

WEST VIRGINIA CROPS
Condition and Climate for the Week Ending Monday

WEATHER CONDITIONS.—The week was marked by excessive rainfall over the state, deficient sunshine and normal temperature. Especially heavy rains, falling generally on the 6th and 10th insts., causing high water in the streams and flood stages in the rivers.

Crop Conditions.—Wheat threshing progressed very slowly, owing to the continued rains, and considerable damage from sprouting and rotting in stack was reported.

Oat threshing was greatly retarded, and the crop was badly damaged by rotting and sprouting in stack and shock. Oats that were threshed out secured in very poor condition.

Wheat, oats and grass stacked or left out on lowlands are nearly a total loss, being washed away or damaged by the floods in streams and rivers.

The harvesting of hay was greatly retarded, and the crop badly damaged in stack or swath by rains that was cut or secured in poor condition.

Corn continued to grow rapidly, and is earing out well generally; it needs sunshine to properly mature; considerable damage was done to corn in lowland fields by the floods.

Buckwheat, millet, tobacco, gardens, turnips, sweet potatoes and pastures are doing well and are in fine condition.

Fayotte—Floods in some streams, and considerable damage done by overflow; crops damaged by rotting; harvesting delayed; corn, potatoes and pastures doing well.

Rudolph—High water very disastrous to crops; the damage to crops by flood and long continued rain will run into the thousands of dollars.

Pendleton—Wheat being damaged in the stacks from rains; hay and oats badly damaged, too wet to stack; buckwheat is in good condition.

Kanawha—Crops doing well on high ground, on low ground the flood has ruined thousands of bushels of corn and potatoes, and all wheat and oats stacked out.

Canal—Corn doing best on hill land; potatoes rotting; gardens doing well; a great amount of hay damaged in stack by the rains; great damage to creek farms and crops.

Calhoun—Hay harvesting greatly delayed by rain, and that harvested has been damaged; corn is in excellent condition; potatoes damaged, some by the wet weather.

Glimer—Hay harvesting delayed and considerable damage done to hay cut and stacked by rain; corn, pastures and gardens doing well; crops damaged on lowlands by high water.

Sevier—Too wet; hay harvest not completed, and hay bleaching as it stands; corn, turnips and sweet potatoes doing well.

Upshur—High water damaging lowland meadows; oats rotting and growing in stack and shock; threshing suspended; corn doing fairly well; buckwheat making a rapid growth.

Grant—Hay and oats being damaged by rains; late meadows and second crop making good growth; corn doing well.

A Shattered Nervous System. FINALLY HEART TROUBLE. Restored to Health by Dr. Miles' Nervine.

MR. EDWARD HARDY, the jolly manager of Sheppard's Co.'s great store at Braceville, Ill., writes: "I had never been sick a day in my life until 1890. I got so bad with nervous prostration that I had to give up and commence to doctor. I tried our local physicians and one in Joliet, but none gave me any relief and I thought I was going to die. I became despondent and suffered untold agony. I could not eat, sleep nor rest, and it seemed as if I could not exist. At the end of six months, I was reduced to but a shadow of myself, and as I loved my heart became affected and I was truly miserable. I took four or eight bottles of Dr. Miles' Nervine. It gave me relief from the start, and at last a cure, the greatest blessing of my life."
