BANK OF THE OHIO VALLEY. CAPITAL \$175,000.

WHEELING, W. VA. DIRECTORS: William A. Jett, President. William B. Simpson, Cashier. Drafts on England, Ireland, France and Germany.

THE GEORGIA MAGNET. The Wonderful Power of Little Mrs. Abbott.

SHE DEFIES GRAVITATION'S LAW. You Cannot Lift her Against her Will, Though She Only Weighs 92 Pounds, and can Lift Great Weights Herself—Even Suspend the Strongest Man in the World, Could not Lift her—Scientists Interested in her Case—Dr. Hyslop, of Columbia College, Studying it.

New York Press. Mr. Isaac Newton had run across little Mrs. Annie Abbott, of Milledgeville, Ga., at the time the historic apple fell out of the tree under which he lay, he might never have given the world the theory of the attraction of gravitation, for the astonishing powers of this Georgia woman apparently knock the theory into a cocked hat.

Mrs. Abbott has been showing these powers to the public in this country and Europe ever since she was seven years old. She has now come to New York for the first time. She weighs 92 pounds and her arms, though fairly muscular, are scarcely larger than those of her fourteen-year-old daughter.

She has been sickly ever since she was born, a little more than thirty years ago, and she seems so frail that the breath of September might blow her away if it took a notion to do anything so rude.

AMAZING FEATS. In ordinary circumstances Mrs. Abbott cannot, as she says, lift the tray out of her trunk, yet on one occasion, in the presence of a notable assemblage of Britons, she lifted 3,200 pounds.

Charles Mitchell, ex-champion pugilist, tried it after her, and failed ignominiously. Mrs. Abbott performed this feat without any muscular exertion so far as could be determined, and believes she could lift even greater weights, simply by flying in the estimated face of Isaac Newton.

On the other hand, Eugene Sandow, the strongest man living, tried to lift her off her feet when she would that he should not, and tug and strain as he might, he could not pull her clear of the floor, although, when she had not exerted her mysterious force, the man had taken her up as lightly as if she were a rag baby.

By placing her hand lightly on a chair some ably bodied man is trying to hold, she sways man and chair to and fro, and even tosses them about with childish playfulness.

She lifts heavy men from the floor by placing her hands gently on their faces, and if the man is seated in a chair, she lifts him, chair and all, by resting her hands on the back of the chair without even grasping it. She lifts, in the same manner, as many men as can be piled on a chair. On at least one occasion eight men, weighing in all nearly 1,300 pounds, heaped themselves in two chairs, and then this slight woman laid one hand on each chair and the whole mass of humanity and furniture rose from the floor.

By resting her fingers on the back of a rocking chair she can prevent the occupant from rocking, try however hard he will.

A MAGIC BILLIARD CUE. She does even more wonderful things with a billiard cue—any cue, not one of her own choice. For instance, she lays one across her open palms, and then invites any number of spectators to push it across her hands. The strongest of the onlookers steps forward and does his best with the cue, but it does not budge; then another man steps forward to help the first, and the two succeed no better. As many as four people have often taken part in the experiment without making any impression on the cue or on the little woman on whose hands it rests, without being clutched in any way, except by the unseen force that is somehow generated within her, as if it were electricity, and she were a small but tremendously effective dynamo.

Another of Mrs. Abbott's experiments with a billiard cue is to hold one forward in both hands, while she stands erect on one foot. As many as can get at the cue push against it, but are unable to force the woman off her balance. It is an interesting fact in this connection that Mrs. Abbott has always suffered from weakness of the ankles, and has ordinarily been unable to stand as much pressure on her feet as most people can.

In another of her tests a billiard cue was placed upright on the floor, with five men to hold it there, and another man perched uncomfortably on top to make assurance doubly sure. When Mrs. Abbott laid her palms against the cue, up went the whole weight.

She puts her hand out against a wall, or even against a window—and then she glances at that, sometimes—and as many men as can push against her slender body at one time are unable to force it against the wall or the window, as the case may be. The queerest thing about this last test, or any of the others in which the circumstances permit, is that Mrs. Abbott, to show that the force exerted against her has no effect upon her, often holds in her hands an egg which would be crushed instantly if the pressure on it amounted to anything. In the experiment of holding herself out from a wall against which a number of men were trying to push her, Mrs. Abbott has sometimes been known to have a spectator hold an egg in his hand, while his fingers and the bottom of his hand touched the wall. Upon his hand Mrs. Abbott would lay hers, and then sustain herself against the pressure of as many as could conveniently push against her, yet without crushing the egg.

HELPLESS ON A CARPET. A peculiar feature of these phenomena is that they are manifested only when Mrs. Abbott and those who are experimenting with her are standing on glass or wood. Standing on a carpet, the woman is rather more helpless than the average of human beings, and if any of those who are working with her stand on the carpet, her power over them ceases. Furthermore, if any cloth material is interposed between her and the others, she can do nothing, except with her own normal strength. Neither can she lift dead weight. A human being must be somewhere in the pile. She could lift a chair with a heavy man in it, whereas she couldn't lift the chair without the man, unless, indeed, it was a very light one.

HER HISTORY. Mrs. Abbott, as her picture proves, is a very thin little woman; indeed, she seems to be growing thinner all the time about the body and bust. Her arms are strongly developed, which fact she ascribes to the fact that they are handled so much in her performances. She has a well formed leg, somewhat

muscular below the knee, but not extraordinarily so.

Mrs. Abbott is the daughter of country people. Her ancestors, as far as can be traced, have all been farmers, or held positions in the church in farming districts. None of the family have ever been affected or gifted in the manner the little Georgia Magnet seems to be gifted.

She married at the age of fourteen and has three children—a girl, fourteen years old, a boy of eleven and another of seven years. A lady who is acquainted with Mrs. Abbott says the Little Magnet is physically constituted like any other woman, subject to the same ailments, no more, no less.

Her condition, as already intimated, cannot be traced to pre-natal influence in either her father or her mother's line of ancestors. When her power first asserted itself, the simple country folks among whom she lived scarcely paid any attention to it, and Mrs. Abbott did not attempt to make any money out of the thing until the death of her husband made it necessary for her to earn her own living. Even then she tried performances only a small scale; she got her start in London, whither she went on borrowed money.

A very remarkable thing in connection with Annie Abbott is her peculiar diet. She lives often for months at a time on black coffee and boiled lobster. She drinks little, but champagne does not interfere with her performance, in fact it seems to improve it, inasmuch as it brightens the Little Magnet's usually somewhat morose temperament.

ROYALTY ELECTRIFIED BY HER. Mrs. Abbott has made a tour of the world, starting from New York penniless and in debt, with a few billiard cues given her by a friend to use in her performances, she came back loaded with diamonds, with a very respectable bank account and scrap books containing 1,500 pages of newspaper and magazine clippings, written in scores of different languages and embellished profusely by illustrations. Annie Abbott has been started at, lifted and experimented with by almost every potentate in the Almanac de Gotha, with the exception of the Kaiser, who refused to look upon any human being claiming to possess more mysterious powers than he himself. Some of them paid Mrs. Abbott handsomely in gold, others in medals and jewelry.

Scientists all over those parts of the world that Mrs. Abbott has visited have been very much interested in her powers, and it is a significant fact that the charges of fraud which would naturally arise have come rarely, if at all, from scientific observers. A number of New York physicians have watched with keen interest several private tests of Mrs. Abbott's mysterious powers in the past week, but none of them has put forward any explanation of the thing.

On Wednesday Professor Hyslop, of Columbia College, one of the foremost experts in the country on hypnosis and psychical phenomena, accompanied a Press reporter to the Sturtevant parlors, saw a few of Mrs. Abbott's tests and questioned her keenly. He became convinced that the case was well worth the most careful study, and hopes to go to, or toward, the bottom of the mystery in company with Dr. Hodgson, of Boston, the investigator in chief of the American Society for Psychical Research.

FINANCE AND TRADE. The Features of the Money and Stock Markets.

New York, Oct. 1.—Money on call easy at 1 per cent; last loan 1 per cent; closed at 1 per cent. Prime mercantile paper 3 1/2 per cent. Bankers' exchange firm, with actual business in sterling bills at \$180 1/4 65 1/2. Silver certificates 63 1/2. The total sales of stocks to-day were \$35,070 shares.

The stock market opened irregular and very quickly developed weakness in the entire list on a pronounced selling movement. The pressure to sell was heaviest in Sugar. In the opening there was a break of 1/2 per cent, but followed by a recovery of 1/4 per cent and for a short time the improvement was maintained, but during the afternoon renewed sales set in, and the market again declined, closing at the close. The last sale was at the lowest of the day and showed a loss of 2 1/2 per cent from the final sale of Saturday; the pressure to sell was heaviest in the afternoon, but the advance was promptly checked by heavy offerings of the stock and a steady decline took place, the last sale being 1/2 per cent below the closing of the previous day.

In the railway list the Grangers were only fractions higher, except in Burlington & Quincy, which declined one per cent with a final rally of 1/4 per cent. Western Union declined 1/4 per cent, of which 1/2 per cent had been recovered at the close.

The bond market was rather heavy in the early dealings and during the first part of the afternoon, but became steadier in the later part of the day. The largest sales, however, resulted from forwarding on contracts that matured to-day. Printing cloths were in moderate demand with fair sales at 2 1/2 per cent, for 61 grades.

New York, Oct. 1.—Petroleum steady; Pennsylvania oil sales poor; November option, sales none; closed at 8 1/2 c. Light oil, sales none.

New York, Oct. 1.—Hogs in good demand and higher at \$15 1/2 50; receipts 1,000 head; shipments 1,000 head.

New York, Oct. 1.—Wool steady. Domestic 1 1/2 50; foreign 1 1/2 50; receipts 1,000 bales; shipments 1,000 bales.

New York, Oct. 1.—Pig iron quiet; Scotch \$19 1/2 10; American \$19 1/2 10; receipts 1,000 tons; shipments 1,000 tons.

New York, Oct. 1.—Cotton steady; receipts 1,000 bales; shipments 1,000 bales.

New York, Oct. 1.—Sugar steady; receipts 1,000 tons; shipments 1,000 tons.

New York, Oct. 1.—Wheat steady; receipts 1,000 bushels; shipments 1,000 bushels.

New York, Oct. 1.—Flour steady; receipts 1,000 barrels; shipments 1,000 barrels.

New York, Oct. 1.—Corn steady; receipts 1,000 bushels; shipments 1,000 bushels.

New York, Oct. 1.—Oats steady; receipts 1,000 bushels; shipments 1,000 bushels.

New York, Oct. 1.—Rye steady; receipts 1,000 bushels; shipments 1,000 bushels.

New York, Oct. 1.—Barley steady; receipts 1,000 bushels; shipments 1,000 bushels.

New York, Oct. 1.—Cloth steady; receipts 1,000 yards; shipments 1,000 yards.

New York, Oct. 1.—Linen steady; receipts 1,000 yards; shipments 1,000 yards.

New York, Oct. 1.—Cotton goods steady; receipts 1,000 yards; shipments 1,000 yards.

New York, Oct. 1.—Woolen goods steady; receipts 1,000 yards; shipments 1,000 yards.

New York, Oct. 1.—Silk steady; receipts 1,000 yards; shipments 1,000 yards.

New York, Oct. 1.—Hosiery steady; receipts 1,000 yards; shipments 1,000 yards.

New York, Oct. 1.—Shoes steady; receipts 1,000 pairs; shipments 1,000 pairs.

New York, Oct. 1.—Furniture steady; receipts 1,000 pieces; shipments 1,000 pieces.

New York, Oct. 1.—Hardware steady; receipts 1,000 pieces; shipments 1,000 pieces.

Shoes—No. 1, 25 00; No. 2, 25 00; No. 3, 25 00; No. 4, 25 00.

BEFORE I could get relief from a most horrible blood disease, I had spent hundreds of dollars TRYING various remedies and physicians, none of which did me any good.

My finger nails came off, and my hair came out, leaving me perfectly bald. I then went to HOT SPRINGS.

Hoping to be cured by this celebrated treatment, but very soon became disgusted, and decided to TRY S.S.S.

The effect was truly wonderful. I commenced to recover after taking the first bottle, and by the time I had taken twelve bottles I was entirely cured.
