

EVERYTHING.

The Great Western [British] steam-ship left New York on the 24th ult., with a full freight and 140 passengers—as many as could be accommodated.

A general convention of performers and lovers of music is to be held at Stowe, Vt., on the 25th and 29th instant, at which Prof. Lowell Mason of Boston, will be present.

A destructive fire occurred in Portsmouth, N. H., on Sunday morning, which destroyed property to the amount of \$120,000.

The Science of Phonography is attracting a good deal of attention in Boston, New York and other cities. "Phonography is the art of writing according to the sound of words, with simple characters, each of which represents a simple sound, or element of the human voice, and no other." It appears to be a rail-road system of writing, when contrasted with stenography; and is distinguished for the rapidity with which words are written, and the ease with which the art is acquired and the characters read. It is said to be a fact that 214 words per minute can be represented by this art. Great country, this "Alleghania," with its steamboats and rail-roads, Phonography and Magnetic Telegraphs. Wish somebody would start a flying-machine.

The larger cities along the Atlantic coast, seem to be filled with incendiaries, and the newspapers, with accounts of the fires.

The Washington Union says the health of Gen. Jackson is rather better, according to the last accounts. He appeared seriously ill on the 15th April, but had rallied on the 17th.

The monthly list of letters in the Boston P. O. for April, contains about seven hundred names. A few queries of paper for those letters.

His Honor, the Sea Serpent, was seen a few days since from the shore at Rockaway, L. I. Boats were immediately manned and implements procured for his capture, but on arriving within speaking distance of the monster, it was discovered to be the mast of a vessel; to which the boats made fast and towed it toward the shore amid the cheers of hundreds who discovered not their mistake till the boats approached quite close to the land.

A new Mail Bag.—Mr John S. Bagg, late editor of the Free Press, has been appointed postmaster of Detroit.—Post.

Harvey Curtis, Esq., has been appointed postmaster at East Randolph, Vt.

The last number of the Globe was published on the 30th of April. The Union appeared from the same office, the next day, under the hand of Mr Ritchie.

A Great Scientific Convention met at New Haven, Ct., on the 1st inst., of which Prof. C. Devey, of Rochester, N. Y., was chosen President, in place of Prof. W. Rogers, of Va., who was to have acted as chairman, but was unavoidably absent.—The proceedings of the 1st day of the Convention, as reported in the Tribune are very interesting, and not a little amusing. (Copies of the Weekly Tribune, containing the whole proceedings, may be had at the P. O. on Saturday.)

The N. York True Sun says that a line of two telegraphic wires is about to be constructed across New Jersey, between Philadelphia and New York, at the risk and for the benefit of the patentees. The efforts of Mr Kendall to engage the New York capitalists in the project failed because they demanded five sixths of the whole profit of the adventure!

Electricity is doing wonders. A. M. Ross has succeeded in producing cucumbers five inches long, in 37 days from planting the seed, by applying electricity three times from a common Leyden jar.

A Speculation.—"Come, Bob, tell us how much you have cleared by your speculation!" said Bob's quizzical friend to him the other day. "Cleared, egad! cleared!" replied Bob, with a frown, "why you fool, I've cleared my pockets."

A coquette was declaring that the ladies ought to graduate as well as the other sex. To which a gentleman replied, "In that case, madam, you would probably take the degree of mistress of arts."

In the damp and gloomy prison of Perote where Santa Anna is confined—when former parasites have deserted him, old friends cooled, and those who shouted the loudest vivas in his honor when in power, now "cry death to the tyrant" still shares his captivity, and strives by a thousand little acts of kindness and affection to soothe his sorrow—that friend is his young wife! What a mystery is woman's love—what depths of feeling are hidden in the walls of her affection," says the Philadelphia Gazette.

The Swallow was partially raised on Saturday, April 26th, and got aloft sufficiently to-day to enable those at work on her to tow her ashore. The attempt to get her ashore was, however, attended with another disaster, which may prevent her being brought to the surface for several days. In towing round the hull towards Athens shore it was found that

one of her buoys was sinking; to save the buoys they were compelled to let the S. go, and she sunk into the deepest part of the channel, where she now lies in a more critical position than ever.—Cor. Livingston & Wells.

From the Hon. Bates Turner, late Judge of the Supreme Court of Vermont.

I hereby certify that I have been well acquainted with the medicine called "Downs Elixir," for seven years past, and from its effect upon myself, and in cases where I have witnessed its operation, I consider it one of the most fortunate inventions ever made. I am also acquainted with other medicines for coughs, colds &c. but in my opinion they cannot all compare with this. I have been at three different times raised up from dangerous illness by the use of this article, and in one of which I had the attendance of an able experienced physician, but whose prescription did not suit my case as well as the Elixir. I have recommended it invariably for a number of years past to those afflicted with lung-complaints and believe with good success.

BATES TURNER, St Albans, Sept. 16, 1842. 2603w

Wister's Balsam of Wild Cherry.—Wherever this medicine is introduced, it at once attains that high reputation which it so richly deserves. What can stop its sale, when on every hand can be witnessed its wonderful cure! The worst cases of Asthma, recent but dangerous Coughs, (and also those that are of long standing.) Bronchitis and Consumption, (in its early stages,) are always cured by this remarkable medicine.—Cin. Inquirer.

From the New Berlin Union Star of December 31, 1841.

Dr Wister's Balsam of Wild Cherry.—According to a number of recommendations in our possession, from doctors and other individuals, and from a knowledge of the benefits derived from the use of it by some of our neighbors, we respectfully recommend it to families. We have made use of the Balsam ourselves, and found that it produced such effects as recommended.

MARRIED.

At Frankfort, Pa. Henry Newell Guernsey, M. D. of Rochester, Vt. to Miss Statura Culburn, of Boston.

In Woodstock, April 27, by Rev. Mr. Kidder, Mr. George E. Wood, of Hartford, to Miss Nancy M. Williamson, of South Pomfret, Vt.

DIED.

In Barnard, April 25, Edwin Jacques, aged 35. In New Market, April 16th, after a protracted illness, Helen S. John, wife of Gilbert A. Grant, Esq., and daughter of the Hon. Asa Aikens, of Westport, N. Y., aged 25.

ROYALTON, April 25, 1845. 259-306. P. NEVENS.

STATE OF VERMONT.

Hubbard Ingraham } Windsor County } Court. } James Alcock } } March Term, 1845. } Martha Alcock }

Assumpt on a promissory note executed by the defendants for three hundred and twenty five dollars, dated April 10, 1844 payable to the plaintiff or his order on the first day of November next, which shall be null and void unless interest answered, for value received.

Because it does not appear that the defendants have had personal notice of the pendency of this suit, it is ordered that they be notified thereof by publication to be at least six weeks previous to the term of said Court, next to be held in said Woodstock, on the first Tuesday in November next, and that they appear and make answer to the declaration of the plaintiff, in the usual manner.

WILLIAM C. STOUTON, Clerk.

NOTICE.

This may certify that I have given my sons Homer M. Thomas and Henry C. Thomas, their time till they are of age, and kept accounts by them; after that time their debts contracted by them after their time.

MORDECAI R. THOMAS, Woodstock, April 29, 1845. 259-306.
