THE FARMERS' TRUST COMPANY.—This company was incorporated in 1885 and has been in active business since. It has a paid-up capital of fifty thousand dollars and a special guarantee fund accumulated which amounts at this time to about twelve thousand dollars. While the control of the company is in the hands of well-known residents of Vermont, it relies exclusively on western security in the matter of investment, and makes no loan which the managers can not ascertain by personal investigation to be secured beyond all question. Safety has been the first consideration. With this end in view the company will guarantee the payment of six, and in many cases seven, per cent interest to purchasers of its securities, believing that this is all that the safest line of investments and conservative management will warrant. The Farmers' Trust Company has negotiated about six hundred loans, secured on real estate. In each case investors have received their interest promptly and the principal at maturity. The company has acquired no land by foreclosure. These are facts which investors are invited to investigate. Loans are constantly on hand from two hundred dollars and upwards and are for sale at the office in Montpelier, Vt. Correspond with F. W. Atwater, president, or George W. Wing, treasurer.
