

# WRIGLEYS

## "After Every Meal" Everywhere

All over the world people use this goody for its benefits, as well as its pleasure.

Keeps teeth clean, breath sweet, throat soothed.

Aids appetite and digestion.

STILL 5c

### Sealed Tight - Kept Right

#### NEWBURY

Mrs. Emily Watkins, Old Resident of Town, Dead.

Mrs. Emily Tenney Watkins, deceased, was the widow of the late Dr. Eustace Virgil Watkins of Newbury; she was the daughter of Dr. Ira Tenney and Sophia Hazen Tenney of Hartford, where she was born on Jan. 31, 1828, and at the time of her death on last Tuesday, Feb. 1, she had just passed her 92nd birthday. She was married to Dr. Watkins on April 14, 1851, and came at once to Newbury to reside, where her husband had begun the practice of his profession a few months before and here they continued to reside until her husband's death in 1888, and since then, while she has spent a part of the time with her children residing elsewhere, she has always kept her home here, returning for a part of each year. During recent years she has been the large part of the time, with her daughter, Mrs. Edwin A. Bayley of Lexington, Mass., Mrs. Watkins was a woman of remarkable strength of body and mind, her memory of dates and facts being particularly strong, and until the last few months she took as active an interest and enjoyment in life as most people do at 60 or 65. When past 80 years old she took a two months' trip to California, stopping at various places of interest on the route, all of which she keenly enjoyed. She had also taken much pleasure in automobile riding and even last summer she made the trip from Lexington to Newbury and return by automobile without any apparent discomfort. Of her four children, one, George Tenney, died in childhood; the others survive her and are: Mrs. Albert W. Silsby of Newbury, Mrs. Edwin A. Bayley of Lexington, Mass., Dr. Harris R. Watkins of Burlington, Mass., Mrs. Owen Morgan of Hartford, Conn., Mrs. Edwin P. Buchanan of Pittsburgh, Pa., and Eustace Virgil Watkins of Burlington, and also two great grandchildren, Richard and William Morgan of Hartford, Conn. Mrs. Watkins died at Hotel Westminster, Boston, where she had spent the winter for several years with Mr. and Mrs. Edwin A. Bayley. Her funeral service was held at the hotel and was conducted by Rev. Christopher W. Collier, pastor of Hancock Congregational church of Lexington, and the burial was in the family lot in the Oxbow cemetery, where the committal service was conducted by Rev. Henry S. Tees, pastor of the First Congregational church of Newbury, of which Mrs. Watkins had long been a member. There gathered round the grave of this estimable woman many of her old time friends and associates who came to show their love and respect for the de-

ceased, as well as express their sympathy for her children who mourn the loss of the companionship of a mother, gone before.

"Green be the turf above thee Friend of my better days; None knew thee, but to love thee Nor named thee but to praise."

Mr. and Mrs. L. M. White entertained his daughter, Mrs. F. H. Rider of Fitch Bay, Quebec, and his son-in-law and daughter, Mr. and Mrs. E. P. Ware of Newport, over the week end. On Sunday Mrs. Rider added much to our church service in the morning by rendering the solo, "Come ye Blessed," and kindly consented to sing in the evening, "Praise ye the Lord" and "The Lord is My Shepherd." The sweet voice of this gifted singer brought back to a few in the audience the days of Jenny Lind and won many friends for the daughter of our townsman, L. M. White. May his children visit him often and may they plan to spend the Sabbath, too, is the wish of the Newbury people.

The many friends of Mrs. Susan Scorton will be pleased to learn that she is on the gain after weeks of critical illness.

Rev. Orrin W. Brock and his daughter, Mrs. Eva Holt, were called to Lowell, Mass., last week by the death of Mr. Spaulding, a brother of Mrs. Brock. Mr. Spaulding was a guest of his sister last summer and formed some pleasant acquaintances in our village during his stay.

The following letter, taken from the Pittsburgh Post (without permission), may be interesting reading to country merchants who give credit: "You rot me in respect to what I owe you. Please be patient. I ain't forgot you and I'll pay you when folks pay me. But if you ain't no more prepared on judgment day to meet your God than I am now to meet my debts, then you sho' bring it hell." That is a consoling letter, but it is better than no letter.

Warren W. Bailey, jr., is home for a few days, making things lively for all concerned.

George Edwards is now the sexton of the Congregational church in place of Levi Kelley, resigned. Now, may it be understood, the first man or woman who finds fault with his services, regarding the temperature, whether it is too hot or too cold, ventilation, draft or dust, can either get a new sexton or do the job themselves. Mr. Edwards has consented under protest. He has come to accommodate the committee, and is ready to throw up the sponge any moment. So if you have any complaints keep them to yourself or be prepared to take the job. Selah.

# Jiffy-Pie

## Real Lemon Pie—or Chocolate

All the ingredients come in the package. Simply add water, cook a little, and fill your pie. Lemon Pie contains the sugar, egg yolk, powdered milk, corn starch and tapioca. The lemon essence—derived from lemon peel—comes in a bottle.

In a quick, easy way it makes the most delicious lemon pie. Use for pudding and cake filling too. So with Jiffy Chocolate Pie. You will never make these pies in the old slow way when you once try Jiffy-Pie. Ask your grocer.

Made by the makers of Jiffy-Jell

## SAYS HUSBAND WAS MURDERED

### So Body of Richard Scott Lawrence Is Exhumed for Fourth Time

#### MONEY CALLED CRIME MOTIVE

### It Was Reported in 1918 That Lawrence Had Been Killed By Train

Madison, Wis., Feb. 8.—The body of Richard Scott Lawrence, former Denver political leader and later a resident of Madison, who is said to have been killed by a train on March 21, 1918, has been exhumed for the fourth time under the direction of Coroner Campbell. At the medical laboratory of the University of Wisconsin a pathological examination was begun to-day.

The exhumation is the first step in an investigation being conducted by District Attorney S. G. Lewis in response to allegations of the wife, Mrs. Rachel Lawrence, who deposes that her husband was not killed by a train but that his body was substituted in the vault at the cemetery for the mangled remains of an unidentified man who was presumed to be her husband at the burial.

She says that her husband was wealthy and intimates that his money furnished the motive for the mysterious death. It is said Lawrence carried with him a collection of diamonds, worth many thousands of dollars, and these were missing when his body was buried.

#### IOWA LEGISLATORS VOTE BY ELECTRICITY

### Simply Press a Key and Their Vote Is Recorded at Clerk's Office.

Des Moines, Feb. 8.—Representatives in the Iowa legislature vote their opinions on rollcall now with their fingers. No longer does the clerk call the roll and the member vote with his tongue.

One result of the change is a saving of 15 minutes to half an hour in taking a roll call vote.

When a question is put to a vote representative may vote at the same time. It is difficult for any to wait and see what someone else will do and let his vote follow.

Since the session two years ago an electrical voting device has been installed in the House, and already has been used. On each member's desk is a little device to which he carries a key. No two keys are alike. There are three small lights to show him how he is voting. When the question is put the legislator inserts the key, and then manipulates the voting device. What he does is recorded for his own benefit by the light on his desk, but shows on a board above the speakers' head. The members all are named on the board. Opposite the name are three lights and a slot. If his vote is "aye" a red light shows, and a "Y" appears in the slot. A blue light shows and the letter "N" for a negative vote. To merely be recorded present and not voting a white light is used.

Within 20 seconds after the voting is completed a photograph of the complete record on the board, taken automatically, is delivered to the desk of the clerk. In the meantime, however, the total has been flashed on the speakers' and clerks' desks, so the result can be announced immediately. The photograph is the state's record.

The machine is controlled by the clerk, who unlocks it and sets it when the vote is called for. As soon as completed he again locks the machine.

#### ST. JOHNS A HAVEN FOR DISABLED SHIPS

### Distressed Steamers Put in There At the Rate of One a Week.

St. Johns, N. F., Feb. 8.—This port has been a haven of refuge for more lame ducks among trans-Atlantic shipping in the past year than ever before. Distressed steamers averaged one for each week of the whole year, with a total of 52. Of these 27 were American, six British, three Dutch, 13 Norwegian, one Belgian and two Swedish.

The fact that American boats comprised more than half the total number was attributed by marine observers here to defects in construction and improper handling. There has not been a day for the past year than an American steamer has not been under repair here and at some periods as many as three or four were in port, mainly with engines out of order. In some cases these ships after having effected repairs and proceeding to sea have had to return for further attention because the engines again gave out shortly after steam was put on them.

The steamer Debon, a steel vessel, towed here recently from mid-ocean, after having lost her propeller, had suffered the same mishap on her previous voyage. Then she made the run to America, reloaded and started for England again, but off this coast last October lost her rudder, the whole structure dropping off as the result of a flaw in the steel. A new one was dispatched and fitted and then she proceeded to England, but on her way back a second propeller was thrown off.

Wooden ships have had manifold troubles. Two of them are lying in this port at present. The first, the *Fortuna*, was built in the southern states, and was proceeding to England with a cargo of timber when she went ashore on the coast. She was afterward refloated, repaired and put into commission as a local collier, but made such poor stowage that she has been laid up. The second is the *Bascom*, which last September loaded coal at Norfolk, Va., for Botwood, N. F., but in stormy weather began to leak and when off Cape Race was taken in tow, and beached to prevent sinking. She was pumped out and refloated and started for St. Johns, but went ashore again at Trepassay. She was once more refloated and towed here where tempor-

## Famous Old Recipe for Cough Syrup

Easily and cheaply made at home, but it beats them all for quick results.

Thousands of housewives have found that they can save two-thirds of the money usually spent for cough preparations, by using this well-known old recipe for making cough syrup. It is simple and cheap but it takes right hold of a cough and gives immediate relief, usually stopping an ordinary cough in 24 hours or less.

Get 2½ ounces of Pinex from any druggist, pour it into a pint bottle, and add plain granulated sugar syrup to make a full pint. If you prefer, use clarified molasses, honey, or corn syrup, instead of sugar syrup. Either way, it tastes good, keeps perfectly, and lasts a family a long time.

It's truly astonishing how quickly it acts, penetrating through every air passage of the throat and lungs—loosens and raises the phlegm, soothes and heals the membranes, and gradually but surely the annoying throat tickle and dreaded cough disappear entirely. Nothing better for bronchitis, spasmodic croup, hoarseness or bronchial asthma.

Pinex is a special and highly concentrated compound of genuine Norway pine extract known as "Pinex" for its healing effect on membranes. Avoid disappointment by asking your druggist for "2½ ounces of Pinex" with full directions and don't accept anything else. Guaranteed to give absolute satisfaction or money promptly refunded. The Pinex Co., Ft. Wayne, Ind.

## MOTHER!

### "California Syrup of Figs" Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you can be sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruit taste. Full directions on each bottle. You must say "California."—Adv.

any repairs were made and she is now about to be towed back to Boston.

It is expected that as a result of the decreased efficiency in shipping, continued during the war, there will be future years an increasing demand on the resources of the dry dock here and steps are now being taken for the addition of new machinery and equipment to enable it to cope with the expected press of business.

#### ENGLISH GIRL CUT OFF HAIR FOR GOVERNMENT

### In Her Patriotism She Went to Great Extremes to Help Out Financial Situation of Government.

London, Feb. 8.—An English girl has just set an example of patriotism to her sisters of this or other countries by cutting off and selling her hair. She is not only a patriot, but she is a patriot who helps relieve the financial situation. The girl's name has not been made public.

Her letter announcing her sacrifice as received at a government office reads:

"To help, even though in a very small way, the country in these financial difficulties, I have had my hair cut off and have sold it. With the money thus obtained I have bought war savings certificates which I have destroyed. The money is thus a direct gift to the country. If this could be published, perhaps many other girls would do as I have done and thousands of people would be encouraged to give up something that would benefit the country financially."

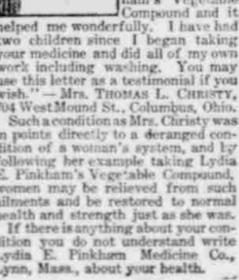

The letter was published, but emulators of the writer's example have not been heard. A reason may be found in a recent decree of hairdressers that "bobbed" locks are no longer fashionable.

## CONVINCING PROOF

### That Lydia E. Pinkham's Vegetable Compound Has Extraordinary Curative Power in Cases of Woman's Ailments

Columbus, O.—"I suffered very much pain during my periods and felt weak and all run down. I had many remedies and the doctor said I would have to have an operation. Then before my baby was born I had terrible pains in my sides. I took Lydia E. Pinkham's Vegetable Compound and it helped me wonderfully. I have had two children since I began taking your medicine and did all of my own work including washing. You may use this letter as a testimonial if you wish."—Mrs. THOMAS L. CHRISTY, 704 West Mount St., Columbus, Ohio.

Such a condition as Mrs. Christy was in points directly to a deranged condition of a woman's system, and by following her example taking Lydia E. Pinkham's Vegetable Compound, women may be relieved from such ailments and be restored to normal health and strength. It has been shown that if there is anything about your condition you do not understand write Lydia E. Pinkham Medicine Co., Lynn, Mass., about your health.

## SAVED COMRADE FROM DEATH

### Carried Unconscious Mountain Climber for Many Miles

#### ABOUT TO SINK, HE HEARD DOG

### Then Karl H. Robinson Pushed on With His Helpless Burden

Boston, Feb. 8.—Braving death from exposure and ice-coated precipices while lost on Mount Monadnock, N. H., at night during a week-end outing, Karl H. Robinson, a Boston university freshman, carried Rupert Robinson, a fellow student, to safety after the latter had been rendered unconscious by a fall. For many miles Robinson bore his stricken chum on his shoulders. He lost his way during the last hours of the journey and wandered a long distance through a forest. He was about to drop from exhaustion when he heard a dog bark. Guided by the sound, he pushed on until he reached a roadway.

Passing automobilists discovered the two students and Rupert Robinson, delirious and muttering, was rushed to Fitzwilliam, N. H., for medical treatment.

Karl Robinson is 18 years old and lives in Boston. Rupert's home is in Keene, N. H. They are not related. Both have returned to the university.

#### FEW EARTHQUAKES OCCUR INLAND

### Captive Steam Causes These Eruptions on Earth's Surface.

Much of the horror of earthquakes in the minds of average persons is due to ignorance of their cause. While knowing what causes earthquakes will not prevent the physical dangers which they effect, persons are naturally less terrified when the element of mystery is removed.

"All important earthquakes are due to steam pressure accumulating within or just under the earth's crust, which must have relief, whether by volcanic eruption, uplifting of mountain chains parallel to the sea, or the formation and movements of faults in the earth's crust," writes Prof. Thomas J. J. See in the *American*.

"The earth has a temperature of some 2,000 degrees Fahrenheit at a depth of less than twenty miles and the leakage of the earth's crust is well known. But in connection with the penetration of water we may recall the porosity of all rocks and even metals. Under sufficient pressure water has been forced through solid layers of gold, silver, lead, iron and steel, and under a pressure of 4,000 atmospheres Amalgam forced mercury through three inches of solid steel. The oceans are deep enough to give a pressure of about one thousand atmospheres on their bottoms, and as the water penetrates downward the pressure steadily increases.

"As Sir Archibald Geikie justly remarks, Dabree's experiments showed that owing to capillarity water may permeate rocks against a high counter pressure of steam on the further side, and that so long as water is supplied whether by minute fissures or through pores of the rocks, it may under pressure of its own superincumbent column, make its way to highly heated regions. It may thus increase the steam pressure within until it is sufficient to raise lava in the vent of a volcano or produce earthquakes by the movement of the crust along an adjacent fault."

"It has been found by experiment that gases are rapidly absorbed in hot steel and other metals, and the rapid absorption of water in molten rock is proved by the vast clouds of steam arising from lava as it pours from a volcano. The vapors which are thus freely emitted are as readily absorbed. Hence it follows that as water permeates downward into the earth it finally gets hot enough to become steam in spite of the pressure, and tends to diffuse among the molten rocks below. But it cannot descend to great depths without becoming superheated and having its explosive power enormously increased; and the result is that it is spread in a layer just under the crust and finally brings on an earthquake."

"Since volcanoes occur only in the sea, on islands and along the shores of continents, but always die out inland, while all the vapor they emit is steam, except one part in a thousand, which is of secondary character, made up of by-products due to moisture and high temperature, it follows that steam is the sole original cause of volcanic activity. It has long been observed that earthquakes in a region near an active volcano cease when the steam escapes, and therefore imprisoned steam was the sole cause of previous shocks."

"This distribution of earthquakes in

## REALLY YOU KNOW THEY ARE DOING YOU GOOD AS SOON AS YOU PUT ONE IN YOUR MOUTH

## "The More Shortening the Richer the Cake"—A Common Misunderstanding in Cooking

### Equal to Butter in richness, but you use 1/3 to 1/2 less Mazola, and why

ONE great fault with many cooks is to use too much shortening in their cakes and pastries. This very often causes cakes to become heavy and indigestible, and pie crusts soggy and pasty.

All animal fats have this tendency. They contain more or less water. This prevents the heat from breaking up the starch granules properly.

Mazola is free from all moisture, as found in butter, lard and ordinary cooking fats. It is absolutely 100% pure vegetable fat.

Being already a fluid it does not have to be melted. It makes the tedious and timewasting "creaming in" process easier—which is so annoying when you use lard and other old fashioned compounds.

#### Perfect Pie Crust Easily Made

You can make the most delicious pie crust with Mazola—crisp, brown and flaky. You will want to eat every last morsel of it.

Cakes, bread and biscuits are light and wholesome, for the starch granules are thoroughly broken up. This is one reason that cakes and pies, cooked with Mazola, are better digested than when cooked in animal fats or compounds.

NATIONAL STARCH CO. Sales Representative for Corn Products Refining Co. 47 Farnsworth Street, Boston, Mass. Mr. W. A. Cahoon, Manager. FREE The new handsomely illustrated Corn Products Cook Book contains 64 pages of practical recipes, tested by the most expert cooks. Gives the most wonderful recipes—and so easy to follow. Write today, Corn Products Refining Co., P. O. Box 161, New York City.

The interior of the great oceans is imperfectly known, and below the known earthquakes appear mainly as belts around the oceans, especially the Pacific, which includes in its boundary seven-eighths of the active volcanoes. The total absence of active volcanoes in the interior of continents is recognized and the rarity of earthquakes within these inland regions is also conspicuous.—Kansas City Star.

#### MAKES GRASS GROW AND KILLS WEEDS

### Long-Sought Fertilizer Has Been Discovered at Rhode Island State College.

Kingston, R. I., Feb. 8.—Discovery of the long sought fertilizer that will grow grass and kill weeds is announced by the experiment station of Rhode Island State college as the result of twenty years of research. The realization of the dream of gardeners the world over, a weedless lawn, is possible without trouble or expense, according to the official college statement, merely by the use of ammonium sulphate instead of nitrate of soda in the annual application of fertilizer and "slowly but surely the weeds will disappear and the lawn will become the even velvety green that is the envy of every neighbor."

"Gardeners have almost universally advised supplying nitrogen, the chief element in the plant food of grass, in the form of nitrate of soda," says the statement. "This gradually tends to create an alkaline condition of the soil which is especially favorable to the growth of weeds. Soon the grass is crowded out and the lawn has an uneven appearance."

"By using ammonium sulphate which is not more expensive in the same quantities as the nitrate of soda, the nitrogen is furnished and the soil kept in the acid condition under which the grass develops best, but the weeds are so weak that they are crowded out."

"Experiments carried on at the Rhode Island State college with different lawn grasses under various methods of treatment have shown that Rhode Island bent grass, the grass that stands the closest clipping for golf putting greens and fine lawns, is usually quickly crowded out by coarse weeds. All attempts to better the soil conditions made the usual means of fertilization, except by the use of ammonium sulphate which helped the grass and weakened the weeds. Now after twenty years without any other treatment than the repeated applications of the ammonium sulphate, this one method stands out in marked contrast to all the others in the experiment. Scarcely a weed can be found, and the even green of the plot is an example of what the finest lawns can so easily be."

#### DEMANDING DIAMONDS.

### In Exchange for Food Delivered to the Wealthy Viennese.

Paris, Feb. 8.—The peasants of Austria were rapidly stripping the well-to-do residents of Vienna of their wealth by demanding payment for food in diamonds, jewels or other things of high value, say Red Cross men, who have visited that city. The farmers who suffered more severely than did the city people in the war now are having their incomes and are becoming prosperous, selling produce to the starving Viennese.

Austrian paper money is not always

welcome in the country and the peasants demand an exchange of goods through a system of barter with the city residents. This attitude is said to be adding to the growing antagonism between the country worker and the city dweller.

Directors of government pawnshops estimate that 15 per cent of the Viennese are living by selling or pawning their valuables, frequently heirlooms. As the cost of living continues to increase, it is considered only a matter of a short time until many of the families who were well-to-do before the war will have nothing more to offer for food.

# Just try LaTouraine Tea

as good as LaTouraine Coffee  
40 cents per 1/2 pound canister

# Aspirin

Then it is Genuine

Warning! Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians for 21 years and proved safe by millions. Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains proper directions for Colds, Headache, Pain, Toothache, Neuralgia, Rheumatism, Neuritis, Lumbago.

Handy tin boxes of 12 tablets cost but a few cents—Larger packages. Aspirin is the trade mark of Bayer Manufacturing of Monochloroacetic acid.
