You can't make any storage battery last forever—that's a fact.

You've got to keep it filled with water and test it, just like a tire has to be kept filled with air, or it will cost you money.

Some day—if you have an ordinary battery—it's sure to have to be re-insulated, no matter who made it.

But—if you'll buy a Willard Battery with Threaded Rubber Insulation, you'll get clear away from the biggest cause of battery troubles. The insulation will probably last as long as the plates.

Drop in and ask us any question you can think of. We're here to give you the kind of help, service and advice that make friends.
