HOW TO CURE INSOMNIA

By Hypnotize Yourself to Sleep by "Transfixion." The technical words used in scientific descriptions of the phenomenon of transfixion is "transfixion." This relates to the position of the eyes just before sleep comes on, and it is brought about not as yet fully explained, but by adjusting the eyes to this position the nerve center of the brain is affected, producing an effect like switchboard electricity from a keyboard, and consciousness follows almost instantaneously.

A common observation among that babies "get cross eyed just they fall asleep," and this can be verified wherever there is a baby house by closely watching the little one as they are closing their eyes. Almost invariably the eyes are turned inward and generally downward, sometimes upward. True sleep, if undisturbed by suggestion, soon turns into what we call "hypnotic sleep," as is shown by the awakening refreshed, as from sleep.

After who was formerly afflicted with chronic insomnia effected a permanent cure by means of what he terms "hypnotic method," and gives his rec-

Va., on Tuesday the 24th day of January, 1893, for the purpose of electing a Board of Directors for the ensuing year and for the purpose of enacting by laws for the government of said corporation. A. C. Davis President. 8-3t

How to Make a String Holder for the Kitchen. Take a small Yeddo straw cuff, such as butchers wear, lace the small end of it together with fancy cord and nail it inside the closet door by the largest end.

HOW TO BE A WEATHER PROPHECY.

These Rules Will Help You to Forecast Weather Without a Barometer.

A red sunset with a purplish tinge augurs fair weather. A red sunrise means wet. A yellow or coppery sunset indicates rain, and a gray sunrise betokens a fair day. A rainbow in the morning heralds wet. These are embodied in some quaint verses used much in the past:

Evening red and morning gray will set the traveler on his way;
But evening gray and morning red will bring down rain upon his head.

Another is:
A rainbow in the morning is the shepherd's warning;
A rainbow at night is the shepherd's delight.

How to Make Sweet Potato Waffles. Take two tablespoonfuls of mashed sweet potatoes, one spoonful of butter, one of sugar, one pint of milk and four tablespoonfuls of wheat flour; mix all together and bake in waffle irons.

How to Use a Round Japanese Basket. The little Japanese baskets selling for three or five cents can be used as match receivers. Put a medicine glass in one, trim the basket with ribbons and hang it on the chandelier for burnt matches. Crochet a cover of knitting silk with stripes, draw it over the basket, put two or three tassels at the bottom, and you have a string holder. Or press the bottom out, put a ball of blue cord in with some squeezing and pushing, put a band of blue ribbon around the basket, with strings to hang it up by its side, and a long loop opposite, on which is a tiny pair of cheap scissors. Fill one of these baskets tightly with hair combs, cover with muslin, then with silk and lace, and trim on the outside, and you have a first rate pin-cushion. Line another loosely with silk, ending in a fringe around the opening, for a jewel case. Lastly, trim with lace and ribbon, and fill loosely with white curled horsehair, and you have made a hairpin holder.

How to Make a Glove Cleaning Liquid. Have a druggist put up one quart of deodorized benzine, one dram of sulphuric ether, one of chloroform and two of alcohol. Perfume with cologne water.

How to Rub for Rheumatism. People who rub their arms or legs for rheumatism should remember that the secret of the benefit derived from massage is that the operator always rubs up—that is, in the direction of the heart. The reason is found in the fact that the valves of the veins and capillaries all open toward the heart, and that rubbing in that direction assists their action. Rubbing down—that is, away from the heart—does harm, for it clogs these veins, etc., and impedes their circulation.

How to Darn Very Large Holes in Stockings. Baste a piece of coarse net the right color over the hole. Trim it close to the edges of the hole and darn as usual.

How to Make a Useful Kitchen Table. Set a packing box on its side, with the open end front. Cover the sides and top with oilcloth, letting it hang in a sort of curtain over the front. A piece of tin or zinc nailed over part of the top will give a place to set hot kettles. The fluted metal from an old washboard will do nicely. Behind the oilcloth curtain may be stowed kindling wood or any rough kitchen belongings, or it may be used for a pot closet.

How to Remove Ink Stains from Silver. Ink stains on silver inkstands are removed by rubbing on them chloride of lime made into paste with water.

How to Make a Wall Decoration of a Palm Leaf Fan. Cover its right side with bright, coarse, yellow worsted and silver tinsel, alternating them, and letting them begin at the edge and converge at the handle. Then buttonhole the edge with worsted, wind the handle with it, twist tinsel loosely around, and finish with a big yellow bow where the handle joins the fan.

How to Fatten Poultry. Crush and soak their corn in water. This will help digestion and make the food go further.

How to Treat an Abrasion of the Skin. Lay on it lint or linen wet with cold water and cover with oil silk, or cover the bruise with goldbeaters' skin. If an extensive wound, apply on lint or linen a mixture composed of one part carbolic acid to twenty-eight parts best olive oil. Still another way is to apply dry lint, letting the blood soak in it. It will form a scab and gradually come off.

How to Preserve Gilt Frames from Flies. Boil three or four onions in a pint of water and brush the frames over with the liquid.

How to Make a Pretty Lamp Shade. Over a wire frame put three layers of crape tissue paper, each a shade darker than the other, the darkest on top. Draw the paper in around the neck and fasten with a wire concealed by a ribbon tied in a bow at one side. Smooth out the lower edges of the paper to give the appearance of frills.

How to Clean Swansdown. Wash in soap and water, shake out, and when the down is somewhat raised shake it before the fire to dry.

How to Prepare Tracing Paper. Rub the paper with a mixture composed of equal parts of nitoil and oil of turpentine, rubbing wheat flour on afterward to dry it as much as possible. Then hang it out on the line, if the weather is fair, for twenty-four hours to complete the drying process.

How to Make a Card Receiver. Gild a small flower basket, line with silk and tie a bow of ribbon on the handle.

How to Remove Match Stains from Marble. Rub them with sulphide of iron.

How to Prevent Light Hair from Darkening. Brush the hair and let it hang loose, staying out of doors with uncovered head as much as possible. Kerosene will darken light hair and will make one's hair grow, but it must be used sparingly or it will injure the health.

How to Remove Perspiration Stains. Apply a strong solution of soda and rinse with water.

How to Cleanse Vinegar Bottles. Use crushed egg shells in a little water.

PILES

The Best Remedy in the world, says J. H. H. of Syracuse, N. Y., is Pastor Koenig's Nerve Tonic, because my son, who was partially paralyzed three years ago and attacked by fits, has not had any symptoms of them since he took one bottle of the remedy. I most heartily thank for it.

Nervous Prostration, Sleeplessness, and Weakness. War Escurros, Quebec, Oct. 1, 90. The Pastor Koenig's Nerve Tonic I ordered was for a young lady of my household, who was almost useless to herself and others, owing to nervous prostration, sleeplessness, weakness, etc., etc. To-day there is quite a change. The young person is much better, stronger, and less nervous. She will continue to use your medicine. I think it is very good. REV. P. HANVIE.

FREE—A Valuable Book on Nervous Diseases sent free to any address. This medicine has been prepared by the Reverend Pastor Koenig, of Fort Wayne, Ind., since 1870 and has now prepared under his direction by the
