

D. GUNDLING & CO.—CLOTHING.

IT MAKES A DEAL O' DIFFERENCE

WEATHER KICKERS have this consolation: If the weather doesn't suit their suits they can get suits to suit the weather. Clothing is cheap now. But we don't keep clothing that is too cheap to be good. "There's a deal o' difference in the eyes of the Irish law, whither he said 'McCarty, come out, or come out, McCarty.'" And there's a deal of difference between buying cheap clothing and buying clothing cheap. The weather is uncertain, but we are certain to have just what you want for any emergency. We keep up our varieties and sell all the different weights right along. This is one advantage in dealing at the largest, completest, finest and cheapest Clothing and Furnishing House in West Virginia. Another advantage is that the price of each article is as low the day it is placed on the counter as it will be at the close of the season. We don't wait till we get scared at the end of the season to mark down our goods. Our prices are always too low to stand a reduction, and our goods are too valuable to be left on our hands at such prices.

JOSEPH W. GRUBB, Jeweler and Optician, Corner Twelfth and Market Streets.

Competitive Drill To-day. At 2 o'clock this afternoon the competitive drill of the Linsly cadets for the flag to be presented by Lieutenant Braunerthaler will take place on Fourteenth street at Eoff. After the drill there will be a dress parade, at which the flag will be formally presented. It has been some time since the Linsly boys appeared in public, and there will no doubt be a large assemblage of people to witness the drill and presentation.

A Big Coal Land Purchase.

Lewis Jones, of Wheeling, Mr. Ebbert, of Pennsylvania, and other capitalists, have secured several hundred acres of fine coal lands above Martin's Ferry, comprising that of J. C. Gray, Mr. Thornburn, August Kuckuck, and others. The Cleveland & Pittsburgh and the Wheeling & Lake Erie railroads will put in switches at this point shortly. Extensive mines will be opened. They will employ about six hundred men, and this will be a big thing for Martin's Ferry.

The Glass Business.

Although the conditions of trade in every branch of glass manufacture lack the animation that should attend it at this time in the season, there has been a moderately increased demand within the past week for goods in some lines, caused probably by the desire to have special orders completed to meet requirements which might occur during the summer shut down, though there are goods in most of the regular staple lines in ample stock at nearly all the factories.

A Broken Wall.

On Wednesday night a piece of the retaining wall supporting the National road on the grade between the top of Wheeling hill and Fulton, fell out, letting down the road. The break occurred just east of the mouth of the Terminal Railway Company's tunnel, and the piece of wall that fell out is between forty and fifty feet in length. There was an abandoned coal mine immediately under the break, and the rotting out of the supporting timbers is thought to be the cause. A big force of men was put to work at once to prevent the break from extending.

THE ELECTRICAL CARS.

Superintendent Garden Explains the Source of the Recent Trouble.

A reporter had a talk with Mr. John Garden, Secretary of the Wheeling Electrical Company yesterday, concerning the condition of affairs at the Electrical Company's plant. He said that the stories of long delays that could have been avoided are unfair and unkind. The company has had phenomenally bad luck this spring. First, the power house was removed from the old site. That took time and caused a shortage of power for several weeks. When the engines were placed upon new foundations and were in what seemed to be the best shape, one of them broke down without the slightest warning. That engine had been thoroughly repaired and was in as good condition as possible when the break occurred. When it gave way, there was another engine connected with it in such a way that the strain of the breaking engine strained the other one, and in a few days the second one gave way. These misfortunes followed each other in rapid succession without apparent cause. Everything seemed to go wrong, no matter how great care was exercised. About the time the power plant was gotten into shape again, the wires began to give trouble. Wires would break at the most inopportune times and under the most annoying circumstances. Just before the rain on Tuesday night a wire broke on the main street bridge. Men were put to work brazing it, but the rain came on and the work had to be put off a whole day. Complaints were made about that job not being repaired promptly, but the company was doing the best it could.

Concerning the loose wires, Mr. Garden said: "The expansion in hot weather lengthens them, and the slack has to be taken up. When cold weather comes again, the contraction shortens them, and they must be adjusted again. We have a lot of men at work now taking up the slack, and hope to have everything right soon."

"People will complain of the cars being stopped half an hour at a time, when, in fact, they are not at a standstill more than a few minutes. To have the cars stopped annoys no one more than the people who manage the plant. We are always anxious to keep the wires charged and do the best that can be done."

"There has been some talk among people who do not know about the trolley wires being worn out. These wires are made of hardened copper and will be in good condition for five years yet, at least. Wires will break sometimes, even if they are new, and the fact that wires are down in Wheeling once in a while has no bearing upon the condition of the lines."

"We are doing all in our power to get matters into shape, and if our luck ever changes, we will be all right again."

THE GARRISON CASE.

Taking of Evidence Bearing on the Motion for a New Trial to Begin this Morning.

Judge Campbell came down from New Cumberland yesterday morning and opened a special term of Part I of the Circuit Court. The term was for the special purpose of hearing the arguments of counsel in the matter of the application for a new trial of the Garrison case.

Captain Doveher and Mr. Howard, of the prosecution were present, as were Colonel Arnett and Mr. Sommerville, for the prisoner. The State's attorneys asked that the affidavits upon which Dr. Garrison's attorneys base their motion for a new trial be submitted to the court and that they be allowed to examine them preparatory to summoning witnesses to rebut the statements made in the affidavits. Mr. Sommerville filed the papers with the clerk, who at once gave them to Captain Doveher and Mr. Howard, who repaired to a corner of the court room to look at them.

Captain Doveher asked the court to order the witnesses whose depositions had been taken, brought before the court for cross-examination. The court set this morning at 9 o'clock as the time for hearing evidence in the matter and the Sheriff was furnished a list of witnesses to be summoned for each side. The State will ask for the members of the jury and about ten other persons, and the defense will call about twenty persons altogether. The examination will begin this morning if the witnesses can be had by that time, and it is expected that three days will be occupied examining them; after which the arguments will be made.

Supreme Court of Appeals.

The Supreme Court of Appeals met in the Public Building again yesterday, with Hon. D. B. Lucas still absent. D. H. Evans and Frank Cox, the former of Wheeling, and the latter of Monongalia county, were admitted to practice before the court.

The case of John E. Clator vs. Charles Oito, from Ohio county, was continued.

In the case of E. M. Hukill vs. David Meyers and others, a writ of certiorari was issued commanding the clerk of the Circuit Court of Monongalia county to send forthwith, the missing portion of the record.

The case of Moundsville vs. Velton, was argued and submitted. The four saloon injunction cases, Hartley vs. Henretta, Lutes vs. Riley, Stidger vs. Kiley and Dick vs. Kull, from Marshall county, were submitted on briefs.

The case of the Janeville Hay Tool Co. vs. Boyd and others, from Ohio county, was partly heard and continued till this morning.

S. B. Dunphy, mate of the steamer Arizona, had his foot badly jammed. Thomas' Electric Oil cured it. Nothing equal to it for a quick pain reliever. dw

Sunday Excursions.

Until October 25, the Ohio River Railroad Company will sell Sunday excursion tickets at one fare for the round trip to Moundsville, Woodland, New Martinsville, Sistersville, Salama, Williamstown and Parkersburg.

Progress.

It is very important in this age of vast material progress that a remedy be pleasing to the taste and to the eye, easily taken, acceptable to the stomach and healthy in its nature and effects. Possessing these qualities, Syrup of Figs is the one perfect laxative and most gentle diuretic known. daw
