

There is Snow On The Moon

The Moon has an Atmosphere. So the Scientists say. However, it will take a well-trained eye and a good glass to determine this to be a fact.

Not so with the SHARPLES CREAM SEPARATORS. Any man with ordinary intelligence and judgment, and with long or short range of vision, can readily see that the SHARPLES TUBULAR SEPARATORS are IN FACT by far the most superior cream separators ever placed on the market.

They are the WORLD'S STANDARD. They are the HIGHEST ACHIEVEMENT in CREAM SEPARATOR CONSTRUCTION the WORLD has ever SEEN.

To convince one of this FACT it does not take a SIWASH Pipe-Dream of an Imaginary contest such as was recently indulged in by an agent of the Disc separator on a trip "Down the Sound" whence he went to recover his breath and soothe his nerves by a breeze through the Straits after learning how few of the complicated disc machines have been sold in Washington, while he could hardly turn around without running up against a happy possessor of a modern Sharples Tubular Separator.

If you need a cream separator, buy the latest and the best, the SHARPLES, the LIGHT-RUNNING, CLEAN SKIMMING, SIMPLE, DURABLE and ECONOMICAL machine.

Write us for descriptive circulars and price list.
