## How to Buy An EASY CHAIR

You don't spend much time sitting about the house in easy chairs during the summer. You want to be out of doors.

But now the fall season is at hand, and as the evenings get longer you will spend a good deal of time inside the house.

The best time to buy an easy chair is now, not only because our fall stock is bigger and more complete but because you get the maximum value out of your purchase from the very first day it arrives.

Don't put off buying an easy chair for several months until half the winter is gone. Be comfortable now. If you want to pay for your chair during the fall months we will arrange the terms to satisfy you.

## The New Scientific Frying Pans!

Eliminates all the disagreeable features found in cooking certain kinds of food.

#### WHY?

Because these Frying Pans are smokeless, greaseless, odorless and is guaranteed to cook and nicely brown anything cooked in them quicker than any frying pan on the market.

#### THE REASON

The flue in the pan carries off all the smoke, odor and steam from the room. The out-flared portion on upper edge keeps grease from flying over the stove and floor. Then the locking cover which keeps the cover up while you turn over what is being cooked, renders it the most convenient and practical Fry Pan to-day.

See our display and learn more important advantages by the use of these Frying Pans.

H. J. Woodward, manager of the Barre Medium Quarry company's office in the Aldrich building, intends to spend the greater part of his spare moments during the coming season of snow, applying his time to the perfection of a wireless apparatus at his home in Montpelier. Mr. Woodward graduated from Norwich university last June with honors in the electrical engineering department. In his four years at the Dog river educational institution, he was closely affiliated with electrical organizations and during his last year at the school he was appointed to the highest electrical office in the school, master chief electrician, being in full charge of the various wireless devices. Mr. Woodward will be occupied with his task for some time and anticipates installing the apparatus on some high point in the close vicinity of Montpelier, so that the construction of the aereos will be facilitated, and the means of transporting electrical current will be feasible. When the work is completed, Mr. Woodward asserts that he will be able to communicate with any part of the land east of the Mississippi river, having the means of transmitting, as well as receiving.
