PETER WHITSTON AND THE HAY.

Mr. E. A. White, of Richmond, has sent us a letter, which we shall present to our readers in the sequel, in which he tells us of the entertainments that have been afforded them by Mr. Whitston and his family, and we shall publish it in due season.

THE RED SOYBEAN OIL.

The red soybean oil is a valuable product, and it is hoped that it may be cultivated in this country. It is rich in oil, and when well pressed, it yields a large amount of it. It is also a valuable food, as it contains a large amount of protein and is a good source of nutrition. It is also a valuable source of vitamin E, which is essential for good health.
