MARKET INCREASES

United States Steel and Railroad Stocks Increase—Trade is Much Better Now.

NEW YORK, July 19.—To the accompaniment of greater activity, today's stock market increased its gains of the past few days.

The same condition that served earlier in the week, the crop outlook, increased activity in various fields of industry and easier money were again contributing factors.

Reports of general betterment in most lines of trade found confirmation in the increased bank exchanges, although this gratifying condition is somewhat nullified by poor collections in certain sections.

U. S. government bonds were unchanged.
