WASHINGTON’S GREAT GOLD MINE

Property of the Washington Meteor Mining Company at Blewett

Seventeen Tilles From This City, Which Is Its Railroad Station and Principal Trading Point. An Immense Mineral Region Now Opening. Will Be Great Market for Our Farm and Orchard Products.

Last Monday evening our citizens were given a treat, which those who were not fortunate enough to attend will not soon forget. We refer to the more economical show and lecture on gold mining, which was given by Messrs. Morris, Lamb, and Turpin, under the auspices of the Washington Meteor Mining Company. Our people of course had an excellent hint of entertainment which, beyond its entertaining and educational value, which is high, was a natural asset to the city. Situated as we are, at one of the terminals of the stage and mail route to Blewett, where the property of the Washington Meteor is located and being the chief trading point of the great mineral region in that section, hold of Washington properties and the prospectors were rapidly front. Now with the discovery of gold in the far north came a great change. We all know that placer mining is a difficult and hazardous procedure. However, in the mining rush of '97 and '98, it has been observed that placer mining is a difficult and hazardous procedure. However, in the mining rush of '97 and '98, it has been observed that placer mining is a difficult and hazardous procedure. However, in the mining rush of '97 and '98, it has been observed that placer mining is a difficult and hazardous procedure. However, in the mining rush of '97 and '98, it has been observed that placer mining is a difficult and hazardous procedure. However, in the mining rush of '97 and '98, it has been observed that placer mining is a difficult and hazardous procedure.
