began. The young folks played until they were tired, then Miss Nora Wells served delicious candy. After this refreshment, the gay crowd was ready to again indulge in games. A little later hot chocolate and cake was served by Mrs. Hill to the jolly bunch, and then as the hand of the clock pointed to 10:30, reluctant good-byes were said while they wished little Miss Hill happy returns of the day. Many beautiful gifts received by the little honoree, showed her popularity.

Those who were fortunate enough to be Mrs. Hill's guests were: Misses Thelma Hood, Stella Wells, Edith Wampler,

They couldn't be built now for twice \$71,000

When the talk turns from politics to railroads, and the traveler with the cocksure air breaks in with, "There's an awful lot of 'water' in the railroads," here are some hard-pan facts to give him:

American railroads have cost \$80,900 a mile—roadbed, structures, stations, yards, terminals, freight and passenger trains—everything from the great city terminals to the last spike.

A good concrete-and-asphalt highway costs \$36,000 a mile—just a bare road, not counting the cost of culverts, bridges, etc.

Our railroads couldn't be duplicated today for \$150,000 a mile.

They are capitalized for only \$71,000 a mile—much less than their actual value. Seventy-one thousand dollars today will buy one locomotive.

English railways are capitalized at \$274,000 a mile; the French at \$155,000; German \$132,000; even in Canada (still in pioneer development) they are capitalized at \$67,000 a mile. The average for all foreign countries is \$100,000.

Low capitalization and high operating efficiency have enabled American Railroads to pay the highest wages while charging the lowest rates.
