

8225 homes will be kept at 70° this winter by Nokol

This is a literal statement of fact. For in every one of the 8225 Nokol homes an even temperature will be automatically maintained, no matter what the weather. We know this because Nokol has served for 5 years now; we have the owners' word for the superlative service Nokol has rendered.

Nokol means a lifetime of scientific heating, not an experiment with a heating device. It removes the human element from your heating; it is as certain in operation as your electric light and requires hardly more attention.

Nokol does away with the uncertainty, drudgery and dirt of coal heating; cold rooms in the morning, banked fires, noisy grates, carrying out ashes. It does away with smoke, soot and dust. A Nokol basement is as clean as a living room.

And Nokol is not expensive. With the present prices of coal and oil it costs much less to operate than a coal furnace. Nokol is an investment that will make you paying returns year after year for all your lifetime.

Nokol burns oil in your present heating plant and does away forever with the uncertainty, dirt and drudgery of coal heating. Nokol can be installed in any type of home heating plant—steam, hot water, vapor or hot air—without alterations. Nokol operates automatically—the temperature is perfectly controlled by a thermostat.

Mrs. Vincent Jones is to spend Christmas with her brother, Harper Pickel in Farnham.

Newport Man In Warning to Vt. Villages

Continued from Page One
Bond and Share Company offering to the public \$5,000,000 6 per cent cumulative preferred stock and which by the way the circular states is "free from present normal Federal Income tax." I have underlined the word present. It is further stated that the business of this company is to buy, hold and sell securities issued on the properties of electric power and light and gas enterprises, that it acts as fiscal agent and supervises the operation of companies controlling and operating such properties, that all the outstanding common stock is owned by the General Electric Company, amounting to \$16,250,000. The amount authorized to be issued is \$20,000,000. Permit me to direct your attention to the fact that in the first instance the General Electric Company sells in Vermont its electrical products after which it supervises the operation of its products and we pay the bill. What is going to be the ultimate result of the development of our water powers? We are all familiar with our abandoned farms and in one instance I have seen an abandoned village. A large share of the blame for past abandonment of farms I have laid to our present centralization of schools; the village in question I was told was abandoned for the same reason. But today I believe we are confronted with more abandoned villages and the blame will not be laid to our school system but will be charged to the present development of water power. This prophetic explanation, it is this. Today the plan seems to be to take and develop a water power in a small village for the benefit of a larger community. The new company will agree with the present owner of the water power who is today using it, say for a grist mill, that they furnish him enough power to run his mill for five years without charge. At the end of five years what is going to happen? In all probability the charge for the use of electric current will be so high as to be prohibitive and your grist mill or other local industry will go out of existence. I firmly believe in this possibility as an actuality unless remedial legislation is enacted. Our next Governor has stated that the power of our Public Service Commission should be enlarged. If it is the Commission may see to it that such a possibility does not become a fact. Doubtless you will say all this may sound well and that I am right but how does it concern the Village of St. Johnsbury. It concerns St. Johnsbury as it concerns many other municipalities located on a line of railroad that serve the villages not so advantageously located, and as I write this I have in mind the fact that Vermont is primarily an agricultural state. There is no other state in the Union which can raise per acre what we can both as regards quantity but quality. We are not an industrial state, our timber has been early all cut altho considerable quantities of pulp wood and hardwood remain.

My thought about preserving local industries in our small villages may seem inconsistent with my statement that Vermont is an agricultural state, however, the fact remains that the small communities mean cultivated farms, at least it has in the past and ought to hold true today and for that reason it seems to me that it ought to be the policy of the state to encourage rural life rather than discourage it and without any fixed policy it would seem that with the automobile, the telephone and electricity, the farm and small village ought to prosper. I have already written much more than intended altho I had in mind an explanation of what the fixing of a freight rate, a telephone rate or an electric light rate means. It would date back to 1892 when Justice Brewer of the United States Supreme Court wrote the opinion in Chicago and C. T. R. Co. v. Wellman 145 U. S.

"FRUIT-A-TIVES" CURE HEADACHES

Because it is a Fruit Medicine made from Fruit Juices

GEORGE H. SCOTT

WHITFIELD, NEW YORK. "In 1912, I was attacked by Severe Headaches, coming on at intervals of two weeks, and lasting two days and two nights.

I tried seven different kinds of pills. One day while in Burlington, Vermont, I found an empty "Fruit-a-tives" box. I saw it was a fruit medicine, made from fruit juices, and useful for liver complaint; and I came to the conclusion it was my liver that was causing my Headaches.

I procured a box of "Fruit-a-tives" or "Fruit laxo Tablets" and waited results. The headaches did not materialize until the third week; and have never had a headache since and that was four years ago."

GEORGE H. SCOTT

50c box, 6 for \$2.50, trial size, 25c. At dealers or from FRUIT-A-TIVES Limited, OGDENSBURG, N.Y.

and 339, said, "The legislature has power to fix rates, and the extent of judicial interference is protection against unreasonable rates." To use the word fix is misleading, to adjust would be better, since in Missouri Pacific R. R. Co. v. Tucked, 230 U. S. 340, the court there said, "If the law be such as to make the decision of the legislature or of a Commission conclusive as to the sufficiency of the rates, this court has held such law to be unconstitutional." In my letter I used the word fix literally, since the people are in this country supposed to be sovereign and when they elect a legislature it is simply a delegation of their power which in turn the legislature can delegate to a commission, and I am reminded of what Mr. Justice Bradley of the United States Supreme Court once said in an opinion he wrote, that he had heard a great deal of argument about property rights but very little about individual rights.

Yours Very truly,
WARD PROUTY

Troubled With Weak Kidneys

"Have been troubled with weak kidneys since childhood," writes Mrs. G. Hyde, Benzonia, Michigan. "Now past forty and have had terrible backache and that tired out feeling, hardly able to do any work. By using Foley Kidney Pills accompanied with Foley Cathartic Tablets I soon felt like a new person." Backache, rheumatic pains, dizziness and blurred vision are symptoms of kidney trouble. Foley Kidney Pills give quick relief.—Advertisement.

Brunelle Paint & Auto Co., Inc.

The Christmas Message

"Good Tidings of Great Joy"

Fear was turned into joy by the Advent of Jesus Christ. Christianity is a religion of joy. It was good news to the slave, to the workman, to the child. It began with a song out of the sky and earth soon began to vibrate in sympathy with the angelic music. The Advent reveals God in a joy-giving way. God made flesh—that is the sovereign remedy for the world's fear. The Advent reveals man in a joy-giving way. In the face of Christ we see what man is capable of becoming. God became the Son of man, that man might become the child of God.

The following churches invite you to worship tomorrow

IN THE JOY OF CHRISTMAS
