

Squawk!

IN place of a *real* WARNING signal many cars nowadays come equipped with feeble "SQUAWKERS." They are about as ineffective in GETTING THEMSELVES HEARD as old-fashioned bulb horns used to be. You know—you who have these squawkers on your cars. You know how they act in crowded streets, in noisy traffic. You know how much of the road they get in the country.

Take a ride with a man who has a KLAXON. Notice the difference. See how you get the right of way—how the Klaxon CARRIES, how it gives walkers ahead (and they are good souls after all) plenty of time to get out of the way without jumping—but how they always DO get out of the way!

See how it GETS ITSELF HEARD in the country—half a mile ahead of your coming. You don't have to slow down, shift gears, waste gas and WAIT for the wagon or car ahead to turn out. They have already TURNED OUT when you get there!

And feel the SAFETY of it. Around sharp turns, over steep hills you KNOW the Klaxon has been heard—and that your share of the road is ready and waiting for you.

Then—think it over. What is four or six or twelve or even twenty dollars against the discomfort, the slow-downs, the gas-waste, the anxiety, the actual DANGER of a feeble, ineffective signal!

Get a KLAXON—and RIDE IN PEACE!

You can always TELL a Klaxon by its unfailing WARNING POWER and by this name-plate:-

—“the sign of a perfect signal”
