Potatoes.—Never before have we seen so much land turned up at so early a day as can now be seen by looking over the farms in the neighborhood. Much of it has been planted with potatoes. We hear of farmers who have planted, or are intending to plant 10 or 15 acres of potatoes. The Starch factories seldom fail to take them at remunerative prices. We hear of contracts made at 35 cents a bushel, of the next crop, delivered at the Depot here.—*Caledonian.*

Some time ago Reynolds Carpenter, of Pownal Vt., lost $4000 while on a tour to buy wool in the Western States A few days ago the cashier of the Stark Bank at Bennington received by express a little box containing $3,439 of the money, and a letter from Louisville, Ky., directing him to place the sum to the credit of Mr. Carpenter, and stating that the writer found the money, and had used a portion of it, which he will return as soon as he is able.

The census of Texas shows a larger population than was expected. Its territory is nearly as large as all France which has a population of 36 millions. The result of 28 returns received (24 yet to be received) is, free inhabitants 140,494; slaves 44,505. Total 184,999.

"A disappointed bachelor out West says it makes little difference whether a man commits suicide or matrimony! In the one case he loses his life, and the other, his breeches."

The Methodist Church.—To show the extent of this Church in the United States it appeared by a statement made at the opening of the trial now proceeding in New York, that it is a voluntarily institution, and unincorporated; that it consists of 7 bishops, 4828 preachers—and in bishops, ministers and members under the organization in the United States, 1,190,960.—Of these, about 629,000 belong to the North and 465,000 to the Church South.

According to the Richmond Times, slaves have recently been brought into James River, from the West Indies, in violation of the laws against the slave trade. A case involving this business and the parties engaged in it, [whom the times says are Virginia Yankees] is soon to come before the U. S. Supreme Court at Richmond.

A boy two years old, named James McGrath, was carried over Niagara Falls on Monday morning last. He was playing on a board, on the Canada side, in company with an elder brother; their father saw them and chided the elder one, who suddenly jumped off, when the other was precipitated into the stream.

Interesting to Telegraphers.—For some time the line from Beardstown to Quincy, Ill. has been working very badly, and lately it was found impossible to get a despatch through at all. The difficulty was at length discovered; the wire had caught in a large Lombardy poplar tree at Jacksonville, where it was crushed by a new growth of woody matter, the wire oxydized entirely in two, and the two ends so completely enveloped by the new grown wood, as to be pulled out with difficulty.

A Persian poet gives the following instructions:

When thou art married, seek to please thy wife, but listen not to all she says. From man's right side a rib was taken to form the woman, and never was there seen a rib quite straight It breaks but bends not. Since then it is plain that crooked is woman's temper, forgive her faults and blame her not; nor let her anger thee, nor correction use, as it is vain to straighten that which is crooked.

Patriotism.—A Yankee gentleman conveying a British gentleman around to view the different objects of attraction in the city of Boston, brought him to Bunker Hill. They stood looking at the splendid shaft, when the Yankee said, "This is the place where Warren fell." "Ah!" replied the Englishman, evidently not posted up in local historical matters; "Did it hurt him much?"—The native looked at him with the expression of fourteen Fourth of Julys in his countenance. "Hurt him," said he, "he was killed sir." "Ah, was he?" said the stranger, still eyeing the monument, and computing its height in his own mind, layer, by layer; "well I should think he would have been, to fall so far."

"Tommy," said a toping father, a little 'tight,' to his son—"Tommy, hic——my boy, mind your daddy, and ever walk in his hic——hic——footsteps." "That might do perhaps," replied the juvenile, "if I wanted to go into the cork screw or Virginia fence business." The parent guardian raised his cane, but Tommy dodged it.

The number of seamen in the U. S. Navy is about 12,000. The government contracts for their entire supply of Clothing with Messrs. Whiting, Kehoe & Galloupe, of Boston. They have great facilities for carrying on the business, as in addition to their government contracts they supply traders in almost every town in New England, with Clothing. Those intending to purchase for the spring trade cannot do better than to call upon them.

Domestic Wool Market.

New York, Friday Eve., May 23, 1851.

The sales of the week have been confined to retail lots, and although some of our commercials have quoted 50,000 lbs. as sold, we can find no warrant to such assertions. We think the sales of the week at 25 a 30,000 lbs. Prices at 29 a 31 cents.

Holders are selling sellers, and although the stock is less than usual at this season, the demand does not warrant the belief that any amount could be cleared at present prices. Accounts from the West represent prices high, and speculators are operating under the belief that manufacturers will be obliged to come forward as they are on hare floors. We caution farmers from a belief in any such nonsense. Manufacturers will hardly touch wool at present prices, alledging that they cannot get a new dollar for an old one. They we believe, and what is more, will rule higher during July, August and September, than in October, November and December.

The Dutchess County Wool, said to have been received and sold on private terms, is all a humbug. It may be possible that some rainly swamp a tussel lamb may have shorn it, but it is preposterous to suppose any sane farmer in this latitude could have shorn his sheep on or about the 15th of May.

Although Fleeces is quiet, and Pulled Wool is abundant, we do not anticipate any serious decline before October or November.

TO WOOLLEN AND COTTON MANUFACTURERS.

Ferguson's Arrow Root Starch.

THE Subscribers have been appointed sole agents for the sale of Ferguson's Manufacturers' Arrow Root Starch, and expect to be constantly receiving it in sufficient quantities to fill orders to any extent. It is warranted pure, and made from Arrow Root only.

From the testimonials furnished to us by Mr. Ferguson, it appears that "This article has been used in a number of manufactories in New York and New-England the past year, with unparalleled success. It forms a sizing for Cotton or Woolen Yarn, of great consistency and extraordinary Cheapness. It takes the place of glue altogether, as that article is not added to the sizing made of this Starch. It renders the cloth firmer and more elastic, and gives to the goods a rich glaze that Iceland Moss and other expensive preparations cannot bestow."

The following are extracts from letters lately received:

"It is prepared similarly to other starch for sizing. It makes the threads of woolen yarn smoother and stronger than other Starch; *one pound of it is worth three pounds of potato starch for sizing woolen yarn.* I have heard it highly recommended for cotton."

(Signed,) DANIEL EAGLEY.

Pittsfield, April 28, 1851.

"We have used it nearly two years, and find it far cheaper and better than glue or any other Starch. I am confident it would be much better for the cotton manufactories to substitute it instead of potato starch."

(Signed,) T. CLAPP, 3d.

Pittsfield, April 29, 1851.

"I am obliged to give yours the preference, both as regards quality, economy, labor in application, beauty, &c.

(Signed,) C. B. ATHERTON.

Hartford, April 29, 1851.

The manufacturers, having introduced machinery in its preparation, thereby lessening its cost, is enabled to offer it at a further reduced price.

Bakersfield Academical Institution.

THE Summer Term commences on Wednesday, May 15.

The Apparatus is expensive, costing $600.00 and many experiments are given illustrating the principles of the Natural Sciences, that cannot be shown by any one of less expense.

The facilities for acquiring a knowledge of the French Language, Botany and the Ornamentals, are not inferior to those of any School in the State.

The Teachers of Music furnish three excellent Pianos, and no price will be spared to impart a theoretical and practical knowledge of the science.

J. S. SPAULDING, A. M., Principal,
Mr. & Mrs. S. M. BASSETT, Teachers of Music,
Mons. ANDRO DULUDE, Teacher of French.
